FINAL FORECAST OF THE INDIGO CROP OF BENGAL, 1906.

THE following note is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

The 28th December 1906.

DEPARTMENT OF AGRICULTURE, BENGAL.

FINAL FORECAST OF THE INDIGO CROP OF BENGAL, 1906.

[On an average of five years ending 1904-05, the area under indigo in the territory to which this forecast relates has represented some 40·03 per cent. of the total area under indigo in British India.]

Explanatory.—In the preliminary forecast of the indigo crop of 1906, returns were shown for fifteen districts of this Province and for one district, viz., Malda of the newly-formed Province of Eastern Bengal and Assam. Under orders of the Government of Eastern Bengal and Assam, Rangpur and Malda are no longer to be dealt with in the forecasts of

Bengal Proper. In Burdwan, Murshidabad, and Cuttack, no cultivation of indigo was undertaken during the year. The returns of fifteen districts only are being reviewed in this forecast.

Character of the season.—Sowings, as reported in the preliminary forecast of October, were delayed a little owing to want of rain early in the season. In North Bihar, which is the most important tract under indigo in the Province, the crop suffered very much from heavy rain and, later on, from floods.

Area sown.—The area sown this year, as compared with the two previous years, is shown below:—

	Acres.
Area sown in 1904	... 223,100
Area sown (as now revised) in 1905	... 161,500
Area sown in 1906	... 137,800

Character of the crop.—Of the important districts, Champaran reports an outturn of 34 per cent. of the normal, Muzaffarpur 35 per cent., Darbhanga 57 per cent., Saran 56 per cent., Purnea 50 per cent., and Monghyr and Bhagalpur 80 per cent. each. Some of these estimates appear to be unduly low. These figures would mean that in North Bihar, including Monghyr, the outturn on the whole would be only 45 per cent. of a normal crop, or some 14,000 factory maunds. In my preliminary forecast, after consulting the Secretary, Bihar Indigo Planters' Association and Messrs. Moran and Company's forecast, I estimated that these districts would produce a little over 20,000 factory maunds. I see no reason to decrease this estimate. Since the issue of the preliminary forecast, prospects are reported to have improved in four districts and to have become worse in two.

According to the district returns, the outturn in Lower Bengal (including the minor districts of Bihar) would come to 3,631 factory maunds. This estimate is probably nearly correct.

Outturn.—On the whole, I would estimate for the Province an outturn of about 24,000 factory maunds.

The total outturn of the crop last year, exclusive of Rangpur and Malda, amounted to 21,122 factory maunds.

According to the trade return supplied by Messrs. Moran and Co., last year's total outturn for the Province was 23,601 factory maunds. The total outturn of the present year's crop is now estimated by this firm at 22,000 factory maunds for North Bihar, and at 3,800 factory maunds for Lower Bengal, making a total of 25,800 maunds for the entire Province.

C. A. OLDHAM,
Director of Agriculture, Bengal.

CALCUTTA;
The 15th December 1906.

APPENDIX I.

Final Forecast of the Indigo Crop of Bengal, 1906.

District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate area sown last year (1905) in acres.	Estimated area sown this year (1906) in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1905)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906)?	Figures from the Cadastral Survey.			Remarks by District Officer.	Remarks by the Director of Agriculture, Bengal.
							Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under this crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12
							Acres.		Acres.		
Burdwan ...	1,721,964	1,334,300	1,500	.....	50	...	40,154	1890 to 1898 and 1903 to 1905.	Nil	No indigo has been grown in this district this year.	
Nadia	1,727,920	1,043,800	1,100	1,600	50	75	Not cadastrally surveyed.				
Murshidabad...	1,771,520	938,700	400	...	42	...	...	...	...	The cultivation of indigo has been given up this year.	
Jessore ...	1,872,000	1,191,000	300	300	25	75	...	...	...	The rain in May and June was beneficial to the plants: hence the better outturn.	
Gaya	3,015,680	2,207,800	100	100	50	100	514,592	1893 to 1895 and 1900 to 1903.	1	The break in the monsoon was favourable to the crop.	

District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate area sown last year (1905) in acres.	Estimated area sown this year (1906) in acres.	Taking 100 to represent the normal outturn how much represented the outturn last year (1905) ?	Taking 100 to represent the normal outturn how much will represent this year's outturn (1906) ?	Figures from the Cadastral Survey.			Remarks by District Officer.	Remarks by the Director of Agriculture, Bengal.
							Total area of the district has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under this crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12
							Acres.		Acres.		
Shahabad ...	2,190,720	1,642,500	490	700	79	91	...	...	...	The date of sowing was normal.	
Saran	1,711,360	1,367,500	15,000	11,200	90	60	1,633,635	1898 to 1901.	46,513	The cultivation of indigo in the Sadar subdivision is now comparatively rare, but in Gopalganj, where the greater portion of the area under the crop lies, the rain is said to have been seasonable, and with the timely break to have helped the growth of the crop. In Siwan, which stands next to Gopalganj in respect to the area under the crop, excessive rain in August damaged the second cuttings.	
Champaran ...	2,960,640	1,467,000	67,200	58,600	81	84	2,960,640	1898 to 1899.	93,000	The outturn is low owing to excessive rain and heavy floods.	The area in Column 4 has been revised by the Collector.
Muzaffarpur ...	1,942,027	1,937,000	54,000	32,700	80	35	1,942,400	1902-03 to 1903-09.	23,365		
Darbhanga ...	2,140,800	1,971,200	20,000	18,400	66	47	2,140,800	1895 to 1903.	23,109		

Monghyr ...	3,510,000	1,462,500	15,000	6,000	70	50	865,651	1860 to 1904.	17,785	Gandak floods and heavy rains destroyed second cuttings and have replaced the cotton.
Bhagalpur ...	3,794,658	2,372,912	5,000	1,100	70	30	889,902	1905 to 1906.	1,306	The decrease in the cotton is due to some damage caused by floods. Indigo was not grown in the Madhipura and Supaul subdivisions this year.
Purnea ...	3,108,132	1,554,066	20,833	11,450	70	20	...	...	...	The cotton has been reduced by excessive rain.
Koshi Purnea	3,360,000	1,546,800	600	600	60	75	3,573,028	1880 to 1903.	3,638	Owing to the factories at Dumka and Jamtara being closed, the area sown is very small. The low outturn is due to the crops being damaged by high floods.
Orissa ...	2,520,000	1,260,000	(10)	...	75	...	9,866,457	1895 to 1895 and 1901.	10	
North Bihar ...	10,302,790	7,072,000	138,700	117,300	45	45	...	...	...	...
Bengal, including other Bihar districts ...	24,207,577	13,650,000	33,640	50,800	67	65	...	...	...	...
Total ...	51,873,949	31,788,000	161,500	187,600	67	55	...	...	...	...

WEATHER AND CROP REPORT.

For the week ending the 24th December 1906.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	—	8½	Weather cold and seasonable. Harvesting of winter rice and sowing of *rabi* crops continuing. Sugarcane and potatoes flourishing. Small-pox rife in the Sadar subdivision. No cattle-disease. Fodder and water sufficient.
	BIRBHUM ...	Nil	9½*	9*	Harvesting of paddy continuing. Standing crops doing well. Old common rice selling at 8 seers a rupee. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	9	9	Weather seasonable. Harvesting of paddy continuing. Standing crops doing well. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	Nil	9	9	Weather seasonable. Outturn of sugarcane in Contai and Tamluk estimated at 75 per cent. Harvesting of winter rice continuing. Sowing of summer rice almost completed. Fodder and water sufficient. No cattle-disease.
5	HOOGHLY ...	Nil	8	8	Weather seasonable. Harvesting of winter rice continuing. Prospects of *rabi* crops, potato and sugarcane fair. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	8	8	Harvesting of winter rice nearly finished. Standing crops doing well. Common rice selling at 7½ seers a rupee at Ulubaria. Fodder and water-supply sufficient. No cattle-disease reported.
	24-PARGANAS	Nil	9*	8½	Weather seasonable. Harvesting of winter rice in progress. Condition of standing crops good. Prospects good. Condition of cattle good. Fodder and water sufficient.
8	NADIA ...	Nil	8	8	Prospects of standing crops good. Fodder and water sufficient.
	MURSHIDABAD	Nil	8½	8½	Weather seasonable. Harvesting of *aman* paddy and sugarcane continuing. Prospect of standing crops good. No cattle-disease. Fodder and water sufficient.
	JESSORE ...	Nil	8½	7 7/16	Sowing of *rabi* crops over. Harvesting of *aman* continuing. Condition of paddy fair. High prices and slight distress. Cholera in the interior. No cattle-disease. Fodder and water sufficient.

*New rice.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	8½	8½	Weather seasonable. State of *til* fair. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	Nil	9 13¼*	8½ 13½*	Weather cold with west wind. Standing crops doing well. Rain wanted for highland *rabi* crops. Pressing of sugarcane and harvesting of paddy in progress. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	Nil	9 11/16 13 12/16*	9 3/16 13 14/16*	Weather cold and clear. Harvesting of paddy and pressing of sugarcane continuing. *Rabi* crops doing well, but some rain wanted. No cattle-disease. Fodder and water for cattle sufficient.
14	SHAHABAD ...	Nil	10 13*	10½ 13*	Harvesting of paddy nearly finished, except in the Buxar Subdivision. *Rabi* crops doing well. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient. (Report received late.)
15	SARAN ...	Nil	9 12½*	9 12½*	Weather seasonable. Threshing of paddy, pressing of sugarcane and irrigation of *rabi* crops going on. Rain wanted for *rabi* crops. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	Nil	9 12½*	9½ 12½*	Weather cold. Harvesting and threshing of winter rice still continuing. Prospects of *rabi* crops good, but rain wanted. Imports in excess of exports during the week. Cattle-disease in Dhanaha. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	8 12½*	9 12½*	Weather seasonable at Sadar and Hajipur, but less cold than usual at Sitamarhi. Harvesting of paddy almost completed. Common rice and maize selling at 7½ and 12½ seers a rupee, respectively, at Sitamarhi, and 8 1/16 and 12 1/16 seers a rupee, respectively, at Hajipur. Average daily attendance at kitchens 1,118. Kitchens being gradually closed. Attendance at test-works on the 21st December 1906—Belsand 153, Sursand 45 and Rani Syedpur 110. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	6 1/16 12*	6 1/16 12*	Weather cold. Harvesting of paddy over. *Rabi* crops require rain. Number of persons on test-works in the Madhubani subdivision for the last day available—752 as against 16 of last week. Number of persons on relief works 34,559. Total number of persons gratuitously relieved, including village doles, 19,098. No cattle-disease. Fodder and water sufficient.

* The figures indicate price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.

		Inches.			
19	Monghyr ...	Nil	$8\frac{1}{2}$ $11\frac{1}{4}$*	$8\frac{1}{2}$ $11\frac{1}{4}$*	Weather seasonable. Harvesting of paddy and sugarcane crops going on. *Rabi* crops doing well, but rain wanted generally. Cattle-disease reported from thana Surajgarha. Fodder and water sufficient.
20	Bhagalpur ...	Nil	$9\frac{1}{2}$ 11*	$9\frac{1}{2}$ 12*	Weather seasonable. Harvesting of winter rice continuing. Pressing of sugarcane going on. *Rabi* crops doing well; more rain wanted. Cattle-disease reported from a village in thana Madhipura. Fodder and water sufficient.
21	Purnea ...	Nil	7	7	Weather seasonable. Harvesting of winter paddy continuing. Rain needed still at Araria for *rabi* crops. Sugarcane doing well and being cut and pressed in places. Common rice selling at 7 and $6\frac{3}{4}$ seers a rupee at Kishanganj and Araria respectively. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	Nil	7 11*	7 12*	Weather cold. Hills—Wheat, barley and mustard in fair condition. Winter and autumn rice and *marua* being harvested. Terai—Reaping of winter rice going on. Mustard and tobacco doing well.
23	Santhal Parganas.	Nil	11 $14\frac{1}{2}$*	$10\frac{4}{11}$ $14\frac{1}{2}$*	Weather seasonable. Harvesting of winter rice continuing. Standing crops doing well. Cattle-disease reported from the Sadar, Jamtara and Pakour subdivisions. Fodder and water sufficient. Report from Deoghar not received.
24	Cuttack ...	Nil	$11\frac{1}{2}$	$11\frac{1}{2}$	*Laghu sarad* and sugarcane being harvested. *Guru sarad* ripening. Tobacco growing well. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	10	10	Weather seasonable. Harvesting of *sarad* continuing. Sugarcane, *rabi* crops and vegetables doing well. Locusts reported from thanas Chandbali and Dhamnagar. Extent of damage not known. No cattle-disease. Fodder and water sufficient.
26	Angul ...	Nil	$11\frac{1}{2}$	$11\frac{1}{2}$	Weather seasonable. Harvesting of winter rice nearly finished. *Rabi* crops, sugarcane and other miscellaneous crops doing well. No cattle-disease. Fodder and water sufficient.
27	Puri ...	Nil	$10\frac{1}{2}$	$10\frac{1}{2}$	Weather seasonable. *Laghu* paddy being harvested. *Sarad* being reaped. Pressing of sugarcane continuing. *Mung* being sown. Other *rabi* crops getting on well. *Arhar* and mustard flowering. Cattle-disease reported from Khurda and Bhubaneswar. Fodder and water-supply sufficient.
28	Sambalpur ...	Nil	$11\frac{1}{2}$	$11\frac{1}{2}$	Weather cool with occasional clouds. Threshing of winter and autumn rice in progress. Harvesting of *maghi til* and *kulthi* completed and of *mung* and mustard in progress. Outturn of *maghi til* estimated at 14 to 16 annas and of winter rice 12 to 14 annas in the Sambalpur tahsil. Cattle-disease reported from two villages in Sambalpur tahsil. Fodder sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	HAZARIBAGH	—	9½	9½	Prospects of standing crops good. Harvesting of paddy and sugarcane-pressing going on. Fodder and water sufficient.
30	RANCHI ...	Nil	11	11	Threshing of *sirguja* continuing. Standing crops doing well. Cattle-disease reported from one thana. Fodder and water sufficient.
31	PALAMAU ...	Nil	9½	9 5/16	Weather seasonable. Harvesting of paddy still going on. Rain wanted for *rabi* crops. Cattle-disease reported from one thana. Fodder and water sufficient.
32	MANBHUM ...	Nil	10	10	Weather seasonable. Prospects of cotton fair; of other crops good. Fodder and water sufficient. Cattle-disease reported from one thana.
33	SINGHBHUM ...	Nil	9	9	Harvesting of winter paddy going on. Common rice selling at 11 seers a rupee at Kharsawan and at 12 seers a rupee at Seraikella. Fodder and water sufficient.
34	COOCH BEHAR	Nil	7½	6½	Weather seasonable. Harvesting of *aman* paddy continuing. Fodder and water sufficient.

GENERAL SUMMARY.—There was no rain in province during the week. Harvesting of winter rice is still going on. Pressing of sugarcane continues in Bihar and Orissa. *Rabi* crops are doing well, but rain is still wanted for them in many districts of Bihar. A flight of locusts passed through Balasore. The number of persons receiving gratuitous relief is—Muzaffarpur 1,118, Darbhanga 19,098. The number of persons on test-works is—Muzaffarpur 313, Darbhanga 752. The number on relief works in Darbhanga is 31,559. Cattle-disease is reported from nine districts. Fodder and water are sufficient. Cholera continues in parts of Jessore and small-pox in Burdwan. The price of common rice has risen in three and fallen in seven districts.

1	2	3	4	5	6
		Inches.			
29	HAZARIBAGH	—	9	9½	Prospects of standing crops good. Sugarcane-pressing going on. Fodder and water sufficient.
30	RANCHI ...	0·04	11	11	Weather rather cloudy. Threshing of *sirguja* continuing. State of *rabi* crops good. No cattle-disease. Fodder and water sufficient.
31	PALAMAU ...	Nil	9½	9½	Weather seasonable. Harvesting of paddy approaching completion. *Rabi* crops doing well. A few cases of cattle-disease reported. Fodder and water sufficient.
32	MANBHUM ...	Nil	10	10	Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient.
33	SINGHBHUM ...	0·21	9	9	Harvesting of winter paddy going on. Common rice selling at 14 seers a rupee at Kharsawan and at 12 seers a rupee at Seraikella. Fodder and water sufficient.
34	COOCH BEHAR	Nil	7½	7½	Weather seasonable. No cattle-disease. Fodder and water sufficient.

GENERAL SUMMARY.—Rain is reported from Bankura, Angul, Puri, Sambalpur, Ranchi and Singhbhum, the fall being light except in Angul and Singhbhum, where it was moderate. Harvesting of *aman* paddy is still going on. Pressing of sugarcane continues. The *rabi* crops are doing well, but rain is needed for them in the Patna and Bhagalpur Divisions. The number of persons receiving gratuitous relief is—Muzaffarpur 919 and Darbhanga 15,847. The number of persons on test-works is—Muzaffarpur 130, and Darbhanga 1,449. The number on relief works in Darbhanga is 32,437. Cattle-disease is reported from two districts. Cholera and a severe type of malaria are reported from Jessore. The price of common rice has risen in three and fallen in six districts.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 16th to 22nd December 1906	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 22nd December 1906	57·19
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·35

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

&c., dew.

Total for corresponding 24½ weeks of previous year	10,271,872	1,03,90,477 12 7	14,39,31,334 0	2,38,84,856 12 1	7,41,742 1 0	3,50,17,074 13 8	3,066,930	4,029,841	7,096,77[illegible]

(a) The decrease is chiefly due to the Royal visit to India, and to greater movements of pilgrims in 1905.
(b) The increase is in general merchandise.
* Added No. of passengers 29,110 and deducted Rs. 7,098 } On account of difference between the approximate and audited figures for the week ended 3rd November
† Deduct Mds. 2,41,955 and added ,, 32,106 } 1906.
‡ Added ,, 7,237
‖ Audited figures up to 3rd November 1906.

1 06. *Abstract of progressive weekly returns of all earnings for 1906 in comparison with 1905.*

Total ...	2,12,219	2,25,413	1,93,607	1,94,037	1,96,707	1,72,910	1,88,100	1,79,375
Surplus ...	11,166	Nil.	...	...	...	...	...	...
GRAND TOTAL ...	2,23,379	2,25,413	1,93,607	1,94,037	1,96,707	1,72,910	1,88,100	1,79,375

2. The income of the year amounted to Rs. 2,23,380 as against Rs. 1,90,977 and the expenditure to Rs. 1,77,777 against Rs. 2,25,413 in the previous year, leaving a surplus of Rs. 45,603 as compared with a deficit of Rs. 34,436 in 1904-05. These figures exclude the advance of Rs. 34,436 made in 1904-05 from the Bridge Reserve Fund to Revenue Account to meet the deficit which occurred in that year and which has been repaid in 1905-06. During the year under review there is a decrease of Rs. 4,595 in the outlay under Stores which is accounted for by the fact that in 1904-05, the ferry steamers were new and many articles of a miscellaneous character had to be issued in order to complete their equipment. The decrease in expenditure on repairs is owing partly to the fact that a large sum had to be spent in 1904-05 in repairing the ferry steamers which met with accidents. The outlay in 1904-05 had also been unduly inflated by payments for work done in 1903-04.

3. The bridge was opened for the passage of vessels on 155 occasions during the year under review, of which 103 were on the ordinary fixed days of the week (Tuesdays and Fridays), and 52 were on Sundays, on special application. The number of vessels which passed through the bridge was the highest on record, the increase being in inland vessels, flats and tugs. The following statement shows the numbers that have passed through since 1895-96:—

	1905-1906.	1904-1905.	1903-1904.	1902-1903.	1901-1902.	1900-1901.	1899-1900.	1898-1899.	1897-1898.	1896-1897.	1895-1896.

Port Commissioners' vessels	142	114	100	110	125	143	218	80	90	53	95
Government steamers and flats	5	5	3	3	6	11	13	...	1	9	1
Total ...	2,846	2,812	2,594	2,450	2,414	2,417	2,442	2,255	2,273	1,962	2,030

4. One sea-going vessel collided with the bridge during the year under review and the total number of accidents in the year was 28 as compared with 34, 67, 59, 135 and 233 in the preceding five years. The accidents to cargo and passenger boats were 21 as against 31 in 1904-05. In one accident the steam launch "Noor" was lost and one of her crew drowned and in other accidents seven boats were lost.

By order of the Lieutenant-Governor of Bengal,

W. A. INGLIS,

Secretary.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL (EXCEPT CALCUTTA) DURING THE YEAR 1905-06.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 28th December 1906.

RESOLUTION—No. 2469M.

READ—

The Reports from the Commissioners of Divisions on the working of Municipalities in Bengal (except Calcutta) during the year 1905-06.

READ again—

The Resolution reviewing the Divisional Commissioners' Reports on the working of Municipalities during the year 1904-05.

One new Municipality was created during the year 1905-06, viz., at Katihar, in the district of Purnea. The Sambalpur Municipality was transferred to Bengal from the Central Provinces, while 35 Municipalities were transferred to the jurisdiction of the new Province of Eastern Bengal and Assam. The present Resolution therefore deals with the statistics of 128 Municipalities, and compares them with the statistics of 126 Municipalities of the previous year.

2. *Collections.*—The high standard of collections noticed in the last Resolution was maintained during the year under review. Although, owing to the steady reduction of realisable arrears, the percentage of total collections on current demand fell from 97·4 to 96·4, the percentage of current collections on current demand rose from 93·0 to 93·7, the lowest percentage, viz., 92·5, being attained in the Patna Division. The percentage of total remissions on current demand fell in the aggregate from 4·6 to 4·2, the highest figure being returned from the Bhagalpur Division where it rose from 3·6 in 1904-05 to 7·3. The increase in that Division is mainly due to the large remissions allowed at Monghyr and Bhagalpur, owing it is said to the prevalence of plague in those places. In the Burdwan Division the remissions fell from 8·5 per cent. to 5·7 per cent. With an increase of Rs. 1,17,810 in the current demand, and a falling off in the total remissions, the total outstanding balance at the close of the year for all the municipalities was reduced from Rs. 1,98,929 in 1904-1905 to Rs. 1,78,944. Thirteen Municipalities collected cent. per cent. on the current demand or more, whilst in 19 there was either no outstanding balance or a balance of less than Rs. 10 only. Both these results were obtained in the Municipalities of North Dum-Dum and Garulia. The Daudnagar Municipality realised 112·2 per cent. of its current demand, and with a remission of ·1 per cent. on the demand had an outstanding balance of only Rs. 12.

3. *Number of Rate-payers.*—The total number of rate-payers was 407,961, and the percentage to population 17·3 against 17·2 in 1904-1905. As in the previous year, the percentage was highest at Katwa (30·8) and lowest (7·3) in the Municipality of Titagarh where there is a large migratory population of mill-hands.

4. *Results of Elections held during the year.*—General elections were held during the year in 40 Municipalities. In one of the wards of the Sasaram Municipality, where the elections were contested, all the persons qualified to vote were present at the poll and recorded their votes. In the other contested elections the attendance of voters ranged between 83·7 per cent. in a ward of the Vishnupur Municipality and 1·2 in one of the wards of the Jagadispur Municipality. The elections failed in certain wards of four Municipalities only—Arrah, Hajipur, Cuttack and Hazaribagh.

5. *Constitution of Committees and attendance at Meetings.*—The total number of Commissioners was 1,745 against 1,718 in the previous year, the increase being due to the creation of the Katihar Municipality and to the transfer to Bengal of the Sambalpur Municipality. The number of meetings held

was 2,138, of which 177 were adjourned; against 2,189 meetings held in 1904-05, of which 153 were adjourned. The Cossipore-Chitpur and Kalna Municipalities held the largest number of meetings (49). Thirteen Municipalities failed to hold one meeting a month, and at Jamalpur and Chaibassa only 7 meetings were held. The average attendance at meetings was practically the same as in the previous year, though the number of Municipalities in which it amounted to one-half rose from 89 to 93. The average attendance was highest in the new Municipality of Katihar (81·8), and exceeded three-fourths of the number of Commissioners at Asansol and Bihar. The lowest figure is returned from Giridih where the average attendance was only 27·0 per. cent.

6. *Assessment and Taxation.*—The rate on holdings was levied in the new Municipality of Katihar from the beginning of the current year. This method of taxation was substituted for the alternative tax on persons in the Municipalities of Purulia, Cuttack, Garulia, Bhatpara and Kotrung, and is now in force in 49 Municipalities and in certain wards of the Bhadreswar, South Dum-Dum, Deoghur, Bettiah and Darbhanga Municipalities, the tax on persons being levied elsewhere. There are now therefore only six Municipalities with a population exceeding 20,000, viz., Bankura, Berhampore, Bihar, Arrah, Sasaram and Balasore, in which the tax on persons continues to be levied. During the year an effort was made to introduce the rate on holdings in all the wards of the Darbhanga Municipality, but it is reported that the experimental valuation which was made showed that its general introduction would entail a loss of income. The Commissioner of the Division is not, however, convinced that the system of taxing persons, which is liable to error, as opposed to the tax on actual visible property, is suited to rising towns like Arrah and Darbhanga, and he has promised to examine the matter further. The change seems desirable at Arrah where both the water and the latrine rates are in force and are levied on the annual value of holdings. The latrine rate was levied in 88 towns, the water rate in 13, and the lighting rate in 2. The levy of a lighting rate which was sanctioned in the previous year could not be enforced during the year at Maniktala and Cossipore-Chitpur. In 16 towns the rate on holdings was levied at less than the maximum, but the gradual rise in the average incidence of taxation per head of population, which was noticed in the last Resolution, was maintained during the year, the figures showing an increase of ten pies. The highest incidence of taxation (Rs. 8-5-10) was attained in the hill municipality of Darjeeling. Among the Municipalities in the plains, Sambalpur returned the highest figure, viz., Rs. 3-12-7, and Ramjibanpur, in the district of Midnapore, the lowest, annas 4-3. In 20 other towns the incidence of taxation was less than eight annas per head.

7. *Revision of Assessment.*—General or partial revisions of assessment were made in several Municipalities during the year. The revision of assessments at Howrah resulted in a total increase of Rs. 20,171 in the demand for the house, lighting, latrine and water rates. The assessments were revised by paid assessors in several Municipalities, and the results were on the whole fairly satisfactory; but in Baduria the good result achieved by the assessor was, it is reported, rendered futile by the interference of the appellate committee, by whom the increase of 21·4 per cent. was reduced to 8·1 per cent. A considerable increase of income was obtained in the following towns:—

Name of Municipality.	Amount of increase.
	Rs.
Maniktala	11,635
Monghyr	9,739
Bhatpara	8,564
Cossipore-Chitpur	4,570
Purulia	4,509
Naihati	3,502
Patna	3,137

8. *Fresh imposts levied during the year.*—The tax on carriages and on animals was introduced at Kotrung, Santipur and Ranaghat; and the market regulations under Part X of the Municipal Act were enforced in the Municipalities of Vishnupur and Baraset, and in Ward IV of the Halishahar Municipality. License fees were for the first time levied on the storage of kerosine oil and on tanneries in Bankura, on dealers in kerosine oil at

Barnipur, and on meat shops at Titagarh. The provisions of Part IX of the Act were enforced at Azimganj and Sitamarhi, in the added area of the Garden Reach Municipality, and in certain selected parts of the Kishenganj, Motihari and Darbhanga Municipalities.

9. *Income and Expenditure.*—The total income of the Municipalities, including the opening balance, was Rs. 57,25,680, or an increase of Rs. 1,95,236 over that of the previous year. The total expenditure was Rs. 47,83,368 against Rs. 47,78,202 in 1904-1905.

10. *Closing balances of Municipalities.*—The aggregate closing balances rose from Rs. 7,52,242 in the preceding year to Rs. 9,42,312. The inclusion of unspent loans or grants from Government accounts for the comparatively large balances shown in some towns, as in Maniktala (Rs. 1,23,615), Bhagalpur (Rs. 68,749) and Titagarh (Rs. 35,263).

Most municipalities maintained a sufficient closing balance; but at Meherpur the closing balance is shown as only Rs. 196, at Debhatta only Rs. 33 were reserved to form the balance, and at Buxar only Rs. 19. The attention of the Divisional Commissioners is invited to these cases.

11. *Income (Rs. 49,67,128).*—The steady growth of Municipal income referred to in the last Resolution continued during the year. Excluding the income of the newly added municipality of Sambalpur (Rs. 60,702), there was an improvement of Rs. 1,31,153, accompanied by a large decrease of Rs. 1,61,965 under "Extraordinary and Debt." The net increase was thus Rs. 2,93,118, or 6 per cent., of which about a lakh accrued under Municipal rates and taxes. The general increase was shared by all the Divisions, but as might be expected it was largest in the Presidency Division where it amounted to Rs. 1,64,332.

12. *Octroi Tax (Rs. 47,417).*—This tax is levied only in the Sambalpur Municipality, which has been recently transferred to this Province. The gross income from this source shows an increase of Rs. 5,805, whilst the net income after the payment of refunds amounted to Rs. 27,901 against Rs. 25,659 in 1904-1905.

13. *Tax on Houses and Lands (Rs. 11,72,795).*—The revenue from this source increased by Rs. 63,768. The tax is not levied in Sambalpur, nor was it levied during the year at Katihar; and the increase is due mainly to the substitution of this form of taxation for the tax on persons in the five Municipalities mentioned in paragraph 6 above. The Municipalities in which the increase under this head was most marked as compared with the previous year were Cossipore-Chitpur (Rs. 3,416) and Maniktala (Rs. 4,787), these results being due to revision of assessment. On the other hand there was a falling off at Monghyr (Rs. 3,467) and Bhagalpur (Rs. 2,917), ascribed to the prevalence of plague. The increase at Sahebganj (Rs. 4,207) was due to the payment of arrears by the East Indian Railway Company, and similarly the apparent decline of Rs. 10,667 at Bally was due to the fact that in the previous year large arrears had been collected from the Company.

14. *Tax on Animals and Vehicles (Rs. 2,24,073).*—The receipts under this head rose by Rs. 2,475, the largest increase occurring in the Municipality of Kishanganj where it rose from Rs. 611 in 1904-1905 to Rs. 3,144. No explanation has been given of this remarkable increase, but the Commissioner considers that it is probably due to the appointment of a special staff for the realization of fees from outside carts and ponies habitually plying within Municipal limits. The Commissioner will be asked to satisfy himself that the tax is being properly administered in this Municipality without undue hardship to persons whose carts only occasionally visit the Municipality. There were also marked increases in the Municipalities of Cuttack (Rs. 1,480) and Barasat (Rs. 1,132), whilst there was a falling off (Rs. 1,107) at Darbhanga. Inspecting officers should continue to see that the law on the subject of the registration of carts is not oppressively exercised by Municipalities.

15. *Tax on Professions and Trades (Rs. 58,954).*—The income from this minor item of Municipal revenue declined by Rs. 1,020 as compared with the previous year. The tax was levied in all the Municipalities, except four, viz., Debhatta, Kurseong, Jhalda and Raghunathpur.

16. *Tolls on Roads and at Ferries* (*Rs. 93,488*).—Excluding the income from this head in the Sambalpur Municipality (Rs. 2,485), the revenue shows an aggregate decline of Rs. 4,056. Tolls on roads are levied only in the Municipality of Sambalpur. The decrease in the income from ferries occurred mostly in the Municipalities of Patna (Rs. 5,665), Muzaffarpur (Rs. 3,408) and Burdwan (Rs. 1,701). The decline at Patna was due to a concession having been granted to the Bengal and North-Western Railway Company to run a ferry service for the convenience of the passengers travelling by that line, whilst at Muzaffarpur heavy floods interfered with the traffic. The resettlement of ferries at lower rates accounts for the decline at Burdwan.

17. *Water-rate* (*Rs. 2,98,646*).—The total revenue shows an increase of Rs. 31,868. There were marked increases at Howrah (Rs. 2,576), Maniktala (Rs. 2,140) and Arrah (Rs. 4,011). Better collections at Howrah and a revision of assessment at Maniktala account for the improvements in those places. The increase at Arrah is not accounted for. A decrease of Rs. 1,756 at Bhagalpur was due to the prevalence of plague in that town.

18. *Lighting-rate* (*Rs. 94,244*).—This rate was levied only in two towns, viz., Howrah and Darjeeling, as in the previous year, and yielded an increase of Rs. 6,936, of which Rs. 6,084 occurred in Darjeeling. This was due to the extension of electric connections with private buildings.

19. *Conservancy, including Scavenging and Latrine-rate* (*Rs. 7,08,870*).—There was an improvement of revenue of Rs. 43,840, which was shared more or less by all the Divisions except Bhagalpur, the largest increase occurring in the Municipalities of Howrah (Rs. 12,268) and Cossipore-Chitpur (Rs. 7,453). The general increase is ascribed to the enforcement of the tax in new areas and on new and improved holdings, and also to better collections; but it is a matter for regret that no progress has been made by Municipalities in rendering their systems of sewage disposal remunerative, and that only in the Cossipore-Chitpur Municipality was any revenue derived from the trenching grounds.

20. *Tax on Persons according to their circumstances and property* (*Rs. 3,89,118*).—There was a decrease in the revenue of Rs. 43,137, due to the substitution in five Municipalities of the tax on holdings for this form of taxation. The total revenues under these two heads shows an improvement of Rs. 20,631 as compared with the previous year.

21. *Grants from Provincial and Local Funds, and contributions from Private Individuals* (*Rs. 4,21,090*).—The increase of Rs. 29,600 is accounted for by larger grants from Government for general purposes, and from local funds for medical purposes. The total contributions for general purposes amounted to Rs. 1,51,906, for education to Rs. 9,562, and for medical to Rs. 2,59,622.

22. *Gifts, etc., by Private Individuals.*—Many instances of private liberality are brought to notice in the reports of the Commissioners, which have already been acknowledged in a separate Resolution. The most prominent of the public benefactors during the year were Rai Sitab Chand Nahar Bahadur, who contributed Rs. 7,000 towards the cost of works for the protection of the town of Azimganj from the Bhagirathi river; Babu Lal Dhari Singh and his brother, zamindars of Dinapore, who contributed Rs. 5,000 for the construction of a building for the Dinapore Charitable Dispensary; and Mr. Solano of Arwal who contributed Rs. 4,500 for the construction of an infectious diseases ward in the Gaya Cholera Hospital.

23. *Expenditure.*—The aggregate expenditure of the Municipalities in Bengal amounted to Rs. 47,83,368, against Rs. 47,78,202 in 1904-05. The ordinary expenditure (*i.e.*, excluding repayment of loans, advances, deposits, etc.), which amounted to Rs. 39,48,665, shows a slight falling off.

24. *Office and Collection Establishment* (*Rs. 3,65,044*).—Excluding the Sambalpur Municipality, the aggregate expenditure on this account shows a small increase of Rs. 3,817, and as in the previous year represented about one-tenth of the total ordinary expenditure. The expenditure rose in the Orissa Division from 9·9 per cent. of the total expenditure to 11·2 per cent., and in the other Divisions the percentage was practically stationary. The highest percentage (24·9) was incurred in the small Municipality of Debhatta in the 24-Parganas, and the lowest 4·3 in the Sitamarhi Municipality.

25. *Prevention of Fire* (*Rs. 25,712*).—Of the total expenditure under this head, Rs. 24,500 is contributed by the four Municipalities of Howrah, Cossipore-

Chitpur, Maniktala and Garden Reach, this sum representing their contribution to the up-keep of the Metropolitan Fire-Brigade. The charges in the rest of the Province were trifling. Towards the close of the year, the Commissioners of the Darjeeling Municipality organized a fire-brigade at a cost of Rs. 21,444, one-half of which was paid by Government.

26. *Lighting* (*Rs. 2,46,146*).—The total expenditure shows a decrease of Rs. 41,836, which is accounted for by a reduction of Rs. 49,510 in the capital expenditure on the electric installation at Darjeeling. In the Howrah Municipality the expenditure rose by Rs. 5,702, owing to the payment of arrears due to the Gas Company. In the rest of the Province the charge was almost stationary.

27. *Water-supply* (*Rs. 2,48,049*).—The Sanitary Board have reported generally that the management of the Water-works in those Municipalities which maintain complete installations has been satisfactory. In Howrah, the high level of efficiency which has always been noticeable was maintained, the daily average quantity of filtered water delivered from the Water-works having increased from 1,724,000 gallons to 1,923,000 gallons. The number of house connections is now 3,796, and the total length of the distribution pipes has been increased by 2,459 feet. The management of the Burdwan Water-works was also efficient, and the Commissioner reports that the members of the Water-works Sub-Committee take great interest in the works. Out of a population of 38,000, only 18,009 are at present supplied with pipe-water, the daily consumption being 10·52 gallons per head. At Arrah, in spite of the difficulties arising from the recession of the river from the intake, a constant supply of water was maintained throughout the year. The management of the Water-works at Berhampore shows some improvement. The supply of water was well maintained, the average daily supply per head being a little under 8 gallons. The expenditure on account of maintenance and capital charges exceeded by Rs. 4,804 the revenue derived from the water-rate, although this is levied at the maximum rate, and the total deficit up to date is about Rs. 15,000. The assertion that the introduction of a filtered water-supply has produced no effect on the mortality of the town, is one that should be carefully examined by the Sanitary Commissioner. The difficulties attending the management of the Bhagalpur Water-works still exist. It has now been decided, after exhaustive enquiries by the Engineering and Sanitary advisers of Government, to replace the existing pumping plant by Diesel oil engines, and to carry out other improvements, which will it is hoped secure a constant and adequate supply of filtered water at all times of the year. Government has made a large grant towards the cost of these improvements. The hill towns of Darjeeling and Kurseong are fortunate in being able to secure supplies of comparatively pure water from springs in the locality. As however it is impossible efficiently to guard the catchment area from all chances of pollution, it is essential that the supply should be filtered, and it has now been decided that the existing settling tanks at Darjeeling should be converted into filters and that arrangements are to be made for the filtration of the water-supply at Kurseong. A small installation after the Faridpur pattern for the improvement of the water-supply has been completed at Khulna, and at Jessore and Gaya more ambitious projects are at present under consideration.

28. *Drainage* (*Rs. 1,60,065*).—There was a decrease of Rs. 10,851 in the expenditure, which is accounted for by a fall of Rs. 14,917 under capital expenditure. At Howrah, the execution of Block II of the Sibpur Drainage scheme was completed during the year, and the construction of drains for the Southern Foreshore area was commenced. A scheme for the surface drainage of the Northern Foreshore section, at an estimated cost of about 1½ lakhs, is also under the consideration of the Commissioners. Towards the close of the year a scheme for the drainage of the Titagarh Municipality, at an estimated cost of Rs. 39,411, was sanctioned by Government. To meet the cost of this project, the Commissioners have taken a loan of Rs. 55,000, which will be supplemented by a contribution of Rs. 15,000 from the local mills, the balance of Rs. 10,000 being met by a grant from Government. A comprehensive scheme for the drainage of the Cossipore-Chitpur Municipality was submitted during the year, and is now being revised under

the instructions of Government. The question of the drainage of Puri has long been under the consideration of Government, and during the year a Committee was appointed, with the Commissioner of the Orissa Division as President, to consider the scheme prepared by the Sanitary Board for the improvement of the drainage of that town. The Committee submitted its report, in which the probable cost of the works to be taken up at once was estimated at Rs. 1,70,000. The scheme as modified by the Committee has received administrative approval, and Government has undertaken to assist the Municipality in carrying it out The detailed plans and estimates are now under preparation. The creation of the appointment of an Assistant Sanitary Engineer to supervise the preparation of schemes for drainage and water-supply has received the sanction of the Secretary of State, and it is hoped that Municipalities will derive much benefit from the advice and assistance of this officer. It is of the greatest importance that, before incurring expenditure on the preparation of such schemes, the Municipal authorities should consult the sanitary advisers of Government, as past experience has shown that great waste of time and money may occur in the preparation of unsuitable and ill-considered projects.

29. *Conservancy, including Road-cleaning and Road-watering and Latrines (Rs. 11,70,206).*—The expenditure on this important municipal service rose in all the Divisions. The increase was marked in the Burdwan, Presidency and Patna Divisions, where it amounted to Rs. 36,502, Rs. 14,797 and Rs. 11,921, respectively. The Municipality of Howrah spent Rs. 35.170 on the strengthening of the conservancy establishment and the purchase of carts and wheel-barrows. There has been no extension of the bacteriological method of night-soil disposal, and the only Municipalities in which septic tanks maintained by the Commissioners are at present in use are Howrah and Muzaffarpur. It is reported that the four biological filters established in the former Municipality for the disposal of liquid sewage continued to work satisfactorily. The important hill station of Darjeeling is one in which the advantages of a system of septic tanks for the disposal of sewage should be very great. Such a scheme has now been prepared by Captain Clemesha, late Officiating Sanitary Commissioner, and will it is anticipated be adopted by the Municipality. At Howrah, the work of opening out insanitary *bustees* was pushed on vigorously, and additional surveyors were employed to prepare the necessary plans. In his report for 1905, the Sanitary Commissioner writes that the conservancy arrangements in Municipalities are also gradually improving. Old insanitary latrines are being replaced by new ones of better type, in many places glazed stone-ware latrine seats are being brought into use, and almost all the Municipalities now use proper trenching grounds.

30. *Hospitals and Dispensaries (Rs. 4,24,962).*—The expenditure shows an increase of Rs. 70,081. Deducting the contributions from Government and other sources, and the interest on investments for Medical purposes, as also the income from "fees and revenue from Medical institutions," the total net expenditure on hospitals and dispensaries and plague charges amounted to Rs. 2,21,650, or about 4·2 per cent. of the total Municipal revenue of the year. According to the annual Dispensary Report for the calendar year 1905 the net grant from Municipal funds was Rs. 1,89,696. This amount evidently excludes the charges on account of plague incurred by the Municipalities.

31. *Vaccination (Rs. 19,198).*—The expenditure shows a slight increase. Deducting from the total number of births registered the number of children under one year who died during the year, the total number of children under one year available for vaccination was 46,094, of whom 43,292 or about 94 per cent. were successfully vaccinated.

32. *Markets and Slaughter-houses (Rs. 60,593).*—The expenditure rose by Rs. 20,428 as compared with the previous year. The increase occurred in the Patna (Rs. 14,821) and Orissa (Rs. 13,134) Divisions. The construction of new markets at Chapra and Sitamarhi accounts for the increase in the former Division; and in the latter the Puri Municipality acquired lands for a Municipal market and put up some *kutcha* shops. The plan for a new market in the Patna Municipality has been approved, and the work will be taken in hand

during the current year. The necessity for preventing the spread of disease through the public food-supply received continued attention during the year.

33. *Public Works (Rs. 6,38,318).*—The expenditure on public works shows a decrease of Rs. 2,09,185, which is more than accounted for by the contribution of 2½ lakhs of rupees made by the Howrah Municipality in 1904-1905 to the East Indian Railway Company for strengthening a bridge.

34. *Public Instruction (Rs. 1,31,907).*—The expenditure on education increased by Rs. 12,321. The total expenditure on primary education rose from Rs. 65,987 to Rs. 73,929, which represents 3·0 per cent. of the ordinary income of the Municipalities against 2·8 in the previous year. The percentage was highest in the Orissa Division (3·68) and lowest in the Burdwan Division (2·3) as in the previous year. The prescribed standard of 3·2 per cent. is fairly approximated in the aggregate, but it was largely exceeded in many of the small towns, rising as high as 48·7 per cent. in Khulna where large expenditure was incurred on primary school buildings. At Ranjibanpur, in the Midnapore District, the percentage stood at 10·4.

35. *Loans.*—Thirty-one Municipalities were in debt at the close of the year; and if the sum of Rs. 1,57,093 on account of the accumulated balances of the sinking funds of the Burdwan, Howrah and Bhagalpur Municipalities for the repayment of their debenture loans is excluded, the total net indebtedness amounted to Rs. 34,60,414. Of this sum, the loan liabilities of the Howrah Municipality alone account for Rs. 18,94,790. Nine new loans were granted during the year, aggregating Rs. 3,81,000, of which Howrah drew Rs. 1,00,000 for drainage purposes, and Rs. 60,000 and Rs. 50,000 for an additional filtered water reservoir and for the extension of the water-works in that town. For the extension or improvement of water-supply, Maniktala received Rs. 1,00,000, South Barrackpore Rs. 4,000, Khulna Rs. 8,000, Berhampore Rs. 6,000 and Darjeeling Rs. 33,000. Titagarh received Rs. 20,000, being the first instalment of a loan of Rs. 55,000 for drainage works.

On the 31st March 1906, the total outstanding liabilities of all the Municipalities on account of unpaid bills and unfinished works stood at Rs. 1,51,101, which is more than 10 per cent. of the closing balances and 5 per cent. of the current demand. In four Municipalities the liabilities exceeded the closing balances, and in six they exceeded 15 per cent. of the current demand. More attention should be paid to the prompt payment of all liabilities as they fall due.

The Municipalities in debt to Government paid the interest and instalments of their loans in full, with two exceptions. The Commissioners of the South Suburban Municipality were unable to levy the water-rate, owing to the insufficiency of the water supplied from the Calcutta mains, and were therefore allowed to postpone the repayment of the principal. Arrangements are being made to increase the supply of water, when the full amount of water-rate will be levied and the Municipality will be in a position to pay the instalments of the loan as these fall due. At Utterpara, owing to delay in obtaining sanction to its drainage scheme, the Municipality was unable to utilize the loan that was granted for the purpose, and was allowed to defer payment of the instalments until the scheme was finally sanctioned. The financial embarrassments of the Berhampore Municipality, which were described at length in the last Resolution, continued during the year under review; but an improvement is expected with an increased assessment and greater economy. The Commissioner of the Bhagalpur Division reports that the Darjeeling Municipality incurred heavy charges in disregard of the sanctioned budget, and that, if this irregularity were to continue, the Municipality might any day find itself unable to pay its way. A separate enquiry is being made in the matter, but there is no apprehension as to the solvency of the Municipality, since the rate on holdings was levied only at 7 per cent. on their value against the legal maximum of 10 per cent.

36. *Audit of Accounts and Embezzlements.*—Only three cases of embezzlement were reported during the year. They do not call for special notice.

37. *Working of the Porters and Dandiwallas Act.*—This Act was in force in the Municipalities of Darjeeling and Kurseong. There was a large increase in the number of porters and *dandiwallas* registered in Darjeeling. There was

however only one prosecution against 40 in the previous year. At Kurseong there were 4 prosecutions. No licenses were cancelled during the year in either town.

38. It is usual in this Resolution to take special notice of the administration of the Howrah Municipality. The high standard of efficiency recorded in past years has been satisfactorily maintained, the Collection Department in particular having continued to work well. The percentage of the total collections to the current demand is practically the same as that of the previous year, the slight drop from 97·8 to 97·5 being due to a decrease in the arrear collections. The outstanding balance has been reduced from Rs. 24,539 in 1904-1905 to Rs. 9,090, nearly half of which consists of arrears for 1905-1906. Out of a total demand of Rs. 5,89,000, Rs. 5,51,000 was collected, the percentage being 93·5 as compared with 87·6 in the previous year. It is especially satisfactory to observe that the income from fines fell from Rs. 16,300 to Rs. 8,800. The Chairman reports that in former years the procedure preliminary to prosecution gave opportunities for black-mail and oppression by subordinates, and that in many cases the fines inflicted were so excessive as to weigh heavily on the persons fined. To remedy the discontent caused among the rate-payers by this state of affairs, the Commissioners have decided that no prosecution shall be instituted without full enquiry by an officer of superior rank. Arrangements have also been made to have such cases tried by Honorary Magistrates. Of all the branches of the administration perhaps the most noticeable for its efficiency is the Water-works. The Sanitary Board have expressed their appreciation of the careful manner in which these have been looked after, and their high state of efficiency. During the year the construction works of Block II of the Sibpur Drainage scheme were entirely completed. The Sanitary Engineer frequently inspected the works, and has stated in his final report that the work appears to have been exceedingly well and carefully carried out. Detailed plans and estimates for the construction of *pucca* drains in Block IV of the South Foreshore scheme were prepared during the year, and received the sanction of Government after its close. Schemes for the drainage of the Northern Foreshore section of the town and for the Central section are at present under the consideration of the Commissioners, and when these portions are ready the whole project will be complete. With the completion of the drainage system and the ultimate connecting up of all the houses of the town with the *pucca* drains, a steady improvement in the sanitary condition of the town can confidently be expected.

39. There is little to add to the foregoing detailed account of the results of Municipal administration in Bengal during the past year. It is beyond doubt that the public interest in Municipal administration is maintained, if it is not actually on the increase. The tax-payers are discovering that they must themselves be mainly responsible for the condition of the towns in which they reside, and that without their co-operation and assistance efficient administration is an impossibility. Government can advise and assist the Municipalities both through the local officers and by the advice of the experts employed under it; but it is with the people themselves, the general body of rate-payers and their representatives that the responsibility for the success or failure of Municipal administration must ultimately rest. Although it is to be regretted that, more particularly in the smaller Municipalities near Calcutta, the representation on the Board of Commissioners and the control of the administration is at times made a matter of party strife, it is still far better that this should be the case than that the rate-payers should regard the question with indifference. That they do not do so is proved by the steady and sustained improvement in the administration which has taken place.

In conclusion, the Lieutenant-Governor again desires to congratulate the Municipalities on the good work that has been accomplished, and to express his appreciation of the public spirit displayed by the many gentlemen who have as Municipal Commissioners devoted their time and labour to the service of the public.

By order of the Lieutenant-Governor of Bengal,

H. J. McINTOSH,

Offg. Secretary to the Govt. of Bengal.

(a) Municipal area of Bihar was reduced with effect from 1st April 1906.
(b) Wrong figure was reported in 1904-1905. The figure now reported is correct : it agrees with the census figure of 1901.

FORM No. I.—*Statement showing the Constitution of the Municipalities in Bengal during the year ending 31st March 1906*—concluded.

* Revised figures.

** The loan was granted in March 1905.

(a) Court-fees ... ... Rs. 1,549
Waterworks 7,136
Town Hall 1,319
Total ... 10,004

† The Government grant of Rs. 1,700 for payment of instalment of arrear interest on the loan of Rs. 20,000 on account of the water-supply scheme has not been included in this statement as the realisation of the amount took place on the 31st April 1906.

‡ Out of the amount of Rs. 10,000 paid from the Alipur Treasury in silver coins, Rs. 45 were found old and counterfeit, and could not be charged before the 31st March 1906, hence excluded from the account.

FORM No. II.—*Statement showing the Income of the Municipali*

1	2	3	4	5
NAME OF DISTRICT.	Serial number of Municipality.	Name of Municipality	Balance in hand at the close of last year.	MUNICIPAL RATES AND TAXES.

19	Monghyr ...	—	7½ 12*	8½ 11¼*	Weather seasonable. Harvesting of paddy nearly finished. *Rabi* crops doing well. Price of rice suddenly risen on account of purchasers from Dacca. Cattle-disease reported from thana Surajgarha. Fodder and water sufficient.
20	Bhagalpur ...	Nil	8½ 12½*	10 11*	Weather seasonable, at times cloudy. Harvesting of paddy coming to an end. *Rabi* crops thriving; a shower of rain will do immense good. No cattle-disease reported. Fodder and water sufficient.
21	Purnea ...	Nil	7½	7½	Weather seasonable. Harvesting of *aghani* paddy still going on. *Rabi* crops doing well, but rain urgently wanted. High prices of food-grains prevailing. No cattle-disease. Fodder and water sufficient
22	Darjeeling ...	Nil	7 11*	7 12*	Weather cold. Hills—Wheat, barley and mustard in fair state. Terai—Reaping of winter rice going on. Mustard, tobacco and sugarcane doing well.
23	Sonthal Parganas.	Nil	10 15½*	11 15*	Weather seasonable. Harvesting of winter rice continuing. Sugarcane being pressed. Cattle-disease reported from Deoghar and Jamtara. Fodder and water sufficient.
24	Cuttack ...	...	11½	11½	Slight rainfall. *Sarad*, sugarcane and *mung* being harvested. Late cotton and tobacco flourishing. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	10	10	Weather cold. Harvesting of *sarad* and pressing of sugarcane continuing. *Rabi* crops and vegetables progressing well. Prospects fair. No cattle-disease. Fodder and water available.
26	Angul ...	Nil	11½	11½	Weather seasonable. *Rabi* crops and sugarcane doing well. Cattle-disease in the vicinity of head-quarters. Fodder and water sufficient.
27	Puri ...	Nil	10½	10½	Weather seasonable. Cutting of *sarad* paddy continuing. *Mung* being sown. Other *rabi* crops getting on well. Cattle-disease reported from Khurda Fodder and water sufficient.
28	Sambalpur ...	0·31	11½	11½	Rainfall general. Weather chilly with occasional clouds. Threshing of autumn and winter rice continuing. Pressing of sugarcane in progress. Rice-fields being ploughed for next harvest. Condition of castor seeds, brinjal, chillies and tobacco good. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	HAZARIBAGH	...	9½	9	Prospects of standing crops good. Sugarcane-pressing going on. Fodder and water sufficient.
30	RANCHI ...	Nil	10½	11	Weather seasonable. Harvesting of *sirguja* continuing. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	PALAMAU ...	0·13	10½	9½	Weather cold. Rain wanted at some places for *rabi* crops. A few cases of cattle-disease reported. Fodder and water sufficient.
32	MANBHUM ...	Nil	10	10	Weather seasonable. Prospects of crops good. Rape and mustard ripining. Cattle-disease reported from thanas Gobindpur and Tundi. Fodder and water sufficient.
33	SINGHBHUM ...	Nil	9	9	Harvesting of winter paddy going on. *Rabi* crops slightly damaged in Kharsawan for want of rain. Common rice selling at 10 and 10½ seers a rupee at Kharsawan and Seraikela respectivelly. Fodder and water sufficient.
34	COOCH BEHAR	Nil	7½	7½	Weather seasonable. Cattle-disease reported from subdivision Tufanganj. Fodder and water sufficient.

GENERAL SUMMARY.—Moderate rainfall is reported from Sambalpur and Palamau, and a slight fall from Cuttack. Harvesting of winter rice is nearly finished. Sugarcane-pressing continues. *Rabi* crops are doing well. But rain is still needed for them in the Patna Division, and also in parts of the Hooghly, Bhagalpur, Purnea, Palamau, and Singhbhum districts. The number of persons receiving gratuitous relief is—Muzaffarpur 1,608 and Darbhanga 19,453. The number of persons on test and relief works in Darbhanga is 585 and 48,381, respectively. Cattle-disease exists in nine districts. Small-pox and cholera prevail in the Katwa subdivision of Burdwan, and the latter disease continues in Jessore. The price of common rice has risen in ten and fallen in five districts.

C. A. OLDHAM,
Director of Agriculture, Bengal.

DEPT. OF AGRICULTURE, BENGAL,
The 8th January 1907.

The total fall from 1st January to 29th December 1906		57·19
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·36

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the Dine's pressure tube anemometer and the standard dial anemometer.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

The wind velocity reported on any day is for 24 hours preceding 8 A.M. of that day.

RESOLUTION ON THE FOREST ADMINISTRATION REPORT FOR THE YEAR 1905-1906.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 9th January 1907.

RESOLUTION—No. 174.

READ—

Annual Progress Report of Forest Administration in the Province of Bengal for the year 1905-06.

1. *Changes in area.*—A considerable reduction in the area of the forests under this Government was effected by the Partition of Bengal. The Forest Divisions of Chittagong, Jalpaiguri and Buxa-Duars passed to the new Province, while the Forest Division of Sambalpur, formerly included in the Central Provinces, was added to Bengal. The Forest Divisions in the Province were thus reduced from 12 to 10, considerably lightening the work of the Department and making the charge of the Conservator more controllable. The area of Reserves has been reduced from 6,049 square miles to 4,260 square miles, and of Protected Forests from 3,428 to 3,423 square miles. The whole area of the unclassed forests, amounting to 3,753 square miles, passed with the Chittagong Division to the new Province of Eastern Bengal and Assam.

2. *Forest Surveys and Working-Plans.*—No forest survey operations were carried out during the year. The most important survey work under consideration is that of the Reserved Forests in the Sundarbans, which, it is hoped, will shortly be carried out on the 2-inch scale, since until this is done, the prescriptions of the present provisional working-plan and the collection of data for the working-plan finally to be adopted are difficult to arrange. Four-inch maps of Singhbhum (9), Palamau (5), Darjeeling, Kurseong and Tista (27) and Angul (4) were published during the year, all of which were complete except in the case of Angul. Considerable progress has been made in the preparation and revision of working plans. In the Angul forests a working-plan is under preparation, which is to cover 251 square miles, of which about 100 square miles are to be worked on the selection system, and the balance by improvement fellings. The compilation of a working-plan for the Sambalpur forests has been postponed, but in the meantime field work has commenced in the preparation of stock-maps and in the demarcation of sample plots. Provisional plans for the Darjeeling, Puri and Sunderbans Forests have been revised, and are now awaiting the sanction of the Local Government. In addition, plans for the Tista Valley Range and the Tista Division are in progress.

3. *Communications.*—The Lieutenant-Governor notices with satisfaction the progress which has been made in the opening out of forests by improving the means of communication. A sum considerably larger than in the two preceding years was spent on roads and buildings. The most important work, as in the previous year, was carried on in Singhbhum, where Rs. 25,178 were spent, the result of which in the extension of cart-roads through these inaccessible parts of the Division is already apparent in the increased receipts of revenue. Similar work, but on a smaller scale, is going on in the Angul, Puri and Tista Divisions, the other Divisions for the present being comparatively well supplied with means of export. A sum of Rs. 21,025 was spent on buildings, more than half of which was expended on new buildings, including six new rest-houses. The Lieutenant-Governor is glad to observe that the important question of opening out inaccessible areas and providing comfortable housing for the establishment is receiving due attention.

4. *Protection of Forests: Breaches of the Forest Law.*—It is satisfactory to note that the number of offences reported is less by 326 than the average for the last three years. The total number of cases taken into Court, however, was 284, the same as last year. Of these, 359 cases concerning 755 persons were disposed of, 238 resulting in conviction and 21 in acquittal. The most unsatisfactory Divisions in this respect are the Darjeeling and Tista Divisions, which, considering their importance, deserve special attention. Compounding, which is largely resorted to, has not apparently a sufficiently deterrent effect, while the punishments, when cases are taken into Court, are reported often to be so light as to be practically valueless from a deterrent point of view.

5. *Protection from fire.*—The year was not a favourable one for protection against fire, and the Department is to be congratulated on the successful result obtained under these conditions. In Singhbhum, where one-third of the area under special measures is situated, good and bad years have followed each other with remarkable regularity, but this year the sequence has been broken. Last year was a good one, but this year, notwithstanding the fact that it was an unusually dry year even for Singhbhum, only 3·5 per cent. of the area under protection was burnt. In the areas under special protection 49 outbreaks of fire were reported, of which only 4 are reported as having been caused by intention or malice. In the areas not especially protected, it is to be regretted that incendiarism was rife in certain parts of the Sonthal Parganas Protected Forests. The cause has been ascribed to intentional firing in disobedience to the rule regarding the early report of intention to burn areas prepared for cultivation by the shifting or *jhum* system. It has become a question whether special measures for fire-protection in the Sonthal Parganas are not called for.

6. *Protection from Cattle.*—Of the 4,260 square miles of reserves, 84·6 per cent. were closed to all animals, only 12 per cent. being entirely open. On the other hand, outside the Sundarbans Division, 80 per cent. of the Protected Forest area was open to all animals, the balance being closed only to browsers.

In the latter class of Forests, closure for regeneration purposes may be adopted as time goes on, arrangements being made to close areas alternately so as to give the least inconvenience possible to villagers whom such closure would eventually benefit by maintaining the supply of timber and firewood for their household requirements and providing sufficient grass to feed their cattle during the spring months.

7. *Protection against injuries from natural causes.*—The important work of protecting the forest trees against creepers was continued, though not over so extended an area as in the previous year. Severe storms are reported as having occurred in Singhbhum and Puri resulting in considerable damage to the forests. There was, however, no frost of any great severity during the year. Wild elephants still continue to damage the Mal plantations in the Tista Division, while in Darjeeling special arrangements have been necessary, as in previous years, to prevent damage from barking deer.

8. *Administration.*—The Partition reduced the controlling staff on the Bengal ist from 15 to 11, the Provincial service being unchanged numerically, one appointment going to Eastern Bengal and Assam and one being transferred from the Central Provinces. Proposals for the reorganisation of the Subordinate Forest Establishment are now under consideration. Out of the 22 Rangers, 42 Deputy Rangers and 51 Foresters at present employed, only 11 have passed through the Forest School. The importance of training for executive work cannot be exaggerated, and it is hoped that the reorganisation of the Forest School and the institution of a local Training School will place at the disposal of the Department officers of more practical experience, and will, at the same time, economically assist and further the general opening out and working of the forests now in progress.

9. *Financial.*—It is satisfactory to note that all the Divisions were worked at a profit, except Angul and Tista. In Angul the deficit referred to last year was reduced to Rs. 3,085; and, if certain extra charges had not been necessary in connection with surveys and tanks for use in time of scarcity, the Division would have shown a surplus. The Tista Valley also was not worked at a loss, since Rs. 18,589, the value of Tista sleepers sold in the Kurseong Division, was credited to the latter instead of to the former Division. In the Sunderbans Division the regularising of the work and the introduction of the monoply-sale system have so improved matters that the period of its administrative uncertainty may be considered to be a thing of the past. The revenue during the year has increased by Rs. 51,000. In Singhbhum, where comparatively large sums of money are being spent on opening out inaccessible areas and where the monopoly system of sales has been lately introduced, the financial results are also satisfactory. In Puri the revenue, owing to the opening out of the Bánpur Selection working circle and the working up to the maximum of the coppice coupes, increased by no less than 33 per cent. The Sonthal Parganas, and Palamau Divisions also show satisfactory increases in both revenue and surplus, the increase in the former Division being due to better sales of bamboos and in the latter to improved arrangements for the sale of forest products and in an increased demand for mica leases.

10. The Lieutenant-Governor thanks Mr. McIntire for his able administration of the Department and Mr. Lovegrove for his interesting report.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

RESOLUTION REVIEWING THE DIVISIONAL REPORTS ON THE WORKING OF THE DISTRICT BOARDS IN BENGAL, DURING THE YEAR 1905-06.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVT.

Calcutta, the 10th January 1907.

RESOLUTION—No. 74L.S.G.

READ—

The Reports from the Commissioners of Divisions on the working of District Boards in Bengal during the year 1905-06.

DURING the year, 14 districts were transferred from Bengal to the Province of Eastern Bengal and Assam, and the district of Sambalpur was transferred to Bengal from the Central Provinces; the number of District Boards in Bengal was therefore reduced from 42 to 29, of Local Boards from 104 to 77, and of Union Committees from 58 to 49. One Local Board was established in the re-constituted Barrackpore Subdivision. This Resolution reviews the statistics of these bodies, and compares them with the statistics of the Boards and Union Committees formerly existing in the districts which are now comprised in this Province.

2. *Constitution of District Boards.*—The constitution of the District Boards was practically the same as in the previous year. The total number of members was 581, including the 20 members of the Sambalpur District Council, and the number of meetings held was 414 against 411 held in the previous year. The number of meetings which were adjourned or which proved abortive for want of a quorum rose from 23 to 27, but there was a slight improvement in the average attendance at meetings which rose from 10·9 to 11·6. The District Board of Shahabad held the largest number of meetings (22); and most District Boards met at least once a month, the exceptions being Murshidabad (11), Manbhum (11), Palamau (10), Hazaribagh (8) and Sambalpur (5). There was a slight improvement both in the number of meetings held and in the attendance at them in the Chota Nagpur Division.

3. *Constitution of Local Boards.*—The total number of members of Local Boards increased from 884 to 942, the fluctuation being chiefly due to the establishment of a new Local Board at Barrackpore, to the reduction in the number of members of the Baraset Local Board, and to the inclusion in the list of four Local Boards in the district of Sambalpur. The Local Boards convened 872 meetings, or 52 more than in 1904-05, the greatest number (19) being held by the Jessore and Kendrapara Local Boards. Thirty-four Local Boards held less than 12 meetings during the year, and 114 meetings were adjourned or proved abortive for want of a quorum. The Local Board of Gobindpur held no meeting during the year. There was a slight improvement in the attendance of officials, but the attendance of non-officials was worse, the total average attendances being 4·9 against 5·5.

4. *Elections.*—General elections were held in the districts of Nadia, Murshidabad, Jessore, Patna and Sambalpur. Little interest was taken in the elections in the districts of Murshidabad, Jessore and Patna. In Murshidabad they failed in many thanas, and in Jessore they failed entirely in the Bongaon Subdivision and partially elsewhere. It is still the case that, except in the neighbourhood of Calcutta, little or no interest is as a rule taken in the elections.

5. *Powers of Local Boards.*—The powers of the Local Boards remained the same as in the previous year.

6. *Union Committees.*—As in the previous year, Union Committees were in existence only in the Burdwan, Presidency and Orissa Divisions. The aggregate income of the 49 Unions fell from Rs. 16,754 to Rs. 15,263, and the total expenditure from Rs. 15,288 to Rs. 14,608. Twenty Unions expended the whole or nearly the whole of the allotment placed at their disposal, while nine

Committees (Memari, Srikhand, Sribati and Kotalpur, and all the five Unions of the Orissa Division) incurred no expenditure and did practically nothing during the year.

7. *Financial Results.*—The year opened with a gross credit balance of Rs. 15,61,000, and the total receipts of the 29 District Boards from all sources amounted to Rs. 68,93,000. The total amount available for expenditure was therefore Rs. 84,54,000, of which Rs. 59,08,000 were spent. The year closed with a credit balance of Rs. 25,47,000.

The table below compares the income and expenditure under the main heads of account for 1904-05 and 1905-06 :—

Income.

	1904-05.	1905-06.
	Rs.	Rs.
Provincial Rates	32,36,780	32,54,963
Interest	39,760	36,062
Police (pounds)	2,96,151	3,15,522
Education	40,130	46,470
Medical	35,283	49,179
Scientific and other Minor Departments	12,526	17,292
Stationery and Printing	1,397	893
Miscellaneous	1,72,859	1,62,737
Irrigation, Minor Works and Navigation	3,316	6,271
Civil Works (including ferries) ...	5,54,245	18,26,565
Contribution	6,98,983	6,01,983
Deposits and Advances	3,26,559	3,55,405
Total ...	64,17,989	68,93,342

Expenditure.

	1904-05.	1905-06.
	Rs.	Rs.
Administration	2,07,009	2,12,717
Police (pounds)	16,923	24,378
Education	11,81,520	12,08,900
Medical	2,61,719	3,18,029
Scientific and other Minor Departments	34,391	44,624
Superannuation Allowance and Pension	25,568	30,569
Stationery and Printing	28,736	34,338
Miscellaneous	54,693	30,083
Famine Relief	3,007	.....
Minor Works and Navigation ...	989	2,545
Civil Works	32,17,981	36,10,384
Contributions	42,741	42,443
Debt	3,89,214	3,43,052
Interest on Debt	3,977	5,682
Total ...	54,68,468	59,07,744

INCOME.

8. *Provincial Rates (Rs. 32,54,963).*—Excluding Rs. 11,101, which represents the income derived from this source by the Sambalpur District Council, the receipts under this head show an increase of Rs. 7,082 as compared with the previous year. As was noticed in the Resolution of last year, there is now little room for the expansion of the revenue derived from the road cess which is already levied at the maximum rate.

9. *Interest (Rs. 36,062).*—The income shows a decline of Rs. 3,698, which is ascribed generally to the reduction of the arrear demand.

10. *Police (Rs. 3,15,522).*—The income from pounds shows an improvement of Rs. 19,371, which is shared by all the Divisions ; but in six districts, viz., Birbhum, Bankura, Midnapore, Nadia, Khulna and Champaran, there was a decrease. With regard to the decline in Birbhum, the Chairman observes

that it is not due to any falling off in the competition amongst bidders; he ascribes it to the fact that persons who detect cattle trespassing, instead of impounding them, release them on payment of a small fine by the owner. It is reported that stringent orders have been issued forbidding the practice; but there is nothing illegal in the practice, and persons detecting cattle trespassing are not legally bound to impound them. It is probable that the income from pounds can be improved by the more general adoption of the system of local sales, which has already in some districts led to an increase in the revenue during the present year. The decrease in Bankura is more apparent than real, as there was no collection of advance rents as in previous years; in Champaran it is ascribed to the reduction in the indigo cultivation in that district. The total outstanding balance on account of pound rents was Rs. 26,929 against Rs. 31,814 in the previous year. It is satisfactory to notice that the District Boards of Birbhum, Darbhanga and Hazaribagh, and the Sambalpur District Council, realised the rents in full. Greater interest was on the whole shown by the members of District and Local Boards in the administration of this Department, and although it cannot as yet be considered altogether satisfactory, some advance has been made.

11. *Education* (*Rs. 46,470*).—The increase in the receipts was Rs. 6,340, which occurred under the sub-head "Contributions" and was shared by all Divisions, except the Presidency Division, where the receipts declined from Rs. 6,380 to Rs. 1,014. The decrease in the Presidency was due to the fact that in the previous year the Khulna District Board received a special contribution of Rs. 6,000 from the Khulna Coronation Committee towards the cost of opening a technical school.

12. *Medical* (*Rs. 49,179*).—Under this head also the receipts show an improvement of Rs. 13,896 under "Contributions," which includes grants from Government and subscriptions from the public. The increase was shared by all the Divisions, and was largest in Patna where the receipts rose from Rs. 4,829 to Rs. 10,244. No revenue was derived from this source by the District Boards of Nadia, Murshidabad and Hazaribagh, or by the District Council of Sambalpur.

13. *Scientific and other Minor Departments* (*Rs. 17,292*).—The income rose by Rs. 4,766, mainly under "Contributions." The receipts under "Veterinary" also show a small increase.

14. *Miscellaneous* (*Rs. 1,82,737*).—The income under this head increased by Rs. 9,878. These receipts are of a fluctuating nature, and the variation calls for no special remarks. The District Board of the 24-Parganas received for the first time Rs. 5,395 as its share of the surplus profits of the Baraset-Basirhat Light Railway. The Howrah District Board received an increase of Rs. 4,648 on its share of the surplus receipts of the Howrah-Amta Light Railway, and the Hooghly District Board received Rs. 2,341 from the Howrah-Sheakhala line.

15. *Irrigation—Minor Works and Navigation* (*Rs. 6,271*).—Only three District Boards, viz., those of the 24-Parganas, Hazaribagh and Jessore, derive any income from this source, and it is only in Jessore that the receipts are more than nominal. The income was nearly double that of last year, the increase being due to the fact that the District Board of Jessore succeeded in realizing arrears of rent for the Hallifax Canal. No account has been given of the small income of Rs. 10 shown against the Hazaribagh District Board under this head.

16. *Civil Works* (*Rupees 18,26,565*).—There was a large increase of Rs. 12,72,820 under this head, which occurred mainly under "Contributions" (Rs. 12,43,410). Under the orders of the Government of India a grant of Rs. 8,87,000 was made from Provincial Revenues to augment the resources at the disposal of the District and Local Boards. There has of late years been a tendency to impose new duties upon the Boards without providing additional funds to meet them, while there has been no corresponding expansion in the revenue assigned to them. The cesses are limited by law, and the other sources of revenue from ferries, pounds and the like are small. In order to establish equilibrium and to enable the Boards to expand their operations, a grant approximately equivalent to one-fourth of the revenues derived from Provincial Rates was sanctioned, and has been continued during

the present year. Special grants aggregating Rs. 80,205 were also made by Government for roads.

The receipts from ferries rose in sixteen districts and fell in eleven, and in the aggregate there was a small rise in the income of Rs. 5,235. The largest gains occurred in Howrah (where the income rose from Rs. 4,028 to Rs. 10,874), the 24-Parganas (Rs. 5,617) and Muzaffarpur (Rs. 16,125). These are ascribed to better settlements and better supervision. The greatest loss occurred at Darbhanga, where the income fell from Rs. 58,283 to Rs. 42,092, partly on account of the floods of August and September 1905, and partly because the security deposits of the ferries settled in 1905-06 were not paid before the close of the year.

17. *Contributions from Provincial to Local* (*Rs. 8,01,964*).—This head represents—(1) the amount (Rs. 7,15,887) drawn during the year on account of the fixed assignments to District Boards in order to establish equilibrium between the income and expenditure transferred to the Boards from the Provincial accounts and (2) sums allotted for the improvement of roads in Government estates, which amounted to Rs. 41,627. Contributions from Government for other purposes are shown in the accounts under other heads.

18. *Loans.*—No loan was taken by any District Board during the year.

19. *Deposits and Advances* (*Rs. 3,55,405*).—The receipts increased by Rs. 28,846, but the variations call for no remarks.

Expenditure.

20. *Administration* (*Rs. 2,12,717*).—The cost of office establishment increased by Rs. 6,496, while contingencies were less by Rs. 1,574. The variations were unimportant.

21. *Police* (*Rs. 24,378*).—There was an increase of expenditure of Rs. 7,455 under this head, chiefly in the Patna and Orissa Divisions. In the former Division the increase was due to the construction and repair of pound sheds, the establishment of new pounds and the payment of allowances to three post-masters for the management of the local pounds. In Orissa the inclusion of the charges incurred by the Sambalpur District Council accounts for the increase.

22. *Marine.*—No expenditure was incurred under this head by any of the District boards during the year.

23. *Education* (*Rs. 12,08,900*).—The total expenditure during the year amounted to Rs. 12,08,900, as compared with Rs. 11,81,520. There was thus an increase of Rs. 27,380, which was incurred in the Presidency, Bhagalpur and Orissa Divisions, the other Divisions showing a decrease in expenditure. The Sub-Inspectors of Schools were transferred from the service of the District Boards to that of Government, with effect from the 1st January 1906, and the salaries of these officers having in consequence been paid by Government, there is an apparent decline of Rs. 25,155 in the expenditure on inspection. Rupees 1,11,608 was expended on the maintenance and management of schools, as compared with Rs. 2,66,486 in the previous year. The decrease under this head is also only apparent, and is due to an alteration in the Patna Division in the classification of the expenditure which is now shown under "Grants-in-aid." Under Grants-in-aid the expenditure rose by Rs. 2,01,064. One high school, 128 middle schools, 95 upper and lower primary schools, with 503, 8,327 and 8,480 pupils on their rolls, respectively, were maintained by the District Boards during the year. In the upper and lower primary schools aided by the District Boards 4,463 and 59,907 girls, respectively, received instruction during 1905-06.

Nine District Boards failed to spend on education the full amount assigned to them for this purpose from Provincial Revenues. This was notably the case in Howrah, Champaran, Hazaribagh and Manbhum. It is true that in all these districts the Boards incurred heavy charges on medical relief for which no grants were made by Government, but the receipts from pounds and ferries largely exceeded the revenue estimated in the settlements, and there is no reason why the full amount of the grants for education should not have been applied to the purpose. Instructions have been issued to Commissioners of Divisions requesting them to see that the expenditure of District

Boards on education is not less than the amounts assigned by Government for the purpose.

24. *Special Schools.*—Technical or industrial schools are maintained by the District Boards of Burdwan, Midnapore, Khulna, Ranchi, Hazaribagh and Manbhum. No mention is made in the Commissioner's report of the industrial school which was maintained by the Balasore District Board during the previous year. The Bhagalpur District Board decided during the year to establish a school, which has now been opened, and the proposal of the District Board of Monghyr to open a technical school is under the consideration of the Education Department. The management of the technical school at Midnapore has not been altogether satisfactory, and the Government grant has in consequence been suspended since April 1905. The buildings and accommodation are very unsuitable; and the Director of Agriculture, who recently inspected the school under the orders of Government, has now recommended that it should be transferred to a new site near the college where suitable buildings should be erected, and that the management should be placed in the hands of a Committee of which the Magistrate should be the *ex-officio* President. The seri-agricultural school at Sabong, in the Midnapore district, had on its roll only four pupils against six and eight in the two preceding years. A school-house was constructed during the year, with quarters for the teachers, and also a nursery and plant for the manufacture of silk. Besides the technical schools maintained by the Boards mentioned above, several District Boards provided scholarships for pupils under instruction at the Sibpur and Bihar Engineering Colleges, and at the Jaipur Art School. On the whole, unfortunately, it must still be said that little progress has as yet been made in the development of technical and industrial education. The schools established by the Boards have not received the support from the public which might have been expected.

25. *Industrial development.*—On the whole little success has attended the efforts of the District Boards to introduce the fly-shuttle loom. The Commissioner of Burdwan however reports that the interest now aroused in the country in the improvement of the textile industry has induced many people to set up these looms in various parts of the Midnapore district, and that many weavers who had sought employment in other industries have returned to their looms. The fly-shuttle loom was extensively used in the Hooghly district, and a few Japanese and other looms of improved pattern were also brought into use during the year. Besides cloth, other articles of less importance, such as nibs, pen-holders, brushes, blacking, bronko and blanko, are also being manufactured in this Division in small quantities. In the Bhagalpur Division, the weaving class started by the Monghyr District Board was continued during the year, and four students who had learnt the use of the loom set up looms of their own on leaving. There were six students on the rolls at the close of the year, and eight prisoners from the local jail also received instruction. Sixteen students are shown on the rolls of the weaving school maintained by the Manbhum District Board, but it is reported that the pupils who have completed the course of instruction are unable to purchase improved looms and still continue to use looms of the old pattern. The District Board agreed to advance two-thirds of the cost of looms and to charge no interest on the advance, but up to the present the offer has not been accepted. The question is one of considerable importance, as it is obviously useless to instruct persons in the use of the fly-shuttle loom who will subsequently have no opportunity of applying the experience they may have gained, and it is difficult to believe that it is want of money only which prevents the weavers who have been instructed from making use of the improved loom.

An agricultural and industrial exhibition was held at Midnapore, at which samples of rice, hemp, tobacco, cotton, potato, jute and of different kinds of vegetables which were experimentally cultivated in the garden attached to the Seri-Agricultural School at Sabong were exhibited. The exhibits obtained a silver medal, a first class certificate and a prize of Rs. 10. The school has, it is reported, created among the cultivators a desire to grow potatoes on an extensive scale. Improved fly-shuttle looms were exhibited at the Sonepur fair and also at the Muharrum fair held at Darbhanga.

26. *Medical (Rs. 3,18,029).*—The expenditure increased by Rs. 56,310. The outlay on hospitals and dispensaries rose by Rs. 26,835, that on sanitation and vaccination by Rs. 8,612, and that under "Miscellaneous" by Rs. 9,646. The total number of dispensaries maintained by the Boards was 119 against 110 in the previous year, and the number of aided dispensaries rose from 133 to 137. Two new dispensaries were opened by each of the District Boards of Burdwan and Hazaribagh, and one each by the District Boards of Hooghly, Patna, Muzaffarpur, Darbhanga, Palamau and Manbhum. The Gaya District Board closed one of its dispensaries during the year. The Patna District Board maintained the largest number of dispensaries (11), besides contributing Rs. 500 a month to the Bankipore dispensary; the Burdwan District Board maintains ten, of which no less than five have been opened in the past two years. No dispensaries were maintained by the District Boards of Bankura, Murshidabad and Sambalpur. The Shahabad District Board contributed Rs. 30,000 towards the cost of erecting a new hospital building at Arrah.

27. *Sanitation.*—The Patna system of village sanitation, though tried in all the Divisions, hardly proved the success that was anticipated. It is practically only in the district of Patna itself that the work was carried out, on a systematic plan, in accordance with the programme drawn up by the Local Boards. In this district 181 insanitary villages were cleansed at a total cost of about Rs. 2,500 The Shahabad District Board spent over Rs. 2,123, but it is reported that the supervision was inadequate and that the value of the work done was small. In Champaran only Rs. 4 was spent under this head, and in Muzaffarpur and Darbhanga no expenditure at all was incurred. The reports from the other Divisions are even more discouraging. In the Burdwan Division the total expenditure was only Rs. 2,800, and, with the single exception of the District Board of Midnapore, very little interest in the matter was shown by the Boards. In the Chota Nagpur Division no expenditure was incurred; but it must be remembered that in this Division most villages have the advantage of a good natural system of drainage. In the Presidency Division only the sum of Rs. 100 was spent in Murshidabad, no expenditure being incurred in Nadia, Jessore or Khulna. Considering the unhealthy reputation of these three districts, it is strange that the local authorities should be so apathetic. In the Bhagalpur Division the total expenditure was Rs. 1,095, practically the whole of which was incurred in Monghyr where 47 villages were cleansed. In the Orissa Division no expenditure was incurred during the year on village sanitation in Puri or Balasore. In Cuttack, the Sadar Local Board spent a sum of Rs. 370 in looking after the sanitation of four typical villages, and it is reported that the Jajpur Local Board spent a sum of Rs. 500 in improving the sanitation of 109 villages in that subdivision. Considering that this represents an average expenditure of a little under Rs. 5 a village, it is improbable that the results obtained were of much value. Unless and until members of District and Local Boards and Union Committees are themselves prepared to see that the work is carried on in a systematic manner and to supervise it themselves while in progress, little or no success in this direction can be expected.

28. *Veterinary charges (Rs. 28,740).*—The total expenditure increased by Rs. 9,560, and all District Boards, with the exception of Howrah, Jessore and Sambalpur, incurred expenditure under this head. At Khulna the District Board opened a veterinary hospital; the Cuttack District Board opened a hospital attached to the existing dispensary; and the Manbhum District Board established a dispensary. The Veterinary Assistant attached to the Monghyr Dispensary visited 64 villages and treated 1,149 animals. Satisfactory work was also done in Muzaffarpur. About five hundred cattle were inoculated with the anti-rinderpest serum in the districts of Burdwan, Midnapore and Monghyr; but the Commissioner of Burdwan reports that the endeavours of a Veterinary Assistant to inoculate cattle in the interior of Birbhum proved futile, owing to the prejudice of the people against the operation. The Lieutenant-Governor is however glad to find from the large number of cases brought under treatment in the dispensaries that their popularity is increasing, and that the people have begun to appreciate the method of treatment followed by the Veterinary Assistants. Several District Boards granted scholarships tenable at the Veterinary College.

29. *Civil Works* (*Rs. 36,10,384*).—The expenditure shows a large increase of Rs. 3,92,403, which occurred mainly under "communications" (Rs. 2,89,999), buildings (Rs. 36,459), water-supply (Rs. 43,754) and establishment (Rs. 31,192). The Boards maintained 2,590 miles of metalled and 18,567 miles of unmetalled district roads, and 14,030 miles of village roads.

Details of the more important works executed during the year are given in the Commissioners' reports. Several large bridges were built in the districts of Gaya, Shahabad, Champaran, Muzaffarpur, Darbhanga, Saran, Monghyr, Bhagalpur and Purnea, and important roads were made in the districts of the 24-Parganas, Nadia, Ranchi, Gaya, Shahabad, Muzaffarpur, Darbhanga, Saran, Champaran, Monghyr, Bhagalpur and Purnea.

30. *Water-supply and Water-works.*—The total expenditure on the improvement of water-supply increased by Rs. 43,754, or 68 per cent., the increase being shared by all the Divisions, except Burdwan; the District Boards of Champaran, Muzaffarpur and Darbhanga incurred no expenditure under this head, while only Rs. 15 was spent by the District Council of Sambalpur. The returns from the Burdwan Division are disappointing, the figures indicating a further falling off in the activity of the Boards in all the districts, except Burdwan and Midnapore. In Bankura, out of a budget grant of Rs. 10,000, only Rs. 2,410 was spent, and in Howrah, out of a provision of Rs. 3,000, only Rs. 461 were spent. The Commissioner reports that no explanation of this has been given. Similarly, in Midnapore, out of an allotment of Rs. 11,417, only Rs. 3,854 was spent, and in Hooghly practically nothing was done. The Chairman of the Hooghly Board has reported that, while considerable sums are being spent in excavating tanks and wells, no care is being taken in maintaining, repairing and periodically cleaning them, most of the wells having been utterly neglected. A difficulty with which the local authorities have to contend is the condition that no contribution is as a rule made by Government, unless an equivalent amount is collected by subscriptions from the public. It does not, however, appear advisable to relax this condition at present, as the essence of Local Self-Government is that Government gives assistance to those who are willing and ready to help themselves. As it has been decided in some cases that the required contribution may be paid in labour instead of in hard cash, there is no reason for supposing that the villagers are unable to make any contribution for this purpose. Another difficulty, and one which in some cases has been found to be almost unsurmountable, is the unwillingness of the people to part with their rights or ownership over existing sources of water-supply. The law as it now stands forbids any expenditure from the District Fund on private property, but in the Bill to amend the Local Self-Government Act provision has been made to legalize such expenditure in cases where owners are unwilling to surrender their proprietary rights.

31. *Drainage.*—The only expenditure under this head was incurred in three districts of the Presidency Division. Detailed plans and estimates of the cost of the project for excavating the old bed of the river Kaunsiki in the Hooghly district have now been prepared, and steps are being taken for the acquisition of the land required for the work. The scheme, when carried out, will greatly improve both the drainage and the water-supply of a large area. In the 24-Parganas work was in progress on the Magrahat-Usti scheme, referred to in last year's Resolution, and an application was also made by the District Board under the Sanitary Drainage Act for the improvement of the beds of the Nawai and Sunti rivers in the Baraset subdivision. This scheme is at present under the consideration of the local officers of Government. In Jessore Drainage Commissioners have been appointed under the Sanitary Drainage Act for the improvement of the river above the town. The latter portion of the scheme is to be carried out by the District Board. Another scheme for the re-excavation of the Muchikhali khal is pending before the District Board. In Khulna the Bengal Sanitary Drainage Act was applied to an area of 3½ square miles in and about the Bagerhat station road, and the Drainage Commissioners appointed under the Act are considering the project.

32. *Roads.*—The total length of metalled roads maintained by the several District Boards increased by 65 miles, of unmetalled roads by 218 miles, and of village roads by 252 miles. The expenditure on the repairs of metalled

roads was nearly 8 lakhs of rupees; in the case of unmetalled roads it amounted to about 6½ lakhs; while for village roads it was nearly 2 lakhs. The average expenditure per mile on metalled roads was Rs. 302, on unmetalled roads Rs. 35, and on village roads Rs. 13. The cost of repairs per mile of metalled road varied from Rs. 306 in the Presidency Division to Rs. 189 in Chota Nagpur. In the latter Division the cost has risen by Rs. 73 a mile as compared with last year, but no explanation of the increase is given. In the case of unmetalled roads the cost was between Rs. 41 in the Burdwan Division and Rs. 28 in Bhagalpur. The expenditure on original works connected with metalled roads exceeded 2¼ lakhs, while over 8½ lakhs were expended on unmetalled and about Rs. 36,000 on village roads.

33. *Railway Feeder Roads.*—The Burdwan District Board undertook the construction of two important feeder roads and the metalling of a third. In Birbhum the construction of four roads was undertaken, whilst in Bankura four such roads were completed and the work on a fifth road was in progress. The Midnapore District Board completed one road, and were engaged in the construction of three other roads. In Hooghly work was in progress on three roads; the Howrah District Board expended Rs. 9,190 on this account; and the District Board of the 24-Parganas spent Rs. 19,024 on the construction or metalling of six feeder roads. In Gaya land was acquired for four feeder roads, and three were completed during the year; and in Darbhanga one road was under construction. The Muzaffarpur District Board completed one important feeder road, and two more were in course of construction. In Monghyr work continued on four important roads, which were estimated to cost Rs. 1,35,220, and was nearly completed, except on one. The Bhagalpur District Board commenced work on one road, and have in contemplation the construction of two other roads. In Cuttack seven small feeder roads were constructed during the year, and one each in Puri and Balasore. The Lieutenant-Governor notices with satisfaction the progress that is being made.

34. *Miscellaneous Improvements.*—In Resolution No. 3042, dated the 18th November 1905, Government laid down certain general principles designed to ensure the maintenance of a continuous and intelligent line of action in promoting road-side arboriculture, and directed that the Director of Agriculture shall be the central authority to arrange for the supervision of the arboriculture work of the District Boards. In all the Divisions, except Burdwan, programmes and working-plans for road-side arboriculture have now been drawn up, and work is being carried on in accordance with them. The total expenditure amounted to Rs. 29,233, and the receipts obtained by the Boards from the sale of fruits and timber is reported to be Rs. 5,501. Nothing was spent under this head in Jessore during the year, and no explanation of this is given.

35. *Railways and Tramways.*—No new lines were constructed during the year. But several projects are being considered. A proposal to construct a light railway from Memari to Chakdighi in the Burdwan district was under the consideration of the District Board. Statistics are also being collected for a light railway on the Arrah-Sasaram road, in the Shahabad district. A project for a line from Krishnaghar to Jellinghi was worked out at a cost of Rs. 9,800, and the scheme is now under the consideration of the Nadia District Board.

The Howrah-Amta, the Howrah-Seakhala, the Bukhtiarpur-Bihar and the Barasat-Basirhat light railways, which were referred to in the last year's Resolution, continued to work satisfactorily. The Boards' shares of the surplus profits in 1905 were—

			Rs.
Howrah	District Board	... ...	39,563
Hooghly	,, ,,	... ...	2,419
Patna	,, ,,	... ...	[illegible]
24-Parganas	,, ,,	... ...	5,395

Provision has been made in the Bill for the amendment of the Local Self-Government Act, which was introduced in Council on the 10th November 1906, to enable District Boards to levy under certain specified conditions a special cess for the payment of guaranteed interest on capital, or of interest

due to Government for loans raised for the construction of tramways and light railways.

36. *Contributions* (Rs. 42,443).—This item mainly represents the payments made by District Boards for establishments in offices of account and control, and refunds of unexpended portions of Government grants for special works.

37. *Debt* (*Rs. 3,43,052*).—The charges declined by Rs. 46,162. The fluctuations under this head are unimportant.

38. *Closing Balances* (*Rs. 25,46,922*).—The actual closing balances of the District Boards, excluding deposits, amounted to Rs. 23,68,683 against Rs. 14,25,099 at the end of the previous year. The aggregate of the minimum working balances fixed for District Boards under the Account Rules amounts to about 4¼ lakhs; the actual balances at the close of the year were therefore more than four times in excess of the prescribed minimum. In the Patna Division the closing balance has been steadily rising since 1901, and it now stands at nearly Rs. 10,00,000. Darbhanga is responsible for the heaviest balance, viz., Rs. 2,09,800, and it is reported that much of this was due to failure on the part of the District Board to work up to the sanctioned programme for civil works. In Gaya the unexpended balance under the head "Civil Works" amounted to Rs. 1,01,552, the short expenditure being attributed by the District Engineer to failure of contractors in certain cases, to delay in the proceedings for acquiring land in others, and also to delay in obtaining the requisite sanction of higher authority to estimates for large works for which allotments were made in the budget. In Saran also the large balance is accounted for by the fact that the full allotment for civil works was not spent, the actual expenditure amounting to Rs. 1,39,700 as against the budget allotment of Rs. 2,31,846. The general result in the Presidency Division was also unsatisfactory, the closing balance having increased by Rs. 1,38,532. The large closing balance in Purnea in the Bhagalpur Division (Rs. 85,063) is also noticeable. In the Burdwan Division the actual closing balance rose from Rs. 2,06,196 to Rs. 3,89,755. This failure on the part of the District Boards to work up to their sanctioned programmes is disappointing, though possibly it was for the most part unavoidable. Every effort should now be made to reduce these large balances. It was perhaps only to be expected that, considering the large amounts which have recently been placed at their disposal by Government, the Boards should have found some difficulty in arranging for the expenditure of these sums, but there can be no lack in any district of projects on which money can suitably be spent. The improvement of communications in connection with the rapidly extending railway systems of the country and of the water-supply and sanitation in the interior are objects on which practically unlimited expenditure might be usefully incurred. The Boards have now had time to mature their projects, and it is confidently expected that they will utilize to the fullest and to the best advantage their resources which are so greatly improved.

39. *Amendment of the Bengal Local Self-Government Act, 1885.*—A revised Bill to amend the Act was introduced in the Bengal Legislative Council last November. The Bill has been published in the *Calcutta Gazette* and circulated to all recognized associations and public bodies for opinion.

By order of the Lieutenant-Governor of Bengal,

H. J. McINTOSH,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE FINAL REPORT ON THE SURVEY AND SETTLEMENT OPERATIONS IN THE MAKSUDPUR ESTATE IN THE DISTRICT OF GAYA.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 12th January 1907.

RESOLUTION No. 251.

READ—

Letter No. 20598., dated the 11th August 1906, from the Director of Land Records, Bengal, submitting, with his remarks, the Final Report on the Survey and Settlement Operations in the Maksudpur Estate in the district of Gaya.

Previous history.—The Maksudpur Estate originally formed part of the Tikari Raj in the district of Gaya. The late Raja Rameswar Prasad Narayan Singh was the direct descendant of Fateh Narayan Singh, the predecessor of Pitambar Singh, who first obtained the title of Raja, in consideration of the help given by him against Kasim Ali. The title of Raja was continued to his son, Todal Narain Singh, who died in the year 1856, leaving a daughter who had married Gajadhar Prasad Narain Singh of the Chainpur family in the district of Saran. Their son, the late Rameswar Prasad Narayan Singh, attained his majority in the year 1859 and was made a Raja in the year 1891.

2. *Reason for undertaking the operations.*—Since the year 1889, the local officers had repeatedly drawn attention, in their annual administration reports, to the existence of strained relations between the Raja of Maksudpur and his tenants. It was not, however, apparent at first whether the fault was on the side of the Raja or of the tenants, but enquiries showed that from the year 1898, owing, presumably, to pressing financial difficulties, the Raja had adopted oppressive and tyrannical means of increasing the income of his estate. As a result of his oppressive measures, many tenants left their ancestral villages to find new homes in the neighbouring zamindaris, while those who remained were gradually impoverished, till village after village was deserted, and the very name of "Maksudpur" became a synonym for tyranny and oppression throughout the district. For some time, the Collector of Gaya and the Commissioner of the Patna Division had advised the Raja to reform his administration or to appoint a competent Manager with effective powers to do so, but he only made promises which he never fulfilled. Inquiries were again instituted by the Collector, and these proved that the Civil and Criminal Courts failed to secure protection to the rights and property of the tenants. Government accordingly gave orders, under section 101 (2) (*b*) of the Bengal Tenancy Act, for the survey and preparation of a record-of-rights of the estate.

3. *Area of the estate and duration of the operations.*—The area of the Maksudpur Estate is 130 square miles comprised in 160 villages. Survey and settlement operations were actually started in September 1900, and finished in September 1903, except for recovery of costs, which was completed in August 1904. The task of the survey and settlement staff throughout the operations was one of exceptional difficulty. During traverse survey, there was no correct information as to what villages belonged to the estate, and the estate officials either would not, or could not, give any assistance. Again, when cadastral survey and record-writing had begun, plague broke out in many of the villages, and many tenants migrated temporarily to other parts of the district; while those who stayed took little interest in the work. Further, during the settlement part of the proceedings, the Revenue officers were not only confronted with a large number of internal disputes of considerable difficulty, but had to make very careful enquiries as to the tenants whose names had been suppressed in respect of lands claimed to be the proprietor's private lands. At attestation, for instance, the Settlement Department had great trouble in finding the rent payable by the tenants, inasmuch as the rents stated by the tenants were,

as a rule, absurdly low and were calculated at various imaginary rates on the area they claimed to hold on cash rents. The tenants on the one hand, not only failed to produce receipts, but declared that they had none, and, on the other, the landlord's papers showed rates and rents that had never been collected.

4. *Cost of the operations and apportionment and recovery of cost.*—The actual gross expenditure incurred on the operations was Rs. 84,516, against which is to be set off miscellaneous receipts on account of Court-fees, etc., amounting to Rs. 9,512. Thus the net cost of the operations amounts to Rs. 75,034, and gives an incidence of Rs. 577 per square mile, or 14 annas 5 pies to the acre. The cost-rate is high, but in view of the exceptional difficulties of the work noticed in paragraph 3 above, the Lieutenant-Governor agrees with the Director of Land Records that the work could not have been completed more economically or in a shorter time.

5. As is usual in proceedings undertaken under section 101 (2) *b* of the Bengal Tenancy Act, funds for the work were advanced by Government in the first instance. Inasmuch as the entire responsibility for the state of things which led to the initiation of the operations rested on the Raja, it was ordered, under section 114 of the Act, that quarterly bills of cost should be presented to the Raja for payment. Great difficulty was experienced in obtaining these payments, and not only was recourse to the certificate procedure necessary, but on more than one occasion coercive measures were taken for the realisation of the amounts, and even in September 1903, when the work was actually completed, there was still a considerable amount outstanding. In the meantime, however, the Raja died, and the Rani succeeded to an estate not only heavily burdened with debt, but also the subject of expensive litigation owing to a claim to the succession to the estate by the late Raja's brother. In the circumstances, Government acceded to her request that a share of the costs should be realised from the tenants, and directed that the raiyats should pay at the rate of 3½ annas per acre. Further, in the case of villages let out in perpetuity, orders were issued that the permanent tenure-holders should pay 7½ annas per acre of the Rani's share.

6. *Results of the settlement and value of the record-of-rights.*—The grievances of the tenants, which it was intended to remedy by the preparation of a record-of-rights, were the uncertainty of their tenancies, the exorbitant cash rents demanded and the oppressive system of appraisement of produce rents. In the end, out of 11,690 tenants, 11,466 have been recorded as holding either as rent-free holders, raiyats at fixed rates or occupancy raiyats. Each tenant also has now been granted a *khatian* in which every plot which forms a part of his holding is recorded and against each plot is noted whether the landlord is entitled to demand a cash or produce rent, the manner in which appraisement is customarily made, the various payments due to the persons concerned therein, the respective shares of the landlord and tenant in the produce and the rights and the duties of landlords and tenants in respect of irrigation. The Raja's exorbitant demands in regard to cash rents have thus been to a large extent cut down, and comparatively reasonable rents and rates of rent at which the tenants are liable to pay have been fixed.

7. *Irrigation and produce rents.*—The main difficulty in the way of successful management of the estate lies in the fact that the system of produce rents prevails throughout, that much of the land depends on irrigation, and that water is obtained for the most part, not from wells or reservoirs supplying the fields in their immediate neighbourhood, but from rivers by means of long distributary channels supplying a large number of villages. The maintenance of such channels and the distribution of the supply of water to individual cultivators can be controlled only by the landlord or by the State. Hitherto the State has refrained from interference, and the landlord could only be induced to discharge his duties efficiently by being immediately interested in the actual success of the crops. Government has at present under consideration a legislative measure by which it is proposed to empower Collectors to control the management of private irrigation works; but until this proposal is given effect to, it is not possible to commute all produce rents and thereby remove all evils attending the system.

8. *Questions for special consideration.*—The remarks and suggestions of the Settlement Officer and the Director of Land Records regarding (1) the revision of the records of the estate when the district of Gaya is brought under survey, (2) the fixity of rents settled under section 40 of the Bengal Tenancy Act, (3) the improvement of the machinery for official appraisement of produce rents, (4) the Court-fee to be paid on a dispute under section 106 of the Bengal Tenancy Act, and (5) the reproduction of the village maps of the estate, will be separately considered.

9. *Services of officers.*—The thanks of the Lieutenant-Governor are due to Mr. J. H. Kerr for his control of the operations at the early stages, to Mr. Coupland for having brought this difficult work to a successful close and for his excellent report, and to the Directors of Land Records, Messrs. Lyon, Allen and Maddox, for their careful supervision of the work. His Honour notices with satisfaction the remarks of the Settlement Officer in regard to the good work done by Babu Bhupendra Nath Gupta, Mr. S. S. Dey and Maulvi Makimuddin Ahmed. In conclusion, Sir Andrew Fraser desires to record his appreciation of the services rendered by Mr. C. E. Oldham in this connection. After a long, careful and tedious enquiry, he brought to the notice of Government the real state of affairs in the estate, and throughout the operations readily co-operated with the settlement staff, and helped them with his advice on all questions of difficulty.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy of it be forwarded to the Appointment Department of this Government.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,

Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 14th January 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	8½	8½	Weather seasonable. Harvesting of winter rice almost completed. Standing crops flourishing. Outturn of sugarcane estimated at 12 annas. Small-pox rife throughout the Katwa subdivision. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	Nil	8*	8*	Harvesting of paddy over. Standing crops doing well. Old common rice selling at 7 seers a rupee. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	9	9	Weather seasonable. Prospects of *rabi* crops good. Sugarcane doing well. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	Nil	[illegible]	9	Weather seasonable. Harvesting of sugarcane in progress. Paddy-harvest nearly completed. Prospects of *rabi* crops fair.
5	HOOGHLY ...	Nil	8	8	Weather seasonable. Prospects of sugarcane and potatoes fair. Reaping of *aman* paddy still going on. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	8½	8½	Weather seasonable. Standing crops doing well. Harvesting of winter paddy still going on in the Uluberia subdivision. No cattle-disease reported. Fodder and water for cattle sufficient.
7	24-PARGANAS	Nil	9	9	Weather seasonable. Harvesting of winter rice nearly finished in Barrackpore and in progress in other subdivisions. State of standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	Nil	8	8	Prospects of standing crops good. Fodder and water sufficient.
9	MURSHIDABAD	Nil	8	8	Weather seasonable. Harvesting of *aman* paddy and sugarcane still going on. Prospects of *rabi* crops favourable. No cattle-disease reported.
10	JESSORE ...	Nil	7 1/16	7½	Weather seasonable. Harvesting of *aman* paddy continuing; condition fair. *Rabi* crops thriving. Prospects of sugarcane favourable. High prices and slight distress. Malarial fever raging. Cholera at sadr and in the interior. No cattle-disease. Fodder and water sufficient.

* New rice.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	8	8	Weather seasonable. State of rape and mustard fair. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	Nil	9 13¾*	9 13½*	Weather cold. Threshing of paddy and pressing of sugarcane continuing. Standing crops doing well, but rain wanted to improve them. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	...	9 11/16 13 5/16*	9 11/16 13 5/16*	Harvesting of paddy and pressing of sugarcane continuing. *Rabi* crops doing well, but some rain wanted for them. Prices stationary. Fodder and water for cattle sufficient.
14	SHAHABAD ...	0·20	10¾ 13*	10½ 14*	Light rain general. Prospects of *rabi* good. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	Nil	9¼ 14*	9¼ 13½*	Weather very cold. Pressing of sugarcane and irrigation of *rabi* crops going on. Rain wanted for *rabi* crops. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	0·22	9¼ 12½*	9 12¼*	Standing crops benefited though rain scanty and scattered. Harvesting and threshing of paddy approaching completion. Prospects of poppy and other *rabi* crops fair, but rain needed for them. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	8 12½*	9 12½*	Weather seasonable at the Sadar and Hajipur subdivisions, but sometimes cloudy at Sitamarhi. Harvesting of paddy nearly completed. Rain wanted for *rabi* crops in the Sadar, Hajipur and Sitamarhi subdivisions. Common rice and maize selling at 9½ and 13 seers a rupee, respectively, at Sitamarhi, and 8¾ and 13 seers a rupee, respectively, at Hajipur. Average daily attendance at kitchens 1,570. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	6 15/16 13*	6 15/16 12½*	Weather seasonable. *Rabi* crops require rain. Number of persons on test-works in the Madhubani subdivision on the last day available, 1,497. Number of persons on relief works 53,772. Total number of persons gratuitously relieved, including village doles, 19,739. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
19	Monghyr ...	Nil	7¼ 12*	7¼ 12*	Weather seasonable. Harvesting of paddy finished. *Rabi* crops doing well, but rain wanted. Price of rice continuing high at head-quarters, but the district average fallen to 9 sêers per rupee. Cattle-disease reported from thanas Nawada, Jamui and Kharagpur. Fodder and water sufficient.
20	Bhagalpur ...	Nil	8⅞ 12⅝*	8⅞ 12⅝*	Weather seasonable; at times cloudy. *Rabi* crops doing fairly well, but rain wanted. No cattle-disease.
21	Purnea ...	Nil	7	7½	Weather seasonable. Harvesting of *aghani* paddy nearly finished. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	Nil	7 11*	7 11*	Weather cold. Hills—Wheat, barley and mustard in fair state. Winter rice and *bhadoi* paddy being harvested. Terai—Reaping of winter rice nearly finished. Mustard, tobacco and sugarcane doing well.
23	Santhal Parganas.	Nil	10 14*	10 15½*	Weather seasonable. Harvesting of winter rice continuing. No cattle-disease. Water and fodder sufficient. Deoghar report not received.
24	Cuttack ...	Nil	10½	11½	*Sarad*, sugarcane and *arhar* being harvested. Early cotton and tobacco flourishing. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	10	10	Weather cold. Threshing of *sarad* and pressing of sugarcane continuing. *Rabi* crops and vegetables progressing well. Prospects fair. No cattle-disease. Fodder and water sufficient.
26	Angul ...	Nil	11½	11½	Weather cold and seasonable. *Rabi* harvesting and sugarcane pressing begun. Cattle-disease near head-quarters. Fodder and water sufficient.
27	Puri ...	Nil	10½	10½	Weather seasonable. Cutting of *sarad* continuing Sowing of *mung* commenced. Sugarcane being pressed. *Arhar* and mustard being harvested. Other *rabi* crops getting on well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	0·02	11½	11½	Rainfall general. Weather chilly with occasional clouds. Threshing of autumn and winter rice continuing. Pressing of sugarcane in progress. Rice-fields being ploughed for next harvest. Condition of castor, brinjal, chillies and tobacco good. No cattle-disease.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	HAZARIBAGH	...	9	9½	Prospects of standing crops good. Sugarcane-pressing going on. Poppy doing well. Cattle-disease reported from three thanas. Fodder and water sufficient.
30	RANCHI ...	Nil	10	10½	Weather seasonable. Threshing of *sirguja* continuing. Fodder and water sufficient.
31	PALAMAU ...	0·08	10⅛	10⅛	Weather cold. *Rabi* crops doing well. Cattle-disease reported from some places. Fodder and water sufficient.
32	MANBHUM ...	Nil	9½	10	Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Manbazar and Tundi. Fodder and water sufficient.
33	SINGHBHUM ...	Nil	9	9	Harvesting of winter paddy nearly finished. Condition of standing crops fair. Common rice selling at 10 seers a rupee at Kharsawan. Fodder and water sufficient. Report from Seraikella not received.
34	COOCH BEHAR	Nil	6¾	7½	Weather cold. Cattle-disease reported from subdivision Mathabhanga. Fodder and water sufficient.

GENERAL SUMMARY.—Light rainfall is reported from Sahabad, Champaran, Sambalpur and Palamau. Harvesting of *aman* paddy is almost over. Pressing of sugarcane continues. *Rabi* crops are doing well. Rain is needed for them in the Patna Division, and also in Monghyr and Bhagalpur. The number of persons receiving gratuitous relief is—Muzaffarpur 1,570 and Darbhanga 19,739. The number of persons on test and relief works in Darbhanga is 1,497 and 53,772, respectively. Cattle-disease prevails in six districts. Fodder and water-supply are sufficient. Small-pox continues in parts of Burdwan and Cholera in Jessore. The price of common rice has risen in eight and fallen in three districts.

SUMMARY OF THE RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE MONTH OF DECEMBER 1906.

THE rainfall in December was scanty. Rain fell in a few scattered showers only in Orissa and Chota Nagpur. The averages for South-West Bengal and Bihar are nil.

Expressed as a percentage, South-West Bengal received 95 per cent. of the normal, Bihar 96 per cent., Orissa 82 per cent., and Chota Nagpur 92 per cent. during the year.

The following table compares the rainfall in the four divisions during November with the normal fall, the actual being given as a percentage of the normal. The table also shows the actual falls for each of the previous months of the year, expressed in the

same notation, and the last column of the table shows the total rainfall of the past twelve months of the year :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Actual rainfall of first twelve months expressed as a percentage of the normal rainfall for the period.

The 15th January 1907.

N. N. Banerjei,
for Director of Agriculture, Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of December 1906.

	Inches.	Date.	Hour.
The mean pressure of the month	30·012		
The average pressure of December from 44 years' registers ...	30·024		
The highest pressure in the month	30·178	27th	10
The lowest pressure in the month	29·856	20th	16
The range of pressure	0·322		
	Hours.		
The total number of hours of bright sunshine during the month	205·5		
The maximum possible number of hours of sunshine ...	332·8		
	⊖		
The mean temperature of the month	67·1		
The average temperature of December from 20 years' registers ...	65·3		
The highest temperature in the month	82·3	13th	
The lowest temperature in the month	52·7	23rd	
The range of temperature during the month	29·6		
The mean daily range of temperature	20·2		
The greatest range of temperature in one day	24·6	23rd	
	Per cent.		
The mean humidity of the month	70		
The average humidity of December from 20 years' registers ...	70		
	Inches.		
The mean vapour tension of the month	0·467		
The average vapour tension of December from 20 years' registers	0·432		
The mean cloud proportion of the month	3·48		
The average cloud proportion of December from 29 years' registers	1·62		
	Inches.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 8 feet above the ground) ...	Nil		
The average fall of December from 24 years' registers ...	0·31		
The greatest fall in 24 hours	Nil	3rd	
	Days.		
The number of rainy days in the month	0		
The average number of rainy days in November from 24 years' registers	0		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	128·2		
The mean difference of sun and air temperatures	50·1		
The greatest sun temperature	140·5	18th	
The greatest excess of sun over air temperature	58·2	13th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	52·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	7·7	25th	
	Miles.		
The mean movement of the wind per day	51·2		
The greatest movement of the wind in one day	105·0	23rd	
The greatest movement of the wind in one hour	15·0	23rd	11 to Noon.

The number of hours with winds from each of the eight points—

N. 403, N.E. 15, E. 10, S.E. 4, S. 13, S.W. 10, W. 2, N.W. 26, Calm 261.

The average temperature of the corresponding period for 24 years, Surveyor-General's Office		67·0
The extreme variation of temperature		27·2
The maximum temperature		80·5
		Miles.
The highest velocity of the wind in one hour		10
		%
The mean relative humidity		73
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		71
		Inches.
The total fall of rain from 6th to 10th January 1907		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·07
The total fall from 1st January to 12th January 1907		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·11

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

, dew.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA, FOR THE YEAR 1905-06.

No. 60Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 11th January 1907.

RESOLUTION.

READ—

Administration Report of the Commissioners of the Port of Calcutta, for the year 1905-06.

Revenue Receipts and Expenditure.

The income of the year 1905-06 amounted to Rs. 89,55,395, against Rs. 89,10,114 in 1904-05. The expenditure amounted to Rs. 86,64,987. The balance of receipts over expenditure during the year after deducting Rs. 332 under the bad debt account in respect of transactions previous to 1st April 1905 was Rs. 2,90,076. Adding this amount to the accumulated balance of previous years, the total surplus revenue on the 31st March 1906 was Rs. 31,60,501.

Disposal of Surplus Revenue.

2. Of this surplus revenue, Rs. 25,98,384 have been set aside as a Revenue Reserve Fund, Rs. 1,51,531 have been contributed for Capital outlay, Rs. 1,67,365 have been allotted to the Fire Insurance Fund, and Rs. 2,43,221 have been carried forward against miscellaneous advances and outstanding earnings.

Capital outlay.

3. A sum of Rs. 53,26,905 was spent on various new works; the following are some of the more important works completed or in progress during the year:—

A four-storied warehouse at the Jetties.
Eighteen hydraulic cranes for handling cargo from and into vessels.
The second graving Dock.
An additional coal berth.
A new crane dredger and twelve mud punts.
Reconstruction of Jetty No. 2, and extension of jetties to provide for two additional berths.
Improvement of the Port Trust Railway.
Extension of the hide depôts.
Remodelling of the petroleum wharf at Budge-Budge.
Construction in England of the suction dredger *Sandpiper*.

4. The capital debt of the Trust on 31st March 1906 was Rs. 5,30,41,456. Against this debt, the Commissioners hold properties, including works in progress, stock of stores and materials, cash and securities in hand, aggregating Rs. 7,12,67,008; this does not include the value of the Strand Bank and Howrah Foreshore lands, the capitalized value of which, at present rates of rent, amount to a considerable sum. Sinking Funds amounting to Rs. 52,36,612 have been accumulated by annual contributions from revenue for the repayment of the debenture loans and may also be treated as an asset. The position of the Commissioners in respect of their debt is therefore satisfactory.

Depreciation and Insurance Funds.

5. In addition to the Revenue Reserve Fund and Sinking Funds, the Commissioners have a Depreciation Fund for vessels and plant, and a Fire Insurance Fund. The addition made to the Depreciation Fund during the year amounted to Rs. 1,37,124; a sum of Rs. 76,481 had to be withdrawn to meet capital expenditure chargeable to the fund, leaving a balance of Rs. 8,29,392 at the close of the year. The sum at credit of the Fire Insurance Fund at the close of the year was Rs. 5,99,935.

Working results for 1905-06 compared with those of 1904-05.

6. The following table shows the details of the receipts and charges of the Revenue account for the year under review as compared with similar figures of the previous year:—

Statement comparing working results for 1905-06 with those for 1904-05.

Total ...	80,76,785	90,06,067	40,06,615	37,14,597	89,10,114	92,56,742	39,76,542	38,99,217	3,17,302	6,56,982	

In May 1905 reductions in the charges for night work, and for shipping and landing certain classes of goods were granted. During the year the saving to the trade by these reductions amounted to Rs. 3,04,900, while, had the rates

current in 1902 for services rendered generally been still in force, the receipts for 1905-06 would have been increased by Rs. 10,80,000 on the volume of the trade of the year.

The receipts from river dues show a decrease by Rs. 70,809 this year. They exceed, however, the receipts, of the year 1903-04 by Rs. 3,90,141. The question of treating these dues as a permanent source of income is under consideration.

The Railway receipts which fell off during 1904-05 show a considerable increase. This is due mainly to the large increase in exports of coal; there was also a reduction in the hire of rolling stock from foreign railways.

The decrease in the receipts from the wet docks is stated by the Commissioners to be due to reductions in rates to the amount of Rs. 3,: 6,637.

The dry dock continues to give a good return on the Capital cost. The surplus on the year's work was Rs. 1,57,252, or 18 per cent. on the Capital outlay of Rs. 8,65,818.

The exports over the Dock quays aggregated 3,348,802 tons, against 3,326,370 tons in 1904-05. The principal increases are under the heads, coal, jute and cotton.

The export of coal was the highest on record, being 23 per cent. in excess of the shipments in 1904-05, which in turn were 25 per cent. more than the previous record year of 1903-04. The Imports landed at the docks showed a great increase, the total quantity of goods so imported being 206,432 tons, against an average of 15,613 tons during the past five years. This increase is chiefly in the items "Salt," "Sugar" and "Sleepers."

Vessels berthed at the Jetties.

7. Two hundred and fifteen vessels with an aggregate tonnage of 728,446 were accommodated at the Jetties.

The following table shows the number of vessels detained for want of berths:—

No. of days delayed.	No. of vessels.		
	1903-04.	1904-05.	1905-06.
1	18	32	38
2	14	17	34
3	5	13	27
4	3	..	17
5	3	1	16
6	1	..	7
7	...	...	2
	44	63	141 vessels.
	94	110	391 days.

Besides the above, 65 vessels with a tonnage of 192,787 discharged at the docks for want of accommodation at the Jetties. Although 60 per cent. of import cargo steamers were delayed for want of jetty berths, the average period during which each of the berths were vacant during the year was 19 days

The Commissioners are providing additional accommodation at the Jetties.

Survey of the river.

8. The following table illustrates the operations of the River Survey Department:—

	1885.	1900-01.	1901-02.	1902-03.	1903-04	1904-05.

* The number of soundings actually taken and recorded by the Surveyors in field-books was 592,427, against 514,391 in 1903-04.

Of the small river charts published, 95,564 copies were distributed to Pilots, Harbour Masters and the shipping, against 86,946 copies in 1904-05.

Number of charts published.

9. Mr. F. G. Dumayne held the office of the Vice-Chairman throughout the year.

By the amendment of the Calcutta Port Act, 1890, the number of Commissioners have been increased from 15 to 16, and the Chamber of Commerce has been authorised to elect six representatives instead of five.

The thanks of the Lieutenant-Governor are due to the Commissioners for their able management of the affairs of the Trust during the year under review.

By order of the Lieutenant-Governor of Bengal,

W. A. INGLIS,

Secretary to the Government of Bengal.

THE MONSOON OF 1906.

THE following report is published for general information.

R. W. CARLYLE,
Offg. Chief Secy. to the Govt. of Bengal.

The 21st January 1907.

RAINFALL SUMMARY FOR THE MONSOON PERIOD OF 1906.

THE following remarks are intended to give a brief account of the distribution of actual rainfall over the Province of Bengal during the past South-West Monsoon, *i.e.*, for the period May to October, without any attempt to discuss the atmospheric conditions with which the rainfall is generally associated.

The cold-season months of January and February were remarkable for the heavy rainfall that occurred throughout the Province, more especially February, the total rainfall for which month was exceptionally heavy, being 490 per cent. of the normal in South-West Bengal, 420 in Bihar, 330 in Orissa and 690 in Chota Nagpur, and the number of rainy days being from three to five times greater than usual.

During the month of March, the fall was nearly double as much as usual in Chota Nagpur and South-West Bengal. It was in excess in Bihar, but in large defect in Orissa.

In April, the rainfall was in defect in every Division.

The month of May was characterised by generally deficient rainfall over the whole Province. The defect was greatest in South Bihar and Chota Nagpur, the districts of Gaya, Patna and Shahabad recording less than 40 per cent. of the normal, and Hazaribagh, Palamau and Manbhum less than 50 per cent. In Sambalpur only, a tenth of an inch of rain fell during the whole month. Jessore, Darbhanga and Monghyr were the only districts that received more than the normal amount. Little or no rain fell till the 10th of the month, except in Darjeeling and Thibet. In South-West Bengal, rain was fairly general from the 10th to the 21st, when it diminished to some extent. In Orissa and Chota Nagpur, scattered showers fell from the 10th to the end of the month.

The month of June is of special interest, as the advance of the monsoon current up the Bay and the commencement of the rains in Bengal usually take place during this month. The monsoon during the past year can scarcely be said to have "burst" on any particular day in Bengal, but it may be regarded as having actively set in about the 18th of June (as noted in the monthly summary for the month of June by the Meteorologist, Calcutta). Although the monsoon was established in Lower Bengal about the middle of June, rainfall was deficient in all Divisions, the defect being greatest in South-West Bengal. Taking the district returns, Balasore and a few districts in Bihar alone received an excess rainfall, while nearly every district in South-West Bengal and Chota Nagpur received less than 70 per cent. of its normal amount.

In July, though rainfall was of a monsoon character, it was not equally distributed in all the Divisions of the Province. Bihar and Chota Nagpur received an excess of 104 and 105 per cent., respectively, while there was slight defect in South-West Bengal and Orissa, the former receiving 94 per cent. of the normal and the latter 91 per cent.

The month of August was marked by very heavy precipitation in some parts of Bihar. The districts of Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, Darjeeling and Purnea, received an average rainfall in considerable excess of the normal. The departure from the normal at Saran was +5·01, at Champaran + 15·37, at Muzaffarpur +11·29, at Darbhanga + 12·55, at Bhagalpur + 3·33, at Darjeeling + 23·87 and at Purnea + 10 11

inches. Expressed as a percentage, on the normal, the above districts received 146, 220, 203, 200, 129, 196 and 167 per cent. respectively. The districts of Burdwan, Birbhum, Nadia, Murshidabad and Jessore also received an average in excess of the normal varying from 2 to 5 inches.

The most striking feature in the rainfall of September was the partial break in the rains throughout the Province from the 15th to the 24th. The rainfall was deficient in all districts with the exception of Nadia and Jessore (in South-West Bengal), Gaya (in Bihar), Balasore (in Orissa) and Singhbhum (in Chota Nagpur) where it was in slight excess. The rainfall during the month was more or less of a local character. Expressed in percentage figures, the districts of Nadia and Jessore received 123 and 121 per cent. respectively, Gaya 121 per cent., Balasore 116 per cent., and Singhbhum 125 per cent.

About the middle of October, there was again a partial break in the rainfall, but towards the end of the month, rain fell in all the Divisions, except Bihar. The fall was below the normal only in the district of Khulna in South-West Bengal, while in Bihar there was a general defect, except in the Sonthal Parganas. Rainfall was also deficient in Orissa (in the districts of Angul and Balasore) and in Chota Nagpur (in the districts of Hazaribagh, Palamau and Singhbhum). The total rainfall for the month shows a considerable excess in South-West Bengal and Chota Nagpur, and a considerable defect in Bihar and Orissa.

On the whole, the South-West Monsoon rainfall of 1906 was ill-distributed, especially in North Bihar.

Expressed as a percentage, South-West Bengal received during the whole period, 87 per cent. of the normal, Bihar 94 per cent., Orissa 79 per cent., and Chota Nagpur 84 per cent. Of the four Divisions, Bihar alone received about its normal average.

Actual rainfall in inches during 1906.

19	Monghyr ...	Nil	$8\frac{1}{2}$ / $12\frac{9}{16}$*	$7\frac{1}{2}$ / 12*	Weather seasonable. *Rabi* crops doing well, but rain wanted. No cattle-disease reported. Fodder and water sufficient.
20	Bhagalpur ...	Nil	$8\frac{4}{5}$ / $12\frac{2}{5}$*	$8\frac{1}{5}$ / $12\frac{2}{5}$*	Weather seasonable. Harvesting of paddy practically completed. Rain badly wanted for *rabi* crops. Cattle-disease reported in five villages of Madhipura thana. Fodder and water sufficient.
21	Purnea ...	Nil	7 / 10*	7	Weather seasonable. Harvesting of winter paddy nearly finished and that of mustard commenced. High prices of food-grains prevailing. Rain needed for *rabi* crops. No cattle-disease. Fodder and water plentiful.
22	Darjeeling ...	0·12	7 / 11*	7 / 11*	Weather cold. Hills—Wheat, barley and mustard in fair state. Terai—Reaping of winter rice nearly finished. Mustard, tobacco and sugarcane doing well.
23	Santhal Parganas.	Nil	9 / 13*	10* / 14*	Harvesting of winter rice over. Prospects of *rabi* crops fair. Cattle-disease reported at the Sadr and Deoghar Subdivisions. Fodder and water sufficient.
24	Cuttack ...	Nil	$10\frac{1}{2}$	$10\frac{1}{2}$	*Surad* and sugarcane being harvested. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	10	10	Weather cold. Threshing of *sarad* and pressing of sugarcane continuing. *Rabi* crops and vegetables growing well. Prospects fair. No cattle-disease. Fodder and water sufficient.
26	Angul ...	Nil	$11\frac{1}{2}$	$11\frac{1}{2}$	Weather cold. *Rabi* harvesting and sugarcane-pressing in progress. Cattle-disease abated. Fodder and water sufficient.
27	Puri ...	Nil	$10\frac{1}{2}$	$10\frac{1}{2}$	Weather seasonable. Cutting of *sarad* paddy continuing. Sowing of *mung* continuing. Sugarcane being pressed. *Arhar* and mustard being harvested. Other *rabi* crops getting on well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	Nil	11	$11\frac{1}{2}$	Weather chilly and clear. Threshing of autumn rice finished and that of winter rice in progress in Sambalpur tahsil. Threshing finished in Bargarh tahsil. Pressing of sugarcane in progress. Rice-fields are being ploughed for the next crop. Condition of brinjal, tobacco and chillies good. Outturn of sugarcane estimated at 14 to 16 annas. No cattle-disease. Fodder and water-supply sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	...	9	9	Prospects of standing crops good. Sugarcane-pressing going on. Irrigated poppy doing well. Unirrigated crops failed. Cattle-disease reported from four thanas. Fodder and water sufficient.
30	Ranchi ...	Nil	10	10	Weather seasonable. Ploughing of lands in progress. Standing crops doing well. Cattle-disease reported from two thanas. Fodder and water sufficient.
31	Palamau ...	Nil	10½	10½	Weather seasonable. Mustard being harvested. Standing crops doing well. Few cases of cattle-disease reported. Fodder and water sufficient.
32	Manbhum ...	Nil	9½	9½	Weather seasonable. Prospects of crops good. Cattle-disease reported from Gourangdi. Fodder and water sufficient.
33	Singhbhum ...	Nil	9	9	Harvesting of winter paddy finished. Pressing of sugarcane going on in Kharsawan. Common rice selling at 10 seers a rupee at Kharsawan. Cattle-disease report from thana Chakradharpur. Fodder and water sufficient.
34	Cooch Behar	Nil	6¼	6¼	Weather cold. Cattle-disease reported from Mathabhanga subdivision. Fodder and water sufficient.

General Summary.—Except in Darjeeling where the fall amounted to 0·12 inches, no rain fell during the week. Harvesting of *aman* paddy has been completed in almost all districts. Pressing of sugarcane continues. Rain is required yet for *rabi* crops in Nadia, Murshidabad, Jessore, Gaya, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur and Purnea. Prospects of *rabi* are on the whole satisfactory. The number of persons receiving gratuitous relief is—Muzaffarpur 801, and Darbhanga 17,441. The number of persons on test and famine relief works in Darbhanga is 1,891 and 58,114 respectively. Cattle-disease is reported from ten districts. Fodder and water are sufficient. Small-pox continues in parts of Burdwan, and cholera is reported from Birbhum and Jessore. The price of common rice has risen in six and fallen in five districts.

C. A. OLDHAM,

Director of Agriculture, Bengal.

‡ Trade carried by these railways was not registered previous to April 1906

F. NOEL-PATON,
Director-General of Commercial Intelligence

January 22, 1907.

T. W. RICHARDSON,
Offg. Secretary to the Government of Bengal

METEOROLOGICAL REPORT OF THE PROVINCES OF BENGAL AND OF EASTERN BENGAL AND ASSAM FOR THE MONTH OF DECEMBER 1906.

Division.	District.	Representative Stations.	Air Pressure. Highest, 8 A.M., barometer reading.	Lowest, 8 A.M., barometer reading.	Mean, 8 A.M., reduced to 32°.	Mean reduced to sea-level and normal gravity, Lat. 45°.	Departure from normal.	Wind. Mean direction at 8 A.M.	Mean velocity in miles daily.	Temperature. Highest of month.	Lowest of month.	Mean daily maximum temperature.	Mean daily minimum temperature.	Mean daily temperature.	Departure from normal Mean.	Humidity. Mean, 8 A.M.	Departure from normal mean.	Cloud. Mean cloud amount, 8 A.M.	Departure from normal mean, 8 A.M.	Rainfall.

(a) Mean of 30 days. (b) Mean of 28 days.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF DECEMBER 1906.

In the first week of the month skies were cloudy on the Orissa coast, and on the sixth of the month cloud had extended over the greater part of the reporting area. Temperature was approximately normal, except on the 2nd, 3rd and 4th, when it was higher than usual in parts of Eastern Bengal. On the eighth of the month the skies were clear or very lightly clouded, and temperature became normal and remained so until the 13th, when moderate cloud became fairly general and caused a considerable increase in night temperature. During this week the only fall of rain reported was ·20 inch, which occurred at False Point on the 13th. During the third week of the month skies remained more or less clouded, but no rain was recorded at any of the reporting stations. Temperature was persistently above normal except in Eastern Bengal and Assam, the excess being shown chiefly in night temperature which on several occasions was from 3° to 9° higher than usual. In the fourth week of the month no rain was reported from any of the observing stations. The distribution of temperature was irregular; temperature was approximately normal throughout the week in the eastern half of the division but was high in Chota Nagpur and Orissa until the 24th when a cool wave from the west reached the former area and extended over Orissa and Bihar during the next two days.

In the Bay the weather during the month was characterised by a series of small depressions, which formed in the south and proceeded on the usual westerly track to the coast of Ceylon or the Coromandel coast. The first of these appeared definitely on the fifth, although it gave slight indications of its existence on the fourth. It gave rise to rather stormy weather in the south of the Bay and passed inland on the sixth. The second appeared on the 12th of the month and, judging from the logs of ships in its neighbourhood, must have been accompanied by very strong winds and rough seas. It appears to have filled up about the 15th. On the eighteenth a depression appeared off the coast near Madras, but passed inland without disturbing the weather materially there: it gave, however, moderate to heavy rain inland. A fourth depression appeared in the same region on the 25th and passed inland between Cuddalore and Madras on the 27th. These disturbances were not of a very serious character, and were associated as usual with temporary advances of the retreating monsoon. Their formation was heralded in every case by the change in wind direction at Port Blair to the south-east.

Summary of Temperature.—Weather was warmer than usual over the whole reporting area excepting Assam, where temperature was about normal. The highest temperature recorded during the month was 88·3° at Midnapore and the lowest 38° at Palamau.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of December 1906:—

Meteorological Division.	Temperature.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal	88·3	40·0	76·7	57·3	68·0	+ 1·6
Eastern Bengal, North	82·8	45·1	77·4	54·2	65 8	+ 1·4
Eastern Bengal, South	85·4	49·8	79·2	57·6	68·4	+ 1·8
Bihar	81·3	41·7	76·7	51 9	64·4	+ 1·2
Orissa	85·6	50 8	80·0	61·0	70·5	+ 1·8
Chota Nagpur*	84·4	38·0	76 1	51·9	64 0	+ 1·3
Assam	85·4	43·2	75·8	52·4	64·0	+ 0·3

* Purulia not included.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that Department. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province.

Actual and average rainfall and departure from normal for December 1906.

The average fall of the corresponding period for 24 years Surveyor-General's Office		0·03
The total fall from 1st to 19th January 1907		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·14

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ometers are verified, and the readings have been corrected to a standard constructed and verified at the Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the yor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in eteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is hours preceding 8 A.M. of that day.

☁, dew.

O. W. PEAKE,

WEATHER AND CROP REPORT

For the week ending the 28th January 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	BURDWAN ...	Inches. Nil	8½	8½	Weather hot. Pressing of sugarcane and threshing of paddy going on. Standing crops flourishing. Malarial fever, cholera and small-pox rife in all thanas of the Katwa subdivision. Cholera cases in the Sadr sub-division. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	Nil	8	8	Standing crops doing well. Cholera in some places. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	9	9	Weather seasonable. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	Nil	8	8	Weather seasonable. Sugarcane being harvested. *Rabi* prospects favourable. Water sufficient.
5	HOOGHLY ...	Nil	7½	7½	Weather seasonable. Threshing of winter paddy still continuing. Prospects of potatoes, sugarcane and *rabi* crops fair. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	9	9	Standing crops doing well. No cattle-disease reported. Fodder and water-supply for cattle sufficient.
7	24-PARGANAS	Nil	8½	8½	Weather seasonable. Harvesting of winter rice finished in Barrackpore and nearly finished in other subdivisions. State of standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	Nil	8	8	Prospects of standing crops good except at Chuadanga for want of rain. Cattle-disease continuing in village Palkelpota in Meherpur thana. Fodder and water sufficient except at Chuadanga.
9	MURSHIDABAD	Nil	8 1/16	8½	Weather seasonable. *Aman* harvested. No cattle-disease. Fodder and water sufficient.
10	JESSORE ...	Nil	7½	7½	Weather seasonable. Harvesting of *aman* finished. *Rabi* crops promising, but rain urgently needed. Prospects of sugarcane favourable. High prices. Malarial fever and cholera raging at Sadr and in the interior. No cattle-disease. Fodder and water sufficient except in Magura.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	8½	8	Weather seasonable. State of rape and mustard and tobacco fair. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	Nil	9½ 15½	9 18½*	Weather seasonable. Prospects of *rabi* and poppy good. Threshing and winnowing of paddy going on. Pressing of sugarcane approaching completion. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	Nil	9 4/16 14 4/16*	9 1/16 13 4/16*	Weather cool and clear. Harvesting of paddy coming to an end. Pressing of sugarcane continuing. *Rabi* crops doing well, but rain required. No cattle-disease reported. Fodder and water for cattle sufficient.
14	SHAHABAD ...	Nil	11½ 15*	10½ 13*	*Rabi* crops doing well. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	Nil	9½ 14½*	9½ 14*	Weather seasonable. Pressing of sugarcane and irrigation of poppy going on. Standing crops doing well. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	Nil	9½ 14*	9½ 13½*	Weather cold and dewy. Poppy and other *rabi* crops suffering for want of rain. Sugarcane-pressing continuing. Exports insignificant. Two test-works opened in the Bettiah subdivision. Average attendance during first six days up to and including 22nd, the latest date for which figures are available, 133. No cattle-disease.
17	MUZAFFARPUR	Nil	8½ 14*	8 14*	Weather seasonable. Slight rain reported from one thana in Sitamarhi. Common rice and maize selling at 8½ and 14½ seers a rupee, respectively, at Hajipur and 10 and 13 seers a rupee, respectively, at Sitamarhi. Average daily attendance at kitchens 553. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	8½ 14½*	8 14½*	Weather seasonable. *Rabi* crops looking somewhat better owing to heavy fall of dew. Rain badly required for them. Old common rice selling at 6 4/16 seers a rupee at Sadr. Number of persons on test-works in the Madhubani subdivision on the last day available, 2,270. Number on famine relief works 63,747. Total number of persons gratuitously relieved, including village doles, 17,578. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, &c.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
19	Monghyr ...	Nil	9 12½*	8½ 12 7/16*	Weather seasonable. *Rabi* crops doing well, but in some places rain wanted. Cattle-disease reported from Surajgarha. Fodder and water sufficient.
20	Bhagalpur ...	Nil	8½ 13½*	8½ 12½*	Weather seasonable, getting hot. Paddy harvesting completed. *Rabi* crops thriving, rain required. Cattle-disease reported from five villages in Madhipura thana and Belhar in Banka. Fodder and water sufficient.
21	Purnea ...	—	—	7 10*	Report not received.
22	Darjeeling ...	0·11	7½ 11*	7 11	Weather cold. Hills—Wheat, barley progressing. Terai—Reaping of winter rice nearly finished. Mustard, tobacco and sugarcane doing well.
23	Sonthal Parganas.	Nil	9 13*	9* 13*	Weather seasonable. Prospects of standing crops fair. Cattle-disease reported from Sadr and Deoghar subdivisions. Fodder and water sufficient. Jamtara and Pakour reports not received.
24	Cuttack ...	Nil	10½	10½	*Sarad* and sugarcane being harvested. Tobacco growing well. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	10	10	Weather seasonable. Threshing of *sarad*, pressing of sugarcane and reaping of mustard and *biri* continuing. Other crops and vegetables doing well. Prospects fair. Cattle-pox reported from Bhadrak circle. Fodder and water sufficient.
26	Angul ...	Nil	11½	11½	Weather seasonable. Harvesting of *rabi* crops finished. Sugarcane-pressing going on. No cattle-disease.
27	Puri ...	Nil	9 1/16	10½	Weather seasonable. Cutting of *sarad* paddy still continuing. Sugarcane being pressed. *Arhar* and mustard being harvested. Other *rabi* crops getting on well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	Nil	11	11	Weather clear and cool. Threshing of winter rice in progress. Pressing of sugarcane in progress. Rice-fields are being prepared in the Sadr and Bargarh tahsils for the next crop. Condition of sugarcane, castor, tobacco and chillies good. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	...	9	9	Prospects of standing crops good. Sugarcane-pressing going on. Irrigated poppy doing well. Unirrigated plants failed. Cattle-disease reported from three thanas. Fodder and water sufficient.
30	Ranchi ...	Nil	10	10	Weather getting hot. State of standing crops good. Ploughing continuing. Cattle-disease reported from five thanas. Fodder and water sufficient.
31	Palamau ...	Nil	10½	10½	Weather seasonable. Rain wanted for *rabi* crops. Some cattle-disease reported. Fodder and water sufficient.
32	Manbhum ...	Nil	9½	9½	Weather seasonable. Prospects of crops good. Outturn of *bajra* estimated at 75 per cent. at Gobindpur subdivision. Cattle-disease reported from thanas Purulia and Gourangdi. Fodder and water sufficient.
33	Singhbhum ...	Nil	9	9	Pressing of sugarcane going on. Common rice selling at 10 seers a rupee at Kharsawan. Cattle-disease reported from one thana. Fodder and water sufficient.
34	Cooch Behar	Nil	6¾	6¾	Weather cold. Fodder and water sufficient.

General Summary.—Nominal showers are reported from Darjeeling and Muzaffarpur only. Pressing of sugarcane continues. Prospects of *rabi* crops are on the whole fairly satisfactory, but rain is still needed for them in Nadia, Jessore, Gaya, Champaran, Darbhanga, Monghyr, and Bhagalpur. The number of persons receiving gratuitous relief is—Muzaffarpur 553, and Darbhanga 17,578. Two test-works have been opened in the Bettiah subdivision in Champaran where the average attendance during the first six days up to and including the 22nd instant, the latest day for which figures are available is 133; and the number of persons on test-works in the Madhubani subdivision of Darbhanga on the last day available is 2,270. The number on famine relief works in Darbhanga is 63,747. Cattle-disease is prevalent in nine districts. Fodder and water are generally sufficient. Cholera continues in parts of Burdwan, Birbhum and Jessore, and small-pox is reported from the Katwa subdivision of Burdwan. The price of common rice has risen in four and fallen in eight districts.

N. N. BANERJEI,
for Director of Agriculture, Bengal.

The total fall from 1st to 26th January 1907	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·22

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 55, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

FINAL FORECAST OF THE SUGARCANE CROP OF BENGAL, 1906.

THE following is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

The 2nd February 1907.

DEPARTMENT OF AGRICULTURE, BENGAL.

FINAL FORECAST OF THE SUGARCANE CROP OF BENGAL, 1906.

[On an average of the five years ending 1904-05, the area under the sugarcane crop in the territory to which the forecast relates has represented some 19·03 per cent. of the total area under this crop in British India.]

Character of the season.—The planting season of the sugarcane crop usually extends from December to April. Rain was heavy and frequent in January and February, still conditions during the sowing season were on the whole favourable. May and the early portion of June were dry and the monsoon showers, which set in about the middle of

June, were rather in defect. In Bihar, where the bulk of the crop is cultivated, rain was very unequally distributed. In July and August, the rainfall was very heavy, especially in North Bihar, where the crop suffered from floods, while in September and October, when rain is not harmful to the crop, drought prevailed. In the rest of the Province, however, the rainfall was favourable to the crop.

2. *Area planted.*—The normal area under sugarcane in this Province is estimated at 429,500 acres and the actual area planted with the crop this year is reported to have been 423,500 acres against 421,600 acres sown last year.

3. *Outturn.*—Seven districts estimate an outturn of 100 per cent. and over, nine between 90 and 99 per cent., eight between 80 and 89 per cent., six between 70 and 79 per cent., and three between 60 and 69 per cent. Since the submission of the preliminary forecast, prospects have improved in 7 districts and deteriorated in 13 districts. According to the district returns, the outturn of the Province works out to 87 per cent. as against 92 per cent. shown in the preliminary forecast. The decrease is due to the unfavourable character of the weather that prevailed in Bihar since the preliminary forecast was issued. In several cases, the District Officers have not given sufficient reason for estimating less than a normal crop, and I would raise the total outturn to at least 90 per cent., of the normal. Taking the Provincial outturn at 90 per cent., the probable gross outturn of cane *gur* (at 22 cwts. per acre) comes to 8,385,300 cwts. against 8,533,200 cwts. of last year.

4. *Other sources of gur.*—The total quantity of *gur* obtained from the juice of the date-palm is reported as 1,559,679 cwts., and that from the palmyra palm, 62,039 cwts. The chief centre of the preparation of date-palm *gur* is Jessore, but some is also manufactured in Khulna, Nadia and the 24-Parganas.

C. A. OLDHAM,

Director of Agriculture, Bengal.

CALCUTTA,
The 25th January 1907.

APPENDIX I.

Final Forecast of the Sugarcane Crop of Bengal, 1906.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1905), in acres.	Estimated area under sugarcane this year (1906), in acres.	Taking 100 to represent the normal outturn, how much does the outturn last year (1905) represent?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906)?	FIGURES FROM THE CADASTRAL SURVEY.			Remarks by District Officers.	Remarks by the Department of Agriculture, Bengal.
									Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under this crop the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14
									Acres.		Acres.		
Burdwan ...	Burdwan ...	1,731,200	1,384,960	27,000	23,000	25,000	85	95	46,196	1889 to 1891 and 1903 to 1906.	476		
	Birbhum ...	1,151,360	794,720	9,000	9,000	8,000	70	79	46,471	1889 to 1891 and 1905.	184	The area in column 10 has been increased by 7,322 acres on account of the Survey and Settlement of Mouzrams, Kenogoria, Dubrajpur and Kismat Dubrajpur.	
	Bankura ...	1,977,440	642,800	15,000	13,000	13,500	75	80	14,745	1899 to 1902.	80	There was want of rain in May and June, and the outturn is therefore expected to be low.	
	Midnapore ...	3,313,640	2,190,800	20,200	17,200	17,400	82	90	33,343	1893 to 1896.	572		
	Hooghly ...	761,216	382,800	13,000	11,000	10,000	92	95	...	...	...	There was want of rain at the time of sowing and the outturn is therefore low.	
	Howrah ...	336,000	252,000	2,000	2,000	2,000	97	97	...	...	...	The condition of the crop is generally good.	

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1905), in acres.	Estimated area under sugarcane this year (1906), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1905)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906)?	Figures from the Cadastral Survey.			Remarks by District Officers.	Remarks by the Department of Agriculture, Bengal.
									Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under this crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14
									Acres.		Acres.		
Presidency ...	24-Parganas ...	3,100,160	1,079,700	4,900	4,500	4,400	95	88	...	...	...	The figure in column 5 has been revised after careful enquiry. Want of timely rainfall accounts for the low outturn and decrease in area as compared with the previous year. The weather was on the whole unfavourable.	
	Nadia ...	1,787,520	1,043,600	11,400	7,900	6,900	69	60	Not cadastrally surveyed.				
	Murshidabad	1,371,520	986,500	14,700	13,700	13,500	93	92	...	...	...	The weather was good for the crop, but floods did some damage, hence the decrease in the outturn as compared with that shown in the preliminary forecast. The thana officers have reported figures for area sown this year after careful enquiry, hence the difference in the entry in column 7 as compared with that shown in the same column of the preliminary forecast.	
	Jessore ...	1,972,800	1,191,060	15,000	10,400	10,600	67	74	...	...	...	The weather was favourable. Floods at Magura having damaged some plants, the outturn is less than that shown in the preliminary forecast.	
	Khulna ...	3,049,840	870,400	1,300	1,200	1,200	100	100	25,631	1899 to 1900 and 1903 to 1905.	...	.....	

Patna ...	Patna ..	1,326,000	1,003,100	25,200	19,000	19,200	80	72	73,164	1900 to 1901.	200	The decrease in the outturn is due to scanty rainfall in October and to the absence of rain thereafter.
	Gaya ...	3,015,600	2,307,500	52,000	39,200	39,464	100	100	874,009	1896 to 1895 and 1900 to 1903.	6,530	The weather was favourable for the cultivation of the crop. Its general condition is good. The crop suffered slightly by the appearance of locusts in the Aurangabad Subdivision. The figure 65·4 as returned to this office is too low. From what I have seen in the District, I should say the crop was a good one. The figure 96·4 should be raised to 100 at least.
	Shahabad ..	2,795,725	1,851,200	36,000	30,000	40,000	90	80	...	...	...	Damage is said to have been done to the crop in Buxar by the *Kutai* insect and in Sasaram by untimely rain, so that I have reduced the final forecast to 80 from 100 of the preliminary forecast.
	Saran ..	1,711,280	1,227,200	36,500	30,400	40,700	90	70	1,711,280	1895 to 1901.	30,500	At the outset, the season was favourable to the crop, but afterwards strong west winds and drought affected it to a considerable extent.
	Champaran ...	2,220,240	1,447,600	16,200	11,200	15,100	86	76	2,070,215	1892 to 1893 and 1895 to 1896.	11,155	The short outturn is due to floods in August and to scanty rainfall in September and October.
	Muzaffarpur	1,923,400	1,227,900	8,200	9,500	9,600	82	69	1,923,400	1891 to 1892 and 1899 to 1900.	6,765	.....
	Darbhanga ...	2,142,600	1,676,000	17,000	15,600	16,500	100	70	2,142,600	1896 to 1903.	17,000	Owing to heavy floods, the outturn is lower than that shown in the preliminary forecast, viz., 70 against 96.
Bhagalpur	Monghyr ...	2,610,600	1,662,200	6,600	7,000	6,800	95	91	...	...	...	.....
	Bhagalpur ...	2,794,540	2,073,200	20,000	22,000	22,000	98	91	1,314,000	1902 to 1904.	3,700	The decrease in the outturn is due to damage caused by floods.
	Purnea ...	3,195,183	1,694,400	13,400	9,400	10,600	95	65	...	...	...	The weather was not favourable.
	Darjeeling ...	745,900	160,800	1,500	1,200	1,200	80	60	200,519	1897 to 1898 and 1901 to 1902.	157	The difference between the figures of area sown with the crop as shown in the preliminary and final statements is due to the normal area having been revised. The weather not having been favourable, the outturn is less than what was anticipated before.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1905), in acres.	Estimated area under sugarcane this year (1906), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1905)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906)?	Figures from the Cadastral Survey.			Remarks by District Officer.	Remarks by the Department of Agriculture, Bengal.
									Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under this crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14
									Acres.		Acres.		
Bhagalpur ...	Santhal Parganas.	3,800,800	1,445,300	13,400	14,800	13,800	120	116	2,756,120	1899 to 1903.	11,237	The increase in the area is due to the cultivation of sugarcane where indigo was grown before. The area under sugarcane at Rajmahal and the estimated outturn at Dumka have been found on enquiry to be less than what was reported in the preliminary forecast.	
Orissa	Cuttack ...	2,338,880	1,238,500	2,300	4,100	3,500	95	93	2,088,423	1898 to 1905 and 1901.	1,900	The lower outturn this year is due to short rainfall.	
	Balasore ...	1,334,300	933,240	4,600	2,000	2,100	100	100	1,095,775	1891 to 1892 and 1894 to 1895.	471	—	
	Angul ...	1,075,840	252,400	2,300	2,300	2,300	90	100	...	...	...		
	Puri ...	1,500,300	750,300	2,100	2,700	2,300	96	97	1,274,700	1898 to 1899.	613	The weather was favourable. The general condition of the crop is fairly satisfactory. The date of planting was normal.	
	Sambalpur ...	2,447,300	326,000	2,700	4,100	4,600	88	105	2,444,107	1894 to 1897 and 1897 to 1897.	5,927	The weather and the general condition of the crops have been good so far, except in the Bengali Circle of the Sadr Subdivision where some insects locally called *Dhawa* and *Leekha* injured the crop to some extent.

WEATHER AND CROP REPORT.

For the week ending the 4th February 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	0·91	8½	8½	Weather damp. Rain in every subdivision. Pressing of sugarcane and threshing of paddy continuing. Standing crops flourishing. Public health in the Katwa subdivision not good. Cholera rife in the Sadr subdivision. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	0·68	9	8	Standing crops doing well. Cholera in some places. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	1·66	9	9	Weather cloudy. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	0·39	8	8	Rainfall general. Sugarcane planting in progress. Oilseeds promising. Outturn of early cotton in Sadr 60 per cent. Cholera everywhere since *mela*. Cattle-disease reported in thana Jhargram. Fodder and water sufficient.
5	HOOGHLY ...	0·60	7	7½	Weather slightly hot. Rainfall general in the district. Threshing of winter paddy still continuing. Pressing of sugarcane commenced in Arambagh. Prospects of *rabi* and potatoes fair. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	0·14	8½		Standing crops doing well. In the Uluberia subdivision seedlings of *boro* rice being planted. No cattle-disease. Fodder and water-supply sufficient.
7	24-PARGANAS	0·04	8½	8½	Weather seasonable. Harvesting of winter rice nearly finished in the Basirhat and Diamond Harbour subdivisions. Lands being prepared for the ensuing crops in Sadar. Harvesting of *rabi* crops and sugarcane going on. State of standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	0·84	7½	8	Prospects of standing crops good. Recent rain done good. No cattle-disease. Fodder and water sufficient.
9	MURSHIDABAD	0·89	8	8 1/16	Weather cloudy. Sugarcane and other standing crops doing well, but rain wanted for *rabi* crops. No cattle-disease. Fodder and water sufficient.
10	JESSORE ...	0·44	7 1/16	7½	Weather seasonable. Rainfall general. Prospects of standing crops fair. More rain wanted. Malarial fever and cholera raging at Sadr and in the interior. High prices. No cattle-disease. Fodder and water sufficient except in Magura.

No.	Name of district.	Rainfall at Radar station.	Price of common rice, in seers per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	9	8½	Weather seasonable. Rainfall at Bagerhat 0·87. State of rape and mustard and tobacco fair. Outturn of til estimated at 100 per cent. at Satkhira. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	0·12	9½ 15½*	9½ 15½*	Weather rainy and cloudy. Poppy and other *rabi* crops doing well. Harvesting of *masur* and peas commenced in places. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	0·74	9 11/16 13 13/16*	9 5/16 14 5/16*	Weather cloudy on three days; cool and clear during the rest of the week. Harvesting of paddy practically finished. Pressing of sugarcane continuing. *Rabi* crops doing well. Light showers in the district and somewhat heavy rain at Sadr beneficial. Fodder and water for cattle sufficient.
14	SHAHABAD ...	0·30	11 15*	11½ 15*	Rainfall at Buxar 0·02, Dehri 0·07. Harvesting of *rabi* crops commenced. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	Nil	10 15½*	9½ 14½*	Weather cloudy. Pressing of sugarcane going on. Standing crops doing well. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	0·28	9½ 14½*	9½ 14*	Rainfall at Bettiah 0·07. Slight rain with hail. More rain wanted for poppy and other *rabi* crops. Prospects fair. Sugarcane pressing continuing. Exports far less than imports. Average attendance on two test works for week ending 29th January 608. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	9 14*	8½ 14*	Weather seasonable and cloudy. Rain required for *rabi* crops. Common rice and maize selling at 9 and 16 seers a rupee, respectively, at Hajipur and 10 and 13½ seers a rupee, respectively, at Sitamarhi. Attendance at kitchens on 30th January 570. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	8½ 13½*	8½ 14½	Weather seasonable. Some *rabi* crops being harvested. Number of persons on testworks in the Madhubani subdivision on the last day available, 2,036. Number on famine relief works 61,086. Total number of persons gratuitously relieved, including village doles 16,350 showing decrease on last week's figures. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
19	Monghyr ...	Nil	8¼ 12 2/16*	9 12 4/16*	Weather seasonable, but cloudy. *Rabi* crops doing well, but rain wanted. Cattle-disease reported from thana Kharagpur. Fodder and water sufficient.
20	Bhagalpur ...	Nil	8¼ 13½*	8¾ 13½*	Weather cloudy and drizzly. Paddy harvesting almost completed. Sugarcane being pressed. At Supaul sugarcane being planted. Rain wanted. *Rabi* crops thriving. Cattle-disease reported from five *mauzas* in Madhipura and Bhimnagar outpost of Supaul. Fodder and water sufficient.
21	Purnea ...	Nil	7½ 10*	7½ 10*	Weather cold and cloudy. Harvesting of *aghani* paddy almost completed. Prospects of *rabi* crops fair, but rain wanted to improve them. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	0·23	7 11*	7½ 11*	Weather cold. Hills—Wheat, barley, mustard in fair state. Terai—Reaping of winter rice finished. Standing crops doing well.
23	Sonthal Parganas.	0·80	9 16*	9 13*	Weather seasonable. Prospects of *rabi* crops fair. Cattle-disease reported from Sadr and Deoghar subdivisions. Fodder and water sufficient.
24	Cuttack ...	Nil	10½	10½	Slight rain fallen. Cotton and tobacco growing well. Sugarcane being harvested. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	0·75	9½	10	Weather seasonable. Threshing of *sarad*, harvesting of mustard and pressing of sugarcane continuing. Other *rabi* crops and vegetables thriving. Prospects fair. Rinderpest reported from Balasore circle. Fodder and water sufficient.
26	Angul ...	0·10	10½	11½	Weather seasonable. Sugarcane-pressing going on No cattle-disease. Fodder and water sufficient.
27	Puri ...	Nil	10½	9 4/16*	Weather seasonable. *Sarad* being harvested. Cotton growing well. Sugarcane being pressed. *Dalua* being sown. *Kulthi*, *arhar* and mustard being harvested. Other *rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	Nil	11	11	Weather cool and cloudy. Threshing of winter rice finished. Pressing of sugarcane in progress. Fields being ploughed for the next harvest. Condition of sugarcane good. Cattle-disease is prevalent in one village in Bargarh tahsil. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	—	9	9	Prospects of standing crops good. Sugarcane-pressing going on. Rain badly wanted for poppy. Cattle-disease reported from one thana. Fodder and water sufficient.
30	Ranchi ...	1·07	10	10	Weather little cloudy. Ploughing of lands continuing. Standing crops doing well. Cattle-disease reported from four thanas. Fodder and water sufficient.
31	Palamau ...	0·41	▮	10½	Weather cloudy. Crops benefitted by rain in Daltonganj and Hussanabad thanas. Cattle-disease still in six thanas. Fodder and water abundant.
32	Manbhum ...	1·23	10	9¼	Weather seasonable. Prospects of crops good. *Til* and tobacco ripening. Cattle-disease reported from thana Gourangdi.
33	Singhbhum ...	0·66	9	9	Pressing of sugarcane going on. Common rice selling at 10 seers a rupee at Seraikella and Kharsawan. Cattle-disease reported from one thana. Fodder and water sufficient.
34	Cooch Behar	0·47	7½	6½	Weather cold. Harvesting of mustard commenced. Cattle-disease reported from subdivision Mathabhanga. Fodder and water sufficient.

General Summary.—Rainfall was moderate and fairly general in Lower Bengal and Chota Nagpur. Some light scattered showers fell also in parts of Bihar and Orissa. More rain is needed for the *rabi* crops in Murshidabad, Jessore, Champaran, Muzaffarpur, Monghyr, Bhagalpur, Purnea and Hazaribagh. Sugarcane pressing continues. The prospects of the *rabi* are fair except in Champaran, Muzaffarpur and Darbhanga. The number of persons receiving gratuitous relief is—Muzaffarpur 575 and Darbhanga 16,350. The average attendance on test-works in Champaran for the week ending the 29th January is 608 and in Darbhanga on the last day available 2,036. The number on famine-relief works in Darbhanga is 61,086. Cattle-disease is reported from twelve districts. Fodder and water are generally sufficient. Cholera continues in parts of Burdwan, Birbhum and Jessore. The price of common rice has risen in eleven and fallen in ten districts.

		%
The mean relative humidity		63
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		71
		Inches.
The total fall of rain from 27th January to 2nd February 1907		0·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·24
The total fall from 1st January to 2nd February 1907		0·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·46

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

&, dew; o, overcast; d, drizzling rain.

C. W. PEAKE,
for *Director-General of Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 4th February 1907.

FIRST FORECAST OF THE WHEAT CROP OF BENGAL, 1906-1907.

THE following note is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPT.;
The 8th February 1907.

DEPARTMENT OF AGRICULTURE, BENGAL.

FIRST FORECAST OF THE WHEAT CROP OF BENGAL, 1906-1907.

[On an average of five years ending 1904-1905, the area under wheat in the territory to which this forecast relates has represented some 5·0 per cent. of the total area under wheat in India.

The ratio of irrigated wheat acreage to total wheat acreage (*a*) in British India and (*b*) in the territory now reported on, has in the five years ending 1904-1905 averaged (*a*) 38·3 per cent. and (*b*) 2·4 per cent., respectively.]

Character of the season.—Wheat is grown chiefly in Bihar. Outside Bihar, the only important wheat-growing districts are Murshidabad and Nadia. There is practically no wheat grown in Orissa. Owing to the cessation of the monsoon rains early in October, the sowings were made at the normal

time ; but drought has prevailed since, and the crop has suffered in most of the Bihar districts, especially in North Bihar. On the whole, the season has not been favourable.

2. *Area sown.*—Since the issue of the final forecast of the wheat crop for 1905-06, the District Officers of Burdwan, Midnapore, Gaya, Saran, Bhagalpur and Darjeeling have revised the normal area under the crop, which now stands at 1,300,700 acres. The actual area sown this year is shown as 1,323,900 acres, against 1,211,100, acres sown last year.

3. *Outturn.*—Not a single district returns a normal crop. Five districts return crops between 90 and 95 per cent., six districts between 80 and 89 per cent., and twelve districts between 70 and 79 per cent. Murshidabad returns a 67 per cent. crop, and the remaining five districts return 50 to 59 per cent. crops. According to the estimates of the District Officers, the outturn for the whole Province works out to 77 per cent. of a normal crop.

C. A. OLDHAM,

Director of Agriculture, Bengal.

CALCUTTA ;

The 4th February 1907.

First Forecast of the Wheat Crop of 1906-1907.

DISTRICT.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under wheat in acres.	Approximate area under wheat last year (1905-1906) in acres.	Estimated area under wheat this year (1906-1907) in acres.	Taking 100 as represent the normal outturn, how much represented the outturn last year (1905-1906)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906-1907)?	FIGURES FROM THE CADASTRAL SURVEY.			Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop and whether the date of sowing was this year early, normal or late.
								Total area of the district which has been cadastrally surveyed.	Years in which the cadastral survey took place.	Area found under this crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13
								Acres.		Acres.		
Burdwan ...	1,721,904	1,204,300	1,200	1,700	1,200	75	53	46,140	1889 to 1892 and 1903-1904 and 1904-1905.	45	November.	
Birbhum ...	1,121,280	784,700	3,000	3,000	3,000	50	50	45,671	1889 to 1891 and 1903.	Not known.	End of October ...	The weather has been favourable to the crops. Sowing has been normal. The area in column 9 has been increased by 7,822 acres on account of the Survey and Settlement of Mowgram, Rampurhat, Dubrajpur and Nanoor Dubrajpur
Bankura ...	1,077,440	646,500	1,100	1,000	1,000	90	95	15,315	1889 to 1892 and 1894 to 1900.	Do. ...	1st November ...	Owing to sufficient moisture in the fields at the sowing time, nearly the whole normal area was cultivated. The condition of the crop is good and the date of sowing was normal.
Midnapore ...	3,313,920	2,321,700	2,300	2,300	2,300	77	77	38,342	1889 to 1895	...	November.	
Hooghly ...	761,315	533,000	100	100	100	90	80	...	...	...		

District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under wheat in acres.	Approximate area under wheat last year (1906) in acres.	Estimated area under wheat this year (1907) in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1906)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1907)?	FIGURES FROM THE CADASTRAL SURVEY.			Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop and whether the date of sowing was this year early, normal or late.
								Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under the crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13
								Acres.	...	Acres.	...	
24-Parganas ...	3,190,160	1,099,700	...	200	—	100	...	...	...	—	...	There has been no cultivation of wheat in this district this year.
Nadia ...	1,767,680	1,063,800	82,100	87,800	30,400	34	65	Not cadastrally surveyed	...	...	1st November ...	Sowing was normal. The condition of the crop is good, but rain is wanted. The increase in the area sown and outturn is owing to favourable rainfall at the time of sowing.
Murshidabad ...	1,671,360	999,300	180,000	80,000	60,000	53	67	...	...	...	Latter part of October.	There was no rain in November and December, hence moisture is wanting in the soil. A normal outturn may be expected if it rains soon. The date of sowing was normal. The area sown this year was reported by the Dana officers after proper enquiry, hence the differences between the area reported (by mere guess) in the previous years and that shown this year. The normal area is under revision.
Jessore ...	1,277,440	1,120,000	2,700	1,600	1,100	62	60	...	...	...	1st November to 15th November.	The slight decrease in the outturn and the increase in the estimated area (Column 6) requires no explanation.
Faridpur ...	1,888,000	1,000,000	126,000	117,800	117,600	70	70	72,556	1900-01	1,261	Early in October ...	The short percentage of outturn is due to the failure of rain since the time of the sowing of the crop which was normal.

Gaya	3,915,370	2,267,100	167,000	152,300	166,000	75	96	814,000	1905 to 1908 and 1900 to 1902.	23,172	1st October	The weather was favourable throughout, but some rain is now wanted to further improve the condition of the crop. The general condition of the crop is good. The date of sowing was normal. I put the crop at 95, taking 100 as normal.
Shahabad ...	2,795,787	1,941,300	122,000	122,000	170,000	75	90	...	...	...	15th October	The prospects of the crop are fairly good at present. In Column 6, I have shown a considerable increase in area over the approximate normal area because it is certainly wrong, but the new figure is only approximate.
Saran	1,711,256	1,267,200	77,500	77,500	72,500	90	76	1,633,435	1893 to 1901	77,522	10th October	The areas in Columns 4 and 5 have been corrected according to the revised area under each crop submitted in reply to Circular No. 61A., dated 28th March 1906. In the Gopalganj subdivision, the weather is reported seasonable and the condition of the crop fair, but in the Siwan and Sadr subdivisions, the crop has suffered in germinating and growth for want of sufficient moisture—the result of failure of the cold-weather rain, and in some places it has suffered from insects as well. The date of sowing was normal.
Champaran ...	2,359,540	1,447,600	105,300	95,200	98,200	73	72	2,259,540	1892 to 1899	105,300	End of September and beginning of October.	Sowing commenced rather early. Want of rain has reduced the prospects of the crops.
Muzaffarpur ...	1,962,437	1,327,000	69,700	69,700	69,700	90	76	1,962,400	1892-93 to 1898-99.	69,700	October.	
Darbhanga ...	2,152,600	1,573,000	53,700	57,300	69,200	64	54	2,148,800	1896 to 1902	52,700	October	Continued drought has injured the prospects of the crops to a great extent. Rain is urgently required. The increase in area is due to floods. The date of sowing was normal.
Monghyr ...	2,610,000	1,592,800	150,000	150,000	208,600	72	74	985,551	1900 to 1904	103,618	1st week of October ...	There was no rain after sowing, and no prospects are unfavourable. The paddy lands of North Monghyr have been sown with *rabi* after the destruction of paddy by floods.
Bhagalpur ...	2,704,640	2,072,200	160,200	156,800	180,200	85	72	1,057,918	1902 to 1906	65,989	Last week of October	The alteration of figures in Column 4 is due to the revision of the normal area in the light of cadastral survey figures. The date of sowing was normal. Prospects are fair.
Purnea	3,106,153	1,894,400	94,400	23,800	23,800	100	75		Not available		Middle of October ...	The season is not favourable for want of rain: hence only 75 per cent. is expected. The date of sowing was normal.
Darjeeling ...	714,960	160,600	4,200	5,000	3,200	76	80	128,049	1897 to 1905	1,711	Ditto ...	The weather has been favourable and sowing was normal.

District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under wheat in acres.	Approximate area under wheat last year (1905) in acres.	Estimated area under wheat this year (1906) in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1906)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906-1907)?	Particulars from the Cadastral Survey.		Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop and whether the date of sowing was this year early, normal or late.
								Total area of the district lies then under early survey.	Years during which the cadastral survey took place.		
1	2	3	4	5	6	7	8	9	10	11	12	13
Sonthal Parganas.	3,888,000	1,845,000	83,000	27,100	27,000	75	64	Acres. 3,378,000	1899 to 1905	Acres. 16,664	15th October	Rain is wanted. The general condition of the crop is fairly satisfactory. The date of sowing was normal. Owing to want of moisture, the outturn expected to be less than normal.
Cuttack ...	2,891,000	1,325,000	1,000	1,000	1,000	95	92	4,068,457	1897 to 1903 and 1900 to 1901.	351	Middle of November	The outturn has been estimated according to the present condition of the crops. The date of sowing this year was normal.
Balasore ...	1,564,000	825,000	800	100	100	100	80	1,202,779	1897-98 to 1904-05	Nil	Ditto	The weather was not very favourable: the crop suffered from untimely rains and cloudy weather.
Angul ...	1,071,000	283,000	100	100	100	70	50	The Sadr subdivision of Angul was cadastrally surveyed in 1898-99.			Ditto	The date of sowing was normal.
Samhalpur ...	5,447,000	995,000	100	100	100	75	80	2,433,250	1894 to 1897 and 1901 to 1907	146	1st October	The date of sowing this year was normal. Wheat cultivation is very limited in this district, the soil not being retentive of moisture. It is grown only under irrigation. Prospects seem to be fairly good.

Rangpur	...	4,262,440	1,703,000	18,700	12,500	18,100	66	73	...	...	October	...	The general condition of the crop in Rangpur Subdivision, but in Gaibandha, the crop was spoiled for want of rain. The date of sowing was normal this year.
Bogra	...	4,631,720	1,850,000	600	800	100	40	70	The district is being cadastrally surveyed.		1st November	...	Owing to the favourable condition of the weather, the outturn is expected to be better than that of last year. The sowing was a little early.
Pabna	...	3,146,600	837,500	14,700	14,000	13,000	65	65	167,800	1896-97	11th November	1,440	No satisfactory reason has been given for the decrease in the area sown. The date of sowing was normal.
Rajshahi	...	3,854,000	1,619,800	6,600	5,500	5,000	55	75	Not cadastrally surveyed.		15th November	...	The low outturn is due to heavy rainfall during the maturing of the crop.
Jalpaiguri	...	2,407,240	840,750	2,600	2,000	4,000	30	50	1,701,864	1895 to 1897 and 1899 to 1902.	1st week o November	1,367	The date of sowing was normal. There being no rain in the cold weather, the outturn has been shown as 50 per cent.
Total	...	20,152,177	37,290,000	1,304,700	1,344,100	1,838,990	74	77	...	...	...	...	

WEATHER AND CROP REPORT

For the week ending the 11th February 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	BURDWAN ...	Inches. ...	8½	8½	Weather seasonable. Slight rainfall almost throughout the district. In some places lands being prepared for the next harvest and manured. State and prospects of standing crops good. Potatoes being gathered. Pressing of sugarcane and threshing of paddy continuing. More rain needed in some thanas. Public health of the Katwa subdivision not good. Cholera and small-pox rife. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	0·03	8	9	Standing crops doing well. Cholera in some places. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	0·03	9	9	Weather seasonable. standing crops doing well. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	Nil	8	8	Weather cool. Oilseeds, tobacco, gram and wheat thriving. Cattle-disease reported from thana Jhargram. Fodder and water sufficient.
5	HOOGHLY ...	Nil	7	7	Weather seasonable. Prospects of *rabi* crops and potato fair. Threshing of winter paddy still continuing. Pressing of sugarcane going on. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	9	8½	Weather seasonable. Sugarcane and other standing crops doing well. Transplantation of summer rice begun in the Uluberia subdivision. No cattle-disease reported. Fodder and water for cattle sufficient.
7	24-PARGANAS	Nil	8	8½	Weather seasonable. Harvesting of winter rice finished everywhere. Lands being prepared for the next crop in the Sadr subdivision. State of standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	Nil	7½	7½	Prospects of standing crops good. No cattle-disease. Fodder and water sufficient.
9	MURSHIDABAD	...	8	8	Weather seasonable. *Rabi* crops doing well. Prospects of sugarcane favourable. Pox amongst cattle reported from thana Khargram. Fodder and water sufficient.
10	JESSORE ...	Nil	7 1/16	7 1/16	Weather seasonable. Prospects of standing crops fair. Rain urgently wanted. High prices continuing. Malarial fever and cholera raging at Sadr and in the interior. No cattle-disease. Fodder and water sufficient except in Magura.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1.	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	9½	9	Weather seasonable. State of linseed and tobacco fair. Outturn of *til* estimated at 100 per cent. at Satkhira. Fodder and water sufficient.
12	PATNA ...	2·43	10 16*	9½ 15½*	Weather cloudy. Rainfall general throughout the district and likely to prove injurious to such *rabi* crops as are ripe, also to poppy. Other crops doing well. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	2·89	9 11/16 13 1/16*	9 11/16 13 1/16*	Weather cloudy with heavy rain for three days. Rainfall at Jahanabad 2·70, Nawadah 3·99 and Aurangabad 3·09. Harvesting of paddy finished. Pressing of sugarcane continuing. *Rabi* crops somewhat damaged by heavy rain. Fodder and water for cattle sufficient.
14	SHAHABAD ...	2·75	10 15*	11 15*	Rainfall at Buxar 4·41, Dehri 3·17. *Rabi* crops damaged by rain. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	2·29	9¾ 16*	10 15½*	Weather cloudy. Pressing of sugarcane going on. Standing crops doing well. Rain beneficial to standing crops. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	0·64	9 12*	9½ 14½*	Rainfall at Bettiah 0·51. Rain generally beneficial to poppy and other *rabi* crops. Prospects slightly improved. Exports insignificant. Imports much in excess at this season. Average attendance on two test-works for week ending the 5th February, 302. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	1·42	9 14*	9 14*	Weather cold and sometimes cloudy. Rainfall of the week general and beneficial to crops. Common rice and maize selling at 10 and 13½ seers a rupee, respectively, at Sitamarhi and at 9 and 14¾ seers a rupee, respectively, at Hajipur. Daily attendance at kitchens on the last day of the week 502. Number on test-works on 6th February—Nawada nil, Rani Sayedpur tank 139. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	0·95	8¾ 13*	8½ 13½*	Weather cloudy. Rain almost everywhere during the week, which will be beneficial to some of the *rabi* crops, but injurious to wheat, gram and *masur*, that are in ear and in flower. Harvesting of some *rabi* crops commenced. Number on relief works 43,079. Total number of persons gratuitously relieved, including village doles, 15,658, showing decrease on last week's figures. Number on test-works in the Madhubani subdivision 1,071. Decrease over last week's figures due to bad weather. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

29	Hazaribagh	...	9	9	Prospects of standing crops fair. Fodder and water sufficient.
30	Ranchi ...	0·49	10	10	Weather slightly cloudy. Ploughings facilitated by recent rain. State of standing crops good, except in thana Sesai. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	Palamau ...	1·68	9	9	Weather cloudy. Rain throughout the district. *Rabi* crops reported to have been very slightly damaged by hail in Chhatarpur, Mahuadanr and Chandua thanas. Harvesting of mustard nearly completed. Sugarcane being cut and transplanted. Cattle-disease in six thanas. Fodder and water sufficient.
32	Manbhum ...	0·25	10	10	Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia and Chas. Fodder and water sufficient.
33	Singhbhum ...	0·27	9	9	Pressing of sugarcane going on. Common rice selling at 10 and 11 seers a rupee at Kharsawan and Seraikella respectively. Cattle-disease reported from one thana. Fodder and water sufficient.
34	Cooch Behar	0·07	7½	7+	Preparation of lands for jute commenced. Cattle-disease reported from Mathabhanga sub-division. Fodder and water sufficient.

General Summary.—Rain was general during the week in Bihar and Chota Nagpur. Some scattered showers fell in Orissa, but in Lower Bengal there was practically no rain whatever. The rainfall was heavy in Patna, Gaya, Shahabad, Saran, Muzaffarpur, Monghyr, Bhagalpur and Palamau, where it is likely to do some damage to those *rabi* crops which are in flower or in ear. In those districts which received light rain, the crops are reported to have been benefited. The number of persons receiving gratuitous relief is—Muzaffarpur 502, and Darbhanga 15,658. The average attendance on test-works in Champaran for the week ending the 5th February is 302, in Muzaffarpur on the 6th instant 139, and in Darbhanga on the last day available, 1,071. The number on famine-relief works in Darbhanga is 43,079. Cattle-disease is prevalent in eleven districts. Fodder and water are generally sufficient, Magura in the Jessore district being the only place where it is reported to be deficient. The price of common rice has risen in six and fallen in four districts.

C. A. OLDHAM,

Director of Agriculture, Bengal.

Dept. of Agriculture, Bengal,

The 12th February 1907.

SUMMARY OF THE RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE MONTH OF JANUARY 1907.

During the month of January there was practically no rain in Lower Bengal. A few scattered showers fell in parts of Bihar and Chota Nagpur, but in all cases the falls were below the normal. In Darjeeling, some rain was received towards the end of the month, but even in this district, the fall was below the normal. There was little or no rain in Orissa, excepting some light showers in Sambalpur and Angul.

On an average, the total fall for the month was ·05 inch in South-West Bengal, ·03 inch in Bihar, ·01 inch in Orissa and ·09 inch in Chota Nagpur.

The following table gives a summary of the rainfall data of each of the four Meteorological Divisions of the Province of Bengal for the month of January 1907:—

Meteorological Divisions.	Rainfall of month. Average for the Division.	Normal average.	Variation.	Rainy days. Average number in month.	Normal average number in month.	Variation.	Rainfall since 16th October 1906. Average for the Division.	Normal average.

The extreme variation of temperature		70·3
The maximum temperature		28·5
		82·2
	Miles.	
The highest velocity of the wind in one hour		16
	%	
The mean relative humidity		64
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		69
	Inches.	
The total fall of rain from 3rd to 9th February 1907		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·27
The total fall from 1st January to 9th February 1907		0·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·73

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. on that day.

☁, dew.

Meteorological Office, Govt. of India,
Alipore (Calcutta), the 11th February 1907.

C. W. Peake,

REPORT ON THE COTTON CROPS OF BENGAL, FEBRUARY 1907.

THE following note is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

The 16th February 1907.

DEPARTMENT OF AGRICULTURE, BENGAL.

REPORT ON THE COTTON CROPS OF BENGAL, FEBRUARY 1907.

[On an average of the five years ending 1904-05, the area under cotton crops in the territory to which the present forecast relates has represented some 0·6 per cent. of the total area under cotton crops in India.]

Explanatory.—This is the last of the four reports to be issued on the cotton crops of Bengal during the season 1906-07. It deals with revised estimates of area and outturn of the cotton crops since the issue of the third report in December.

Character of the season.—Early cotton is grown chiefly in the Sonthal Parganas, Sambalpur, Angul, Manbhum and Singhbhum. Climatic conditions in these districts were generally favourable throughtout the season. In the district of Sambalpur, however, the crops were damaged to some extent by excessive rain during the flowering season.

Late cotton is mostly cultivated in North Bihar, Saran alone covering about one-third of the late cotton area in Bengal. Throughout North Bihar, the crops suffered at first from excessive rain and floods in July and August and afterwards from absence of rain.

Area sown.—The area sown with early cotton this year is estimated at 39,947 acres against 37,428 acres shown in the December forecast and against 35,086 acres sown last year. The area under late cotton amounts to 35,530 acres against 32,376 acres shown in the December forecast and against 36,356 acres sown with the crop last year. The sowing of late cotton is reported to be still going on in Puri, where it was begun late this year.

Outturn.—The outturn of early cotton, as returned by District Officers, is now estimated at 6,250 bales against 5,312 bales of last year, while that of late cotton is estimated at 9,780 bales against 11,150 bales of last year (one bale =400 lbs.). Supplementing these estimates with 5 per cent. for the cotton grown in the Native States, for which no statistics are recorded, the total estimates for early and late cotton come, respectively, to 6,562 and 10,269 bales, or a total outturn of 16,831 bales for the entire cotton area in this Province. The corresponding outturn for last year was estimated at 17,285 bales.

C. A. OLDHAM,

Director of Agriculture, Bengal.

PRELIMINARY FORECAST OF THE OILSEED CROPS OF BENGAL, 1906-1907.

THE following note is published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

The 9th February 1907.

DEPARTMENT OF AGRICULTURE, BENGAL.

PRELIMINARY FORECAST OF THE OILSEED CROPS OF BENGAL, 1906-1907.

[On an average of the five years ending 1904-05, the areas under linseed, rape and mustard and *til* in the territory to which this forecast relates have represented some 22·7, 13·4, and 5·2, per cent., respectively, of the total area under these crops in British India.]

Explanatory.—Preliminary estimates of the area and outturn of the different kinds of oilseeds, both *bhadvi* and *rabi*, grown in this Province are dealt with in this report. In Bengal, the chief oilseeds crops are mustard, rape (*rai*) sesamum (*til*), linseed, castor and *niger* oilseed (*sirguja*). About 35 per cent. of the total area under oilseeds is under mustard and rape, the major portion of which is cultivated in Purnea and in the Santhal Parganas. Linseed covers about 32 per cent., and is chiefly grown in Darbhanga, Gaya, Champaran and Saran. *Til* is an important crop in Sambalpur, as well as in Midnapore, Jessore, Angul and Hazaribagh.

Character of the season.—In October, the rainfall was above the normal in the Santhal Parganas, Sambalpur, Cuttack, Puri, Ranchi, Manbhum and in all the districts of Lower Bengal except Khulna. In the rest of the Province, it was deficient. In November, there was no rain in the districts of the Patna Division and in Purnea, but some light showers fell in the rest of the Province. In December, light showers fell only in Orissa and in parts of Chota Nagpur. There was practically no rain in January. The date of sowing was normal almost everywhere, but the crops suffered in Lower Bengal from excess of rain at the time of sowing and in Bihar from rain holding off at the period of early growth. Injury done by insect-pests is reported only from Cuttack. On the whole, the season has not been a favourable one.

Area sown.—The District Officers of Burdwan, Midnapore, Howrah, 24-Parganas, Khulna, Gaya, Saran, Bhagalpur, Darjeeling, Puri and Sambalpur have now furnished revised figures of the approximate normal area under oilseeds in their districts. The total normal area under different

oilseed crops in the Province, as estimated now, stands at 2,416,400 acres. The actual area sown this year amounts to 2,209,500 acres, against 2,215,400 acres estimated to have been sown last year.

Character of the crop.—As will appear from the district returns appended to this forecast, Sambalpur expects an 105 per cent. crop. Three districts, viz., Bankura, Gaya and the Santhal Parganas, report a normal crop, three districts return from 90 to 92 per cent., five districts from 81 to 89 per cent., eleven districts from 70 to 79 per cent. and five districts from 63 to 69 per cent.; while Darbhanga, Monghyr, Darjeeling, Puri and Jessore report crops from 53 to 59 per cent. of a normal crop. According to the district estimates, the general outturn of the different kinds of oilseeds grown in this Province amounts to 78 per cent. of an average crop.

In the following districts, sufficient reason has scarcely been given for the low estimates of outturn :—Birbhum. Nadia, Murshidabad, Jessore, Puri, Palamau and Singhbhum. The Collectors will be asked to look into the figures carefully, when submitting their final forecasts. The recent rain, which fell since the preparation of the preliminary forecasts must have affected the outturn in many districts.

C. A. OLDHAM,
Director of Agriculture, Bengal.

CALCUTTA ;
The 14th February 1907.

First Forecast of the Oilseed Crops of Bengal, 1906-1907.

District.	Total area of the district.	Total area estimated to be under cultivation.	Name of oilseed.	Approximate normal area under oilseeds.	Approximate area sown last year (1905-06).	Estimated area sown this year (1906-07).	Taking 100 to represent the normal outturn, how much represented the outturn last year (1905-06)? WEATHER AND CROP REPORT.

For the week ending the 18th February 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	BURDWAN ...	Inches. Nil	8½	8½	Weather getting hot. Some rainfall in Asansol and Kalna. Lands being manured in places for the next harvest. Standing crops flourishing. Threshing of winter rice and pressing of sugarcane continuing. Potatoes being gathered. Cholera and small-pox in the Katwa subdivision. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	0·10	8	8	Standing crops doing well. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	9½	9	Weather seasonable. Sugarcane pressing continuing. Prospects of standing crops good. Cattle-disease reported from thana Khatra. Fodder and water sufficient.
4	MIDNAPORE ...	0·12	8	8	Rainfall general. Standing crops promising. No cattle-disease. Fodder and water sufficient.
5	HOOGHLY ...	0·34	7	7	Weather seasonable. Rainfall general. Lands turned up for jute. Pressing of sugarcane going on. Prospects of *rabi* crops and potatoes fair. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	0·16	8	9	Slight rainfall during the week. Standing crops growing well. Common rice selling at 9 seers a rupee at Ulubaria. No cattle-disease. Sufficient supply of fodder and water.
7	24-PARGANAS	0·05	8	8	Weather seasonable; cloudy in the Diamond Harbour and Barasat subdivisions. Lands being prepared for the next harvest. Harvesting of winter rice finished everywhere and that of *rabi* crops going on in Barasat. State of standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	0·29	8	7½	Prospects of standing crops fair. Fodder and water sufficient.
9	MURSHIDABAD	0·29	8	8	Weather seasonable. Prospects of *rabi* crops favourable. Small-pox still raging at Lalbagh. No cattle-disease. Fodder and water sufficient.
10	JESSORE ...	Nil	7 1/16	7 1/16	Weather seasonable. Prospects of standing crops fair. Rain urgently wanted. High prices continuing. Malarial fever and cholera raging at Sadr and in the interior. No cattle-disease. Fodder and water sufficient except at Magura.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	0·38	10	9½	Weather seasonable. Rainfall general. State of linseed and tobacco fair. Outturn of *til* estimated at 100 per cent. at Satkhira. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	0·05	10 15*	10 16*	Weather cloudy. Harvesting of peas, masur and linseed continuing. Outturn of peas, *masur*, and *rahar* deteriorated by the recent rainfall. Other crops continuing well. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	0·24	9 11/16 13 13/16*	9 14/16 13 15/16*	Weather cool and clear with one day's rain. Harvesting of *rabi* and pressing of sugarcane going on. Cattle-disease reported from two villages in thana Aurangabad. Fodder and water for cattle sufficient.
14	SHAHABAD ...	0·10	10½ 16*	10 15*	General slight rain. Some early *rabi* crops damaged by rain. Later *rabi* crops benefited. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	0·14	9 14*	9½ 16*	Weather seasonable, but sometimes cloudy. Pressing of sugarcane still continuing. Harvesting of peas commenced, and that of mustard finished. Lands being prepared for indigo. Prospects of poppy not favourable in the Gopalganj subdivision. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	Nil	9½ 12¾*	9 12*	Harvesting of oilseeds and pressing of sugarcane progressing. Lands being ploughed. Poppy flowering. Prospects of *rabi* crops good. Average daily attendance on two test-works for the week 107. Imports in excess of exports during the week. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	9 14*	9 14*	Weather seasonable and sometimes cloudy. Some rainfall in Hajipur and parts of the Sadar thana. Common rice and maize selling 10 and 13 seers a rupee, respectively, at Sitamarhi and at 9 and 14¾ seers a rupee, respectively, at Hajipur. Attendance at kitchens on the 13th instant—440, and the number on test-works on the 15th instant—Nawada tank 287, Rani Sayedpur tank 309. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	8¾ 13*	8¼ 18*	Weather cloudy. Harvesting of mustard going on rapidly, and nearing completion. Number on relief works 53,131. Total number of persons gratuitously relieved, including village doles, 14,763. Number on test-works in the Madhubani subdivision 1,902. No cattledisease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

19	Monghyr ...	...	8¾ 12½*	8¾ 12 15/16*	Weather seasonable but occasionally cloudy. *Rabi* crops doing well. Very little damage, if any, caused by the recent rain. Cattle-disease reported from Jamui subdivision. Fodder and water sufficient.
20	Bhagalpur ...	0·02	8⅝ 13½*	8⅝ 13¼*	Weather fair and cold. *Rabi* crops thriving except in Supaul and in the west of Madhipura. Sugarcane being pressed and planted. No cattle-disease. Fodder and water sufficient.
21	Purnea ...	Nil	7½ 11½*	7½ 10*	Weather seasonable. Harvesting of sugarcane commenced. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	Nil	7 11*	7 11*	Weather cold. Hills—Wheat, barley and mustard in fair state. Terai—Sugarcane-cutting going on. Tobacco doing well. Ploughing for jute and *bhadoi* going on.
23	Sonthal Parganas.	0·55	9 14*	9 14*	Weather seasonable. Prospects of *rabi* crops fair. Sugarcane being pressed. Cattle-disease reported from the Sadr subdivision. Fodder and water sufficient.
24	Cuttack ...	Nil	10½	10½	Sugarcane being harvested. Tobacco and cotton growing well. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	0·15	·9½	9½	Weather seasonable. Threshing of paddy, pressing of sugarcane and harvesting of *rabi* crops continuing. Prospects fair. Sporadic cases of rinderpest reported from the Balasore Circle. Fodder and water sufficient.
26	Angul ...	Nil	10½	10½	Weather seasonable. Sugarcane-pressing nearly finished. No cattle-disease. Fodder and water sufficient.
27	Puri ...	Nil	10½	10½	Weather seasonable. *Saradh* being harvested. Cotton growing well. Sugarcane being pressed. Summer rice getting on well. *Kulthi* harvested. Other *rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	1·01	11	11	Weather cool with occasional clouds. Rainfall general. Rice fields being ploughed. Sugarcane fields also being prepared. Condition of sugarcane good. Cattle-disease prevalent in two villages in Bargarh tahsil. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	...	9	9	Prospects of standing crops fair. Peas damage by rain. Fodder and water sufficient.
30	Ranchi ...	0·50	10	10	Weather seasonable. Standing crops doing well. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	Palamau ...	0·92	9	9	Weather cloudy. Rain received all over the district. *Rabi* crops reported to have been slightly injured in five thanas. Transplantation of sugarcane in progress. Cattle-disease reported from two thanas. Fodder and water abundant.
32	Manbhum ...	Nil	10	10	Weather seasonable. Prospects of crops good. Outturn of mustard and cotton estimated at 75 and 75 per cent. respectively. Cattle-disease reported from thanas Purulia, Gourangdi and Tundi. Fodder and water sufficient.
33	Singhbhum ...	0·04	9	9	Pressing of sugarcane continuing. Condition of crops fair. Common rice selling at 10 and 11 seers a rupee at Kharsawan and Seraikella, respectively. Cattle-disease reported from thana Chakradharpur. Fodder and water sufficient.
34	Cooch Behar	Nil	$7\frac{7}{8}$	$7\frac{1}{2}$	Weather seasonable. *Cheena* and *kaon* being sown. Fodder and water sufficient.

General Summary.—Light rain was fairly general in Bengal Proper, South Bihar and Chota Nagpur. Some scattered showers fell in the rest of the Province. The prospects of the standing crops are on the whole fair, but some damage has been done by the heavy rainfall of the previous week to the early *rabi* crops in Patna, Shahabad, Hazaribagh and Palamau. Sugarcane-pressing continues. The number of persons receiving gratuitous relief is—Muzaffarpur 440 and Darbhanga 14,763. The number of persons on test works is—Champaran 107, Muzaffarpur 596 and Darbhanga 1,902. The number on relief works in Darbhanga is 53,131. Cattle-disease is reported from ten districts. Fodder and water are sufficient, except in parts of Jessore. The price of common rice has risen in two and fallen in eight districts.

C. A. OLDHAM,

Director of Agriculture, Bengal.

(a) Mean of 30 days. (b) Mean of 27 days.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF JANUARY 1907.

JANUARY was characterised by a general deficiency of rainfall, every one of the meteorological divisions in the two Provinces receiving less than the small amount to be expected during this month. At the end of the preceding month the weather had been slightly affected by the approach of a disturbance from Gujarat. As a consequence of this, cloud spread over the whole area and a large increase of night temperatures took place. Skies, however, soon cleared, temperature fell and about the 3rd of the month was normal everywhere. The weather remained fairly settled for a few days, when the approach of another low pressure area from the west caused cloud again to appear and gave rise to a slight increase of temperature. From the 10th to the 17th skies were clear or only lightly clouded, except in Assam where fog was prevalent in the mornings. Temperature was in excess during the first half of this period, but the low temperature conditions prevailing in the Central Provinces extended into the area under report on the 14th, and temperature was in defect in the west for the remainder. In the Bay weather was slightly disturbed in the neighbourhood of the Andamans, and moderately heavy rain was reported from there. Weather remained fairly settled till the 24th of the month, when a depression in which pressure was one quarter of an inch in defect appeared over northern India and completely reversed the pressure gradients. This distribution gave rise to an inflow of humid winds from the Bay, and general increase of cloud. During the remainder of the month southerly winds prevailed at the head of the Bay. Precipitation was, however, very scanty, and the skies were mostly clear except in Assam, where skies were heavily clouded, and rain fell nearly every day. Temperature was generally high, except in Assam, where rain caused a reduction in day temperatures and cloud an increase in night temperature.

Summary of Temperature.—Mean temperature was in moderate excess in Eastern Bengal and Bihar and in slight excess elsewhere except in Orissa, where it was about normal. The highest temperature recorded during the month was 92°·4 at Cuttack and the lowest 39·5 at Daltonganj.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of January 1907:—

Meteorological Division.	Temperature.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal	92·3	47·9	80·2	56·3	68·3	+ 1·9
Eastern Bengal, North	84·3	44·9	77·6	53·4	65·5	+ 2·9
Eastern Bengal, South	85·3	49·5	79·5	57·1	68·4	+ 3·0
Bihar	86·3	44·3	76·8	52 3	64·6	+ 2·4
Orissa	92·4	46·2	81·6	58·1	69·9	0
Chota Nagpur*	89·9	39·5	78 2	51·4	64 8	+ 1·6
Assam	85·4	42·9	75·0	52·5	63·8	+ 1·7

* Purulia not included.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that Officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province. No rain was recorded in Lower Bengal during the month, and light showers only fell at a few stations elsewhere.

Actual and average rainfall and departure from normal for January 1907.

The total fall from 1st January to 16th February 1907		0·09
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·05

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew; o, overcast; <, lightning; d, drizzling rain; t, thunder.

C. W. Peake,
for *Director-General of Observatories.*

RESOLUTION ON THE ADMINISTRATION REPORTS OF THE FEUDATORY STATES OF ORISSA AND CHOTA NAGPUR FOR THE YEAR 1905-1906.

No. 1012P.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Dated Calcutta, the 5th February 1907.

RESOLUTION.

READ—

The Annual Report on the Administration of the seventeen Tributary Mahals of Orissa, for the year 1905-06.

Read also—

The Annual Report for the year 1905-06 on the Administration of the seven States transferred to Orissa from the Chota Nagpur Division and the Central Provinces, with the Political Agent's remarks thereon.

Read also—

The Annual Report on the Administration of the Political States in the Chota Nagpur Division for the year 1905-06.

On the 16th October 1905 the five States of Sirguja, Jashpur, Udaipur Korea and Changbhakar were transferred to the Central Provinces, whilst the five States of Patna, Sonpur, Kalahandi, Bamra and Rehrakhol were transferred to Bengal and placed under the control of the Commissioner and

Superintendent of the Tributary Mahals of Orissa. The two States of Bonai and Gangpur were also transferred to the Orissa Division from the Chota Nagpur Division, leaving only the Political States of Seraikela and Kharsawan in the latter Division. There are now 24 States forming a compact block with an area of 28,046 square miles, and a population of 3,173,395 persons attached to the Orissa Division. A Political Agent was temporarily deputed to assist the Commissioner of Orissa to deal with seven of these States, namely, those transferred from the Central Provinces and the Chota Nagpur Division to Orissa, pending the permanent appointment of a Political Agent to deal with all the States, subject to the Commissioner's general power of control. This permanent appointment, to be held by a member of the Indian Civil Service on the Bengal cadre, has been sanctioned by the Secretary of State. The Political Agent has accordingly been placed in charge of the 24 States in Orissa, and a great step has been taken towards bringing the Chiefs into that personal contact with Government, which is so necessary to the good administration and well-being of these States.

2. Owing to the fact that only seven of the States were under the Political Agent at the end of the year under review, separate reports have been received from him through the Commissioner of Orissa dealing with Gangpur, Bonai and the five States transferred from the Central Provinces. Another report has been received from the Commissioner, as Superintendent of the Tributary Mahals, on the administration of the remaining 17 States; and a separate report has been received from the Commissioner of Chota Nagpur for the States of Seraikela and Kharsawan. As the Political Agent is now in charge of the 24 States in Orissa, he will be able next year to submit a consolidated report on the administration of these States, and orders are issuing separately regarding its preparation.

3. Following on the changes mentioned above, revised *sanads*, embodying purely verbal alterations, were granted to the seven Chiefs whose States were transferred to Orissa; five *sanads* have been presented, but the minor Chiefs of Kalahandi and Bonai will not receive their sanads until they are placed in charge of their respective States which are at present under Government management. The other States that were under Government management at the end of the year were Baramba, Nayagarh, Narsingpur, Nilgiri, Pal Lahera and Kharsawan; the State of Nilgiri was taken under Government management during the year under review, while that of Dhenkanal was released after a long period of management of nearly 30 years.

4. One of the most interesting features of the Superintendent's report is the description of a tour in the Garjat States, in which the potential wealth of their forests is indicated. From other reports that have been received by Government, it appears that the conservation of these forests is a matter of the first importance both from the point of view of the prosperity of the States and that of the injurious climatic effect of forest denudation, which threatens to affect a large area, extending even beyond the States. It has therefore been proposed to appoint a Forest Officer to advise the Chiefs on the working of their forests and to control the forests of the States under direct management. Hitherto, owing to the small number of officers available, the appointment of such an adviser has not been possible; but the Lieutenant-Governor hopes that it will be possible soon, with the permission of the Government of India, to appoint such an officer.

5. The reports show that the condition of the people in the States is generally on the whole satisfactory, though in the large majority of the States the rainfall was deficient, and the crops were in consequence poor while prices ruled higher than usual. On the other hand, in the south of Gangpur, where the rainfall was above the average, men who had been working in lime-stone quarries and on timber work gave up their employment on the ground that they had reaped so good a harvest that they could well afford to sit idle. The public health was good, except in the States of Dhenkanal, Nayagarh and Mohurbhanj, where there were epidemics of fever and cholera. Despite the general healthiness of the period, however, the attendance at the State dispensaries on the whole increased. These institutions are reported to be doing good and useful work, especially in the more remote and inaccessible regions.

6. Many of the Chiefs take considerable interest in the agricultural, industrial and educational development of their States. The Chief of Mohurbhanj has enlarged his experimental farm, opened an agricultural class in the High School, and extended his operations in sericulture. The Chief of Bamra has given every encouragement to the opening of village schools. As regards education, the figures show an increase both in the number of schools and scholars. The reorganisation of the Police in Kalahandi was sanctioned during the year, while in Bonai and Seraikela sanction to reorganisation was accorded after the close of the year; in Mohurbhanj it has been effected; but in Kharsawan it is held in abeyance pending the close of the settlement proceedings in that State. In some of the States there is still considerable room for improvement in Police administration; but this is a matter which is receiving attention.

7. The Lieutenant-Governor has reason to be satisfied with the administration of the past year and to look forward to the improved prosperity and administration of the Native States in the future. His Honour desires to record his thanks to the Hon'ble Mr. Slacke, Mr. Gait, Mr. Duke and Mr. Cobden-Ramsay for the efficient and zealous way in which they have discharged their duties.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner and Superintendent of the Tributary Mahals, Orissa, and the Commissioner of the Chota Nagpur Division, for information and guidance.

Ordered also that a copy of the Resolution, together with three copies of each of the Reports, be submitted to the Government of India in the Foreign Department for information.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,

Chief Secretary to the Govt. of Bengal.

RESOLUTION REVIEWING THE REPORT ON THE ADMINISTRATION OF THE CALCUTTA MUNICIPALITY FOR THE YEAR 1905-06.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 22nd February 1907.

RESOLUTION No. 885M.

READ—

The report of the Chairman of the Calcutta Corporation on the administration of the Municipality for the year 1905-06, together with the reviews of the report recorded by the Corporation and the General Committee.

Read again—

The reports for the years 1902-03, 1903-04, and 1904-05, together with the Resolutions recorded by the Lieutenant-Governor thereon.

The present report was received by Government on the 21st August 1906, but the review by the Corporation was not submitted until the 16th January 1907.

2. The year 1905-06 marks the close of the second period of three years during which the administration has been carried on under the provisions of the Calcutta Municipal Act of 1899, and it is of special interest therefore to take stock briefly of the progress made during that interval. Not that the term is a long one in the life of the Corporation, or that finality is ever likely to be arrived at in municipal administration. Moreover the action of the Corporation has been affected by the prospect of the initiation of the city improvement scheme regarding which a final decision has not yet been arrived at. Pending its introduction the necessity of caution in incurring fresh expenditure has been already enjoined; and certain projects from which a remedy for the evils of overcrowding might be hoped for have been suspended.

3. Regarding the working of the municipal machinery as a whole, the experience of the recent triennium has been noticeably valuable in tending to the elucidation of the respective functions of the Corporation, the General Committee and the Chairman; and with a clearer knowledge of the powers of each, the respective limits of control have been better observed and friction has been avoided. The Corporation has also done wisely in availing itself of the assistance of Standing Special Committees in place of the earlier Committees specially appointed for the consideration of particular subjects. Time has thereby been saved, the convenience of members has been consulted, and projects have been more fully and adequately examined. The object in view, as noticed by the Chairman, should be the effective disposal of all details by Committees before which alone they can be satisfactorily threshed out, leaving to the Corporation the determination of general principles only. The more permanent constitution of these Committees, by making more readily accessible their accumulated experience of the particular subjects delegated to their supervision, should add to the authority attaching to their recommendations, and the Lieutenant-Governor shares the anticipation expressed by Mr. Allen as to the value of their co-operation. The scheme of administrative devolution by the formation of four districts equipped with separate staffs of their own has also proved of great assistance to the central body; and the Lieutenant-Governor is glad to see the acknowledgment by the Corporation of the utility of the work of the Standing District Committees which have taken the place of the earlier idea of District Councils. The suggestion made in the Resolution dealing with the report for 1904-05, that the annual statements should show the revenue collected and the expenditure under different heads for each district separately, has not been complied with during the year under review; but the Lieutenant-Governor notes that it has been accepted by the Corporation; and effect will doubtless be given to it in future.

4. During the first three years of its revised constitution the attention of the Corporation had been largely devoted to the task of general departmental reorganisation, and in the Government review of the working of the year

1902-03 mention was made of various important reforms comprising the amalgamation of the Engineering and Conservancy Departments; the formation of a separate Building Department; the revision of the Accounts Department; the re-modelling of the Collection Department, and of minor measures calculated to render more efficient the working of the License, Hackney Carriage, Secretary's and Assessor's offices. The history of the administration during the succeeding triennium has been generally one of progress. Some expectations were disappointed, noticeably in respect of the Accounts Department, and further requirements became manifest in departments which had been considered to have been revised, but these have been gradually remedied and new lines have been followed when necessary. The working of the combined Engineering and Conservancy Departments has been the subject of much discussion; and while the District Engineer, under the scheme of decentralisation by districts, is still in charge of conservancy also, the separation of the subordinate establishments was tried experimentally in two districts in 1904, and has recently been effected throughout the city, with the exception of District IV, in which a similar re-organisation is pending the completion of the new gowkhana. It was also found necessary to re-organise the Building Department during the past year, ward overseers taking the place of the sarkars previously entertained, and the district building surveyors being given larger powers of sanction in order that the disposal of work might be expedited. Complaints of delay have thus been reduced. The hopes entertained in 1902-03 of a final settlement of the difficulties of the Accounts Department were unfortunately premature. The re-organisation continued to occupy the attention of the Corporation during the subsequent years, but it is satisfactory that the Chairman now reports it to be complete, and that all sections are so far working smoothly and satisfactorily. At the same time the auditors' report (1905-06) notices "a steady and marked improvement both in organisation and book-keeping," and an Accounts Code has been issued which it is anticipated will help materially to regularise the procedure. Monthly progress statements of revenue and expenditure as compared with the budget provision are now regularly submitted to the General Committee, who should thus be fully informed of the financial position; and the system of forecasting receipts and expenditure month by month at the beginning of the year and revising such forecasts from time to time, as recommended by the Government of India, has also been adopted, thus preventing any unforeseen depletion of the funds. The reforms effected in the Collection Department had already yielded excellent results prior to the recent triennium, and these have continued since, although the percentage of realisations during 1905-06, *i.e.*, 99·11, is slightly below that of the preceding two years.

5. A further re-organisation of the License Department was completed during 1903-04, and its beneficial results are shown by the fact that the collection during 1905-06 were in excess by Rs. 1,43,5·8 of those of the year preceding the reform, while recourse was had sparingly to coercive measures; but the working of the year immediately under review was marred by irregularities on the part of an employé, and the measures found necessary to adjust the arrear demand would point to the earlier existence of some confusion. Changes in the system of audit and collection were introduced, which should lead to further improvement. The organisation of the Hackney Carriage Department does not appear to have undergone further change; but while the condition of licensed conveyances still leaves much to be desired, some progress in recent years is admitted. It has been found necessary to strengthen the Secretary's office in order to cope with increasing work, and the full result of this measure is still to be seen. The working of the Assessment Department has been uniformly commended during the last three years, and the gross assessed valuation of the town, which amounted to Rs. 2,40,40,704 in 1902-03, has risen to Rs. 2,83,12,020 on the 31st March 1906; but the latter figure, unlike the former, includes the valuation (Rs. 5,72,765) upon the lands and buildings belonging to the Corporation. The disposal of objections has been expedited and appeals to the Civil Court have been few; and the Lieutenant-Governor is glad to note the assurance given in response to a suggestion in the Resolution of the previous year, that fuller information will be given to assessees of the grounds of enhancement, and that proposed

enhancements will be notified both to occupiers and owners. With reference to the recommendations of the Corporation in favour of a change in the system of assessment, it was mentioned last year that His Honour was not prepared at present to consider the amendment of the Act. An entirely new departure effected during 1905-06 was the creation of a special Law Department. The legal work of the Corporation was previously entrusted to a firm of solicitors, but the new system promises economy and permits more easily of legal advice being available.

6. Looking at the results of the three years, the Lieutenant-Governor does not doubt that in matters appertaining to the improvement of the administrative machinery progress has been made. Greater efficiency of service usually requires a more highly paid establishment, and the growth of the city adds to the work to be done and to the staff necessary for its performance. Nevertheless the warning of the Corporation as to the growth of the expenditure upon establishment is not out of place; and indeed the interests of economy, more especially at the present juncture, have already been urged by Government. During the three years ending with that under review a total sum of ninety lakhs of rupees has been raised in loans in comparison with 38½ lakhs during the preceding triennium; and the loan liability which amounted to Rs. 3,26,92,090 on the 1st April 1903, stood at Rs. 3,86,47,890 at the close of 1905-06. Of this aggregate Rs. 12,95,390 represents the balance of the Government consolidated loan, the immediate repayment of which, as advocated by the Corporation, the Lieutenant-Governor found himself unable to recommend. The net indebtedness of the Corporation, viz., the amount owed less the sums to credit in sinking funds and reserve, has increased by about 60 lakhs during the recent triennium, as against a similar addition of some 15 lakhs during the preceding three years; and it is evident therefore that the period 1903-04—1905-06 has been one of heavy borrowing, mainly on account of the expenditure involved in the water-supply and the suburban drainage schemes. To these projects the Corporation is already committed, and the decision to make provision under these heads before all other needs, and to curtail as far as possible expenditure from loan funds generally, unless upon reproductive works, is of commendable prudence. At the same time the general financial position of the town need give no cause for apprehension. The legal limit up to which the Corporation can still borrow, calculated under section 131 of the Act and with the usual assumptions as to the interest at which a debenture loan can be floated at par, has increased during the last three years by over 23 lakhs in comparison with an addition of about 21 lakhs in the earlier triennium, and it now stands at Rs. 1,52,63,800. The actual present borrowing power, as limited by the surplus available after deducting the estimated expenditure from the estimated receipts *plus* the opening balance, is no doubt considerably less, and is stated by the Chairman to amount to rather over 34 lakhs only, but the calculation takes no account of the possibility of an enhancement of the general rate which is still feasible.

		Rs.
1903-04	...	45,00,000
1904-05	...	30,00,000
1905-06	...	15,00,000

7. Closely connected with the financial position of the Corporation are the matters of account touching the proper distribution of charges between revenue and capital, the preparation of a balance sheet, and the maintenance of a proper stock book. When reviewing the operations of the year 1904-05, Sir Andrew Fraser had occasion to comment unfavourably upon the tendency to relieve the revenue head at the expense of capital. While it is satisfactory that during the succeeding year the suggestion has been adopted that the sale proceeds of surplus lands should be credited to capital, no change was made in the practice of debiting to capital the expenditure upon advertisements, stamps and commission in connection with the floating of loans, or on petty improvements not exceeding Rs. 1,000 in value individually. Of the charges for water-works establishment and contingencies, 67 per cent. has been charged to capital (in place of the whole as in the previous year), and of general supervision, the maintenance of the municipal office, and of the Chief Engineer's Department about two-sevenths or about 1½ lakhs of rupees. This procedure has been distinctly challenged by the auditors whose criticisms

appear to be well-founded, but the view of the matter taken by the Corporation is not clear.

The auditors have also discussed in detail the question of the balance sheet and the valuation of the block, but their suggestions are not altogether accepted by the Chairman and the Corporation, although the latter records the opinion that the present system of block valuation requires radical alteration and is entirely misleading. The subject is too technical to permit of discussion within the compass of the present Resolution, but the Lieutenant-Governor would be glad to be informed separately of the final conclusions come to.

The independent stock-taking advocated in last year's Resolution has resulted in the discovery of a considerable shortage, the value of which is variously stated in different parts of the annual report as Rs 63,000, Rs. 82,000, and Rs. 86,543. The circumstances leading to this result are apparently under investigation, but the Lieutenant-Governor agrees with the opinion of the Corporation that it is not satisfactory, while he is disposed also to agree with the auditors that an independent expert valuation would have been preferable to the departmental pricing of the balances in hand. The future maintenance of these important accounts upon a more regular footing deserves strict attention.

8. Under the revenue head it is noticeable that the triennium, which opened with a credit balance of Rs. 9,09,578, closed with a balance of Rs. 8,58,456; and the following figures, from which all non-recurring items have been excluded, show graphically the progress of receipts and expenditure during the last six years:—

Years.	(In thousands of rupees.) Receipts.	Expenditure.
	Rs.	Rs.
1900-01	57,53	56,18
1901-02	62,09	57,68
1902-03	58,32	60,30
Annual average	59,31	57,72
1903-04	61,51	64,62
1904-05	64,33	63,56
1905-06	67,78	65,52
Annual average	64,54	64,56

In other words the recurring expenditure of the Corporation, since the year 1900-01, has increased by 18 per cent. against a similar increase upon the receipt side of 17 per cent.

9. The most important projects with the execution of which the Corporation was concerned during the triennium continued to be the suburban drainage scheme and the improvement of the water-supply. The nature of the former work has been previously described on more than one occasion. At the commencement of the year 1903-04 the sewering west of Tolly's Nullah had been completed, and as regards that to the east 14,222 feet of main sewers out of 39,136 feet, and 32,048 feet of branch sewers out of 129,683 feet sanctioned, had been laid. The progress of the intervening three years covers the installation of new engines at Palmer's Bridge; the erection of machinery at the Budge-Budge pumping station; the construction of the pumping station at Balliganj; the completion of the suburban outfall works and the practical completion of these for the town; the laying of the remainder of the main sewers with the exception of some 1,100 feet; the reconstruction, still in hand, of mains which had collapsed; and good progress with the branch sewers, of which some 29,040 feet only are still remaining to be put down. The Lieutenant-Governor is of opinion that the record of work done is a satisfactory one, but the difficulties in connection with the syphon under Tolly's Nullah still remain unsettled. Briefly the alternative lies between the construction of the syphon in the bed of the nullah, with the risks resulting from the unsuitable nature of the bed and

the absence of facilities for repair, and the carriage of the sewage through an overhead pipe, the initial cost of which would be large, while recurring expenditure on pumping would be involved. Complications are also introduced by the possibility of the canalisation of the nullah at some future time. The discussion at present rests with the decision of the Corporation to call for tenders for both schemes.

As regards other schemes of drainage, that for Baliaghata was started during 1904-05, and its completion is anticipated during the current year; but the important projects dealing with the fringe area, at an estimated expenditure of Rs. 29½ lakhs, and the suburban surface drainage, estimated to cost nearly Rs. ■ lakhs, still hang fire. The latter has recently received the sanction of Government; the former was delayed pending a decision as to the discharge of storm water into the Circular Canal, ■ course which has recently been ruled to be inadmissible. The fact that suburban Calcutta returns a mortality of 47·7 per mille and the fringe area a rate of 40·1 per mille, in comparison with that of 36·1 in urban Calcutta proper, argues the urgent need of both schemes.

9. The proposals for improving the filtered water-supply of the city have passed through greater vicissitudes and have made less practical progress. While regretting this result, the Lieutenant-Governor recognises that it was to some extent inevitable. The magnitude of the problem and the complicated interests concerned demanded the fullest expert consideration, and an immediate finding as to the best policy was impossible. After protracted discussion, the Corporation now seems at length to be approaching a conclusion as to the course of action to be followed, and some more definite progress may be hoped for.

The delay has been due to the abandonment of the scheme in hand at the close of the year 1902-03, which contemplated the retention and improvement of the existing underground reservoirs and pumping stations, although little actual work had been done in connection with it. The year 1904 saw a fresh project, initiated by Mr. MacCabe, Chief Engineer, for the substitution of a central elevated reservoir from which the water would be distributed by a system of gravitation, and pending the receipt of expert opinion from England upon its merits work was suspended except in so far as it was common to both plans. The opinion taken having proved favourable, and the report having been adopted by the Corporation during 1905, an advance might have been anticipated, but a suggestion to discard the dual supply of filtered and unfiltered water led to further discussion and delay. The merits of the substitution of a single filtered supply can scarcely be disputed. The question was purely whether within a reasonable cost it was practicable to effect the improvement, and this had eventually to be decided in the negative. Allowing for a provision for the next 25 years, it was finally estimated that for non-domestic purposes only an addition of 2½ millions filtered gallons would be required, at a cost of about Rs. 40 lakhs, if the use of unfiltered water was to cease. Such an expenditure was deemed prohibitive, and, assuming the continuance of the unfiltered supply, the scheme narrowed itself once more to the provision of a further 20-million gallons of filtered water which, added to the same quantity which is at present available, was estimated to meet the requirements of the city and suburbs for domestic use during the next quarter of a century. The method of the introduction of this supply next claimed attention, and the proposed construction of a masonry aqueduct from Pulta to Tallah was vetoed upon sanitary grounds. The substitution of an iron main being held to be unduly expensive, an alternative scheme providing ■ daily supply of 32 million gallons by increased pressure upon the mains is now under consideration, an elevated reservoir taking the place of the present pumping arrangements. The outlines of the project are still to be elaborated, but in the meantime they have received the general approval of Government.

11. It is not the case, however, that pending the decision thus arrived at, nothing has been done towards improving the filtered water-supply during the last three years. The work which would be required in any event, whether distribution was to be by gravity or by pumping, was estimated to cost Rs. 14,50,000, including a new reservoir at Tallah, together with the larger mains, and the meters, sluices, etc., requisite for a con-

tinuous supply, and the greater part of this expenditure has been incurred. An outlay of Rs. 1,27,000 for the construction of two new filter beds at Pulta has only recently been approved. Meanwhile the erection during 1904-05 of new machinery putting pressure on the mains at Pulta has proved thoroughly successful, and the increased daily supply so secured is over 6 million gallons. Taking the triennium as a whole, the population to which the continuous supply, so called, is available has increased from 107,793 during 1902-03 to 459,000 in 1905-06; but the ideal of a continuous supply at a pressure of 40 feet throughout the 24 hours has not yet been arrived at, and until this has been achieved the full benefits of the continuous supply in enforcing economy in the use of water are lost. The Lieutenant-Governor has read with interest the remarks of the Health Officer regarding Dr. Mullan's analysis of the statistics of cholera cases in connection with water-supply; and the decision to increase the number of standposts in *bustees* is fully justified by the conclusion that those living in huts which are scantily supplied with water are much more liable to contract cholera than the inmates of masonry houses where the water-supply is adequate.

The reports for each of the three last years have commented upon the difficulties encountered in maintaining the supply of unfiltered water; and the remedial action taken has consisted of the better maintenance of the engines at Mullick's Ghat, the linking up of that pumping station and Watganj, and the laying of new and larger mains. It is now proposed to spend Rs. 60,000 upon the improvement of the plant at Mullick's Ghat.

12. The street conservancy of the town has always presented special difficulties due largely to the popular habit of dumping refuse upon the roads at all hours, and complaints of inefficiency have not been wanting during the last three years. During the year under review, however, measures have been taken after a valuable enquiry by the Deputy Chairman, Mr. Payne, which will, it is hoped, give a satisfactory afternoon as well as morning service throughout the city. The requirements of each district in respect of carts and animals have been fixed, deficiencies of stock have been partially made good, and a better organisation has been prescribed. The additional annual expenditure involved is Rs. 39,000, but the object in view is well worth paying for. The annual expenditure* upon road repairs has fluctuated curiously during the last three years, and it can scarcely be said that a marked improvement has been effected. Various trials were made with different materials, with more or less success, and noticeably the costly experiment of the use of moorum was discontinued. Useful progress has been made in the paving of sideways and in the kerbing and channelling of roads. The lighting of the town is still in a backward condition, though oil lamps are being gradually relegated to the bye-lanes and suburbs, and incandescent gas has been extended to the principal roads. The consideration of the arrangements to be entered into when the present gas contract terminates in 1911 is an important subject of the near future.

* *Expenditure upon road repairs.*

	Rs.
1903-04	4,72,466
1904-05	3,98,181
1905-06	4,48,487

13. The most noticeable building operations of the triennium comprised the erection of the new head office amid vastly improved surroundings; the construction of offices in Districts I and IV and of a gowkhana in the former; the extension of the Tangra slaughter-house; the completion of the Lansdowne Market; the opening of a vaccine station at Balliganj; and the installation of a crematorium. In their administration of the Sir Stuart Hogg Market the Corporation can claim a marked success; the total receipts of Rs. 1,77,285 in 1902-03 have risen to Rs. 2,38,142 in 1905-06. Further extensions to the market are contemplated, but the Lansdowne Market has not so far proved a profitable venture.

14. The birth and death-rates in the whole town during the three years ending with 1905 were as follows:—

	* Births per mille.	* Deaths per mille.
1903	15·5	35·1
1904	17·9	32·2
1905	18·4	37·9

*Calculated on census population 1901.

The statistics of births have long been recognised to be defective, and although there would seem some indication of improvement, there is no doubt that accuracy has not yet been arrived at. The Lieutenant-Governor would urge the desirability of a speedy decision as to the extension of the system of check by a peripatetic staff, which has been in successful working in District I since 1903. As regards the figures of mortality, the whole of the report of the Health Officer is full and interesting, but it is not possible here to do more than notice the more salient features. Plague, which showed a recrudescence in 1903, was less prevalent in the succeeding year, but was again severe during 1905. Fortunately it again waned during 1906. Cholera prevailed extensively during the triennium, and was especially severe in 1905. The future prevention of this scourge is bound up with the extension of the filtered water-supply. Small-pox after occasioning little mortality during 1903 and 1904, and during the greater part of 1905, assumed an epidemic form in December of that year, which during the first quarter of 1906 developed into an outbreak of greater severity than had been known for 20 years. The Lieutenant-Governor has pleasure in recognising the admirable work done by the Vaccination Department, noticeably by Mr. Chetty, the Officer in charge of the Balliganj Depôt. A serious feature in the returns of the last three years is the increase in the number of deaths recorded from tubercle and respiratory diseases (other than tubercle of the lung). The growing registered mortality under the former head is possibly due to more accurate diagnosis, and although special remedial measures are advocated by the Health Officer, it is not clear what line it is proposed that they should take. It is from the prevention of overcrowding that much practical good may be hoped for, and it cannot be said that great progress has been made in this direction in recent years. The Lieutenant-Governor is glad to observe that the matter of improving the milk supply has been taken in hand by the Corporation. A scheme of sanitary municipal cowsheds to be rented to *gowalas* would offer a possible solution of the existing difficulties, but the financial aspects of such a proposal deserve careful consideration.

15. Upon a review of the history of the past three years, the Lieutenant-Governor notes with satisfaction the progress that is taking place in all branches of the Municipal Administration. This no doubt is largely due to the increased co-operation which has been obtained from the Commissioners by the appointment of Standing Committees, which have enabled individual members to exercise a far closer and more effective control over the work of the several Departments. Many valuable suggestions have also been received from the Committees which reviewed the Chairman's annual reports, and Sir Andrew Fraser congratulates the Commissioners on the zeal with which they have responded to the increased opportunities of control and on the numerous and valuable improvements which have resulted from their efforts.

16. Owing to ill-health Mr. Greer, Chairman of the Corporation, was compelled to proceed on leave, and after a short officiating incumbency of Mr. Payne, Deputy Chairman, Mr. Allen was appointed and ultimately confirmed in the post. Mr. Payne continued to fill the office of Deputy Chairman, and Babu Nilámbará Mukharji that of Vice-Chairman. To all these officers the Lieutenant-Governor tenders his cordial thanks for the zealous and efficient manner in which their duties have been discharged, while equally to the members of the Corporation and General Committee who have recently laid down office, and to their successors, he desires to offer his acknowledgment of the industry and public spirit with which they have joined in the administration of the affairs of the town.

By order of the Lieutenant-Governor of Bengal.

H. J. McINTOSH,

Secy. to the Govt. of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1906-1907.

No. 843B., dated Calcutta, the 9th February 1907.

From—Pandit Rama Ballabha Misra, M.A., Offg. Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

I am directed to submit the following report on the state of the salt market for the third quarter of the year 1906-1907, comprising the months of October, November and December 1906.

Member in charge :
The Hon'ble Mr. W. C. Macpherson, C.S.I.

2. The quantity of salt of every description cleared during the quarter amounted to 28,33,025 maunds, as compared with 21,55,780 maunds in the previous quarter, and 26,08,975 maunds in the corresponding quarter of the previous year. The net amount of duty levied thereon was Rs. 38,33,752, as against Rs. 29,43,586 in the previous quarter, and Rs. 35,79,211 in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years :—

Table I.

Whence imported.	1904-1905. Third quarter. Imported.	1904-1905. Third quarter. Cleared.	1905-1906. Third quarter. Imported.	1905-1906. Third quarter. Cleared.	1906-1907. Third quarter. Imported.	1906-1907. Third quarter. Cleared.
1	2	3	4	5	6	7

Salif	5,21,564	6,34,367	5,36,376	5,01,894	2,72,105	3,25,247
Hawayah	3,09,348	1,35,240	.....	97,642	.....	3,770
Aden	.....	2,40,815	2,98,331	3,21,155	3,82,566	3,00,005
Muscat, Linga, Ranjam, &c.	60,998	7,350	40,500	48,151	42,610	34,350
Rock salt	2,905	11,470	.....	7,250	.....	5,226
North Africa, Egypt, &c.	.....	.....	.....	322	.....	.....
East Africa, Mauritius, &c.	.....	6	.....	.....	.....	.....
South Africa, Cape Colony, Natal, &c.	.....	.....	.....	1	.....	.....
Bombay	1,63,667	1,98,111	4,59,749	2,53,094	2,65,537	2,46,612
Madras and Cocoanada	24,052	24,001	15,986	15,801	.....	.....
Ceylon	.....	.....	.....	4	.....	.....
Straits Settlements	.....	.....	.....	1	.....	.....
Australia (Victoria) and New South Wales ...	.....	2.....	.....	28	.....	.....
Total ...	21,52,499	23,78,998	24,13,488	26,50,549	29,91,105	25,93,886

Compared with the corresponding quarter of the previous year and the same quarter of 1904-1905, importations were greater by 23·7 per cent. and 39 per cent., respectively, and clearances by 5·8 and 17·9 per cent.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter, as compared with the preceding four quarters :—

Table II.

Where stored.	Third quarter of 1905-1906.	Fourth quarter of 1905-1906.	First quarter of 1906-1907.	Second quarter of 1906-1907.	Third quarter of 1906-1907.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Government Salt golas	9,97,186	12,09,169	11,75,305	14,24,711	13,80,223
Kidderpore Dock ditto	6,26,631	4,07,851	6,94,857	7,27,560	6,83,557
Chandhali (private bonded salt warehouses) ...	10,420	3,080	8,200	13,900	17,200
Total ...	16,64,186	16,20,090	18,78,362	21,75,250	20,80,979

The stock remaining in the golas was less than the balance of the previous quarter, but was considerably greater than that of the corresponding quarter of the previous year.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director-General of Commercial Intelligence when they are available. Table III which showed such despatches is omitted from this report.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 405 maunds, as against *nil* in the previous quarter and 405 maunds in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of the Lower Provinces during the quarter amounted to 2,144 maunds, as compared with 3,516 maunds in the previous quarter and 963 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 38,253 tons. It is reported that the vessel *Gutenfels* is afloat for Calcutta with an approximate quantity of 1,250 tons of salt from Hamburg.

9. Table IV shows the average wholesale prices per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter :—

TABLE IV.

DESCRIPTION OF SALT.	Fortnight ending 15th October 1906.	Fortnight ending 31st October 1906.	Fortnight ending 15th November 1906.	Fortnight ending 30th November 1906.	Fortnight ending 15th December 1906.	Fortnight ending 31st December 1906.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Liverpool *panga*	40 12 6	42 15 1	42 0 0	42 14 0	42 2 3	42 6 0
Hamburg *karkatch*	46 8 7	45 9 0	43 0 3	44 0 0	44 0 0	46 2 1
Muscat *ditto*	.....	34 0 0	.....	33 0 0	33 0 0	35 0 0
Bombay *ditto*	39 10 3	40 2 0	47 0 0	46 0 0	42 8 0	42 0 0
Aden crushed	40 0 3	41 0 0	41 5 4	41 14 10	44 0 0	.....
Salif ditto	42 0 0	42 0 0	.....	.....	.....	.....

During the quarter the prices of Liverpool *panga* and Hamburg *karkatch* fell, while those of Aden crushed rose. The prices of Muscat *karkatch* fell and rose again, while those of Bombay *karkatch* rose and fell. The prices of Salif crushed remained stationary. There were no imports of Madras salt during the quarter.

10. The quantity of sea-imported salt admitted into, and cleared from, bond at the inland warehousing station of Chandbali in the district of Balasore, during the quarter and the corresponding quarter of the previous year, is given below :—

DESCRIPTION OF SALT.	ADMITTED INTO BOND.		CLEARED.	
	Third quarter of 1906-1906.	Third quarter of 1906-1907.	Third quarter of 1906-1906.	Third quarter of 1906-1907.
1	2		4	5
	Mds.	Mds.	Mds.	Mds.
English *panga*	19,000	36,200	16,488	37,429

As compared with the corresponding quarter of the previous year, there was a great increase both in the quantity admitted into bond and in that cleared.

11. The quantity of Madras and Bombay salt imported inland and consumed in each of the districts of the Orissa Division, including the Tributary States, during the quarter and the previous two quarters, is shown below :—

Name of District.	Madras Salt.			Bombay Salt.			Remarks.

WEATHER AND CROP REPORT.

For the week ending the 25th February 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	Burdwan ...	Inches. Nil	8½	8½	Weather seasonable. Lands being ploughed and manured for the next season. Standing crops good. Cholera and small-pox continuing in the Katwa subdivision and small-pox in the Sadr. No cattle-disease. Fodder and water sufficient.
2	Birbhum ...	0·16	8	8	Sugarcane-pressing commenced. No cattle-disease. Fodder and water sufficient.
3	Bankura ...	Nil	9½	9½	Weather seasonable. Pressing of sugarcane going on. Some damage to *rabi* crops by hail storms reported in the Vishnupur subdivision. No cattle-disease.
4	Midnapore ...	Nil	9	8	Slight showers in Contai and Tamluk. Summer rice and oilseeds promising. Fodder and water sufficient.
5	Hooghly ...	Nil	7	7	Weather seasonable. Fields being ploughed for jute. Pressing of sugarcane going on. Prospects of *rabi* crops and potatoes fair. No cattle-disease. Fodder and water sufficient.
6	Howrah ...	Nil	9	8	Standing crops doing well. In the Ulubaria subdivision summer rice being transplanted. No cattle-disease.
7	24-Parganas	Nil	8		Weather seasonable. Lands being prepared for the next crops. Harvesting of *rabi* crops going on in the Baraset and Basirhat subdivisions, and that of sugarcane nearly finished in Barrackpore. State of standing crops good. Prospects good. Cattle in good condition. Supply of fodder and water sufficient.
8	Nadia ...	0·09	8	8	Prospects of standing crops fair. Gram being damaged by insects in some parts of thanas Tehatta and Karimpore. No cattle-disease. Fodder and water sufficient.
9	Murshidabad	Nil	8	8	Weather seasonable. Prospects of *rabi* crops well except in certain thanas of the Kandi subdivision. Fodder and water sufficient.
10	Jessore ...	Nil	7¼	7 7/16	Weather seasonable. Prospects of standing crops fair. Rain urgently wanted. High prices continuing. Malarial fever and cholera raging at Sadr and in the interior. No cattle-disease. Fodder and water sufficient except at Magura.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	Nil	10	10	Weather seasonable. State of linseed fair. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	0·24	9½ 15*	10 15*	Weather fair and occasionally cloudy. Harvesting of *rabi* crops commenced in places. Some damage done to *rabi* crops by the recent rainfall and cloudy weather. No cattle-disease. Fodder and water sufficient.
13	GAYA ...	0·31	9 1/16 14 1/16*	9 1/16 13 5/8*	Weather cool and clear with two rainy days. Harvesting of *rabi* and pressing of sugarcane continuing. Fodder and water for cattle sufficient.
14	SHAHABAD ...	0·24	10½ 16*	10½ 16*	Slight rain general. Harm likely to be done to nearly all the standing crops by this week's rain. Sugarcane pressing going on. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	0·21	9 13¾*	9 14*	Weather unsettled. Pressing and planting of sugarcane still continuing. *Rabi* crops ripening. Peas being harvested. Lancing of poppy begun. Lands being prepared for indigo sowing. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	0·20	9½ 12½*	9½ 12½*	Rainfall at Bettia 0·26. Rain beneficial to *rabi* and poppy crops. Harvesting of oilseeds and pressing of sugarcane in progress. Lands being ploughed. Poppy flowering. Average daily attendance on two test-works for the week 152. Imports in excess of exports during the week. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	0·09	9 14*	9 14*	Weather cold and sometimes cloudy. Common rice and *makai* selling at 10 and 12½ seers a rupee at Sitamarhi and 9 and 13⅔ seers a rupee, respectively, at Hajipur. Attendance at kitchens on the last day of the week 367, and number on test-works on 23rd February—Nawada tank 198, Rani Syedpur tank 257. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	8¾ 12½*	8¾ 18*	Weather cloudy at times. Harvesting of mustard and peas in progress. Number on relief works 45,894. Total number of persons gratuitously relieved, including village doles, 13,205. Number on test-works in the Madhubani subdivision 1,907. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.

		Inches.			
19	Monghyr ...	0·05	9 13*	8½ 12½*	Weather seasonable. *Rabi* crops doing well. Cattle-disease reported from Jamui subdivision. Fodder and water sufficient.
20	Bhagalpur ...	0·07	9½ 13½*	8½ 13½*	Weather seasonable. *Rabi* crops in good condition. Sugarcane being pressed and planted. Rains were beneficial for the growth of standing *rabi* crops and were useful for ploughing of lands for the ensuing season. Cattle-pox reported from Dhoraiya in Banka. Fodder and water sufficient.
21	Purnea ...	0·05	7½ 11½*	7½ 11½*	Weather seasonable. Rainfall at Kishanganj 0·09. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	1·56	7 11*	7 11*	Weather cold. Hills—Wheat, barley and mustard in fair state. Terai—Sugarcane and tobacco being cut. Ploughing for jute and *bhadoi* going on.
23	Sonthal Parganas.	Nil	9 14½*	9 14*	Weather seasonable. Prospects of *rabi* crops fair. Cattle-disease reported from the Sadr and Jamtara subdivisions. Fodder and water sufficient.
24	Cuttack ...	Nil	10½	10½	Cotton, tobacco and sugarcane growing well. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	9½	9½	Weather partially cloudy. Threshing of paddy, pressing of sugarcane and harvesting of *rabi* crops continuing. Vegetables doing well. Prospects fair. Sporadic cases of rinderpest reported from Balasore Circle. Fodder and water sufficient.
26	Angul ...	1·83	10½	10½	Weather misty. Sugarcane-pressing nearly finished. Cattle-disease in 5 or 6 villages. Fodder and water sufficient.
27	Puri ...	Nil	10½	10½	Weather seasonable. *Sarad* being harvested. Cotton growing well. Sugarcane being pressed. *Dalua* getting on well. *Kulthi* being harvested. Other *rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	Nil	11	11	Weather cloudy and nights cool. Rice and sugarcane fields being ploughed for next season. Standing crops in good condition. No cattle-disease. Fodder and water sufficient.

* The figure indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	...	[illegible]	9	Prospects of standing crops fair. Lands being ploughed. Outturn of poppy juice not good. Fodder and water sufficient.
30	Ranchi ...	0·67	10	10	Weather seasonable. Ploughing of lands in progress. *Rabi* crops damaged to some extent by the recent rain and hail in thanas Sesai and Ghagra. Cattle-disease reported from four thanas. Fodder and water sufficient.
31	Palamau ...	0·73	9	9	Weather cloudy. Rain general all over the district. *Rabi* crops slightly damaged by rain. Transplantation of sugarcane still in progress. Cattle-disease existing. Fodder and water sufficient.
32	Manbhum ...	Nil	10	10	Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia and Gobindpur. Fodder and water sufficient.
33	Singhbhum ...	0·70	9	9	Pressing of sugarcane continuing. Common rice selling at 10 and 11 seers a rupee at Kharsawan and Seraikella, respectively. Condition of cattle good. Fodder and water sufficient.
34	Cooch Behar	0·14	$7\frac{4}{11}$	$7\frac{5}{11}$	Weather seasonable but cloudy. Harvesting of tobacco commenced. Fodder and water sufficient.

General Summary.—Light rain was general in Bihar and Chota Nagpur. In the rest of the Province, there was no rain, except in Darjeeling and Angul, where the fall amounted to 1·56 and 1·83 inches, respectively. Harvesting of *rabi* has commenced. Some *rabi* has been slightly damaged by the recent rainfall in Patna, Shahabad and Palamau, and by hail-storms in Bankura and Ranchi. Gram is being damaged by insects in Nadia. The number of persons receiving gratuitous relief is—Muzaffarpur 367 and Darbhanga 13,205. The number of persons on test-works is—Champaran 152, Muzaffarpur 455 and Darbhanga 1,997. The number on relief works in Darbhanga is 45,894. Cattle-disease prevails in eight districts. Fodder and water are generally sufficient except in parts of Jessore. The price of common rice has risen in two and fallen in five districts: in the remaining districts it has been stationary.

The mean pressure of the seven days		Inches. 29·981
The average pressure of the corresponding period for 24 years, Surveyor-General's Office		29·943
		Hours.
The total number of hours of bright sunshine		57·3
The maximum possible number of hours of sunshine		80·2
The mean temperature of the seven days		72·1
The average temperature of the corresponding period for 24 years, Surveyor-General's Office		74·4
The extreme variation of temperature		29·9
The maximum temperature		87·1
		Miles.
The highest velocity of the wind in one hour		12
		%
The mean relative humidity		64
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		67
		Inches.
The total fall of rain from 17th to 23rd February 1907		Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·26
The total fall from 1st January to 23rd February 1907		0·99
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·80

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⛅, dew.

C. W. PEAKE,
for *Director-General of Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 25th February 1907.

		Inches.			
29	HAZARIBAGH	—	9	9	Prospects of standing crops fair. Lands being ploughed. Outturn of poppy not good. Cattle-disease reported from two thanas. Fodder and water sufficient.
30	RANCHI ...	Nil	10$\frac{1}{2}$	10	Weather seasonable. Ploughing of lands in progress. *Rabi* crops doing well. *Mahua* damaged by rain in thana Kochdega. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	PALAMAU ...	Nil	9	9	Weather seasonable. Standing crops fair. Planting of sugarcane still going on. Cattle-disease reported from two thanas. Fodder and water available.
32	MANBHUM ...	Nil	10	10	Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia and Gourangdi. Fodder and water sufficient.
33	SINGHBHUM ...	Nil	9	9	Pressing of sugarcane nearly finished. Common rice selling at 10 seers a rupee at Kharsawan. Report from Seraikella not received. Fodder and water sufficient.
34	COOCH BEHAR	Nil	7$\frac{4}{11}$	7$\frac{4}{11}$	Weather seasonable; occasionally cloudy. Lands being prepared for jute. Fodder and water sufficient.

GENERAL SUMMARY.—Very light showers are reported from Hooghly, Howrah, Jessore, Khulna, Patna, Muzaffarpur, Darbhanga, Monghyr, Puri and parts of Midnapore. There was no rain in the rest of the Province. Sugarcane-pressing still continues. Harvesting of the early *rabi* crops is in progress. Prospects of the *rabi* crops are on the whole fair. The number of persons receiving gratuitous relief is—Muzaffarpur 210 and Darbhanga 13,000. The number on test-works is—Champaran 102, Muzaffarpur 147 and Darbhanga 1,647. The number on relief works in Darbhanga is 29,809. Cattle-disease prevails in nine districts. Fodder and water are reported sufficient, except in parts of Jessore. The price of common rice has risen in three districts, fallen in seven and has been stationary in the rest.

	Inches.
The mean pressure of the seven days	29·937
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·889
	Hours.
The total number of hours of bright sunshine	55·8
The maximum possible number of hours of sunshine	81·3
The mean temperature of the seven days	74·7
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	76·8
The extreme variation of temperature	38·6
The maximum temperature	91·6
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	61
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	64
	Inches.
The total fall of rain from 24th February to 2nd March 1907	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·42
The total fall from 1st January to 2nd March 1907	0·09
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·72

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Alipore Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⌓, dew; ☰ fog; t thunder; o overcast.

C. W. PEAKE,
for *Director-General of Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 4th March 1907.

Weekly Return of Traffic Receipts on Indian Railways.

ASSAM-BENGAL RAILWAY.

SUMMARY OF THE RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE MONTH OF FEBRUARY 1907.

In February, the rainfall was general over the Province. Showers were of daily occurrence from the 1st to the 8th, more especially in Bihar and Chota Nagpur, where they were also very heavy.

In South-West Bengal, rain was deficient in the districts of Midnapore, Howrah, 24-Parganas, Nadia, Murshidabad, and Jessore, while in the other districts it was in slight excess.

In Bihar, except in the district of Purnea, and in Chota Nagpur the precipitation was well above the average. Bihar received nearly four times and Chota Nagpur three times the average.

In Orissa, also, except in the districts of Puri and Balasore, the fall was above the normal, being nearly three times the average.

Percentage excesses were recorded in Bihar, Orissa and Chota Nagpur, while there was a slight defect in South-West Bengal. Bihar received 356 per cent. of the normal, Orissa 318 per cent., Chota Nagpur 301 per cent. and South-West Bengal 53 per cent.

The following table gives a summary of the rainfall data of each of the four Meteorological Divisions of the Province of Bengal for the month of February 1907:—

Meteorological Divisions.	Rainfall of month. Average for the Division.	Normal average.	Variation.	Rainy days. Average number in month.	Normal average number in month.	Variation.	Rainfall since 1st October 1906. Average for the Division.	Normal average.

The mean pressure of the seven days		Inches. 29·922
The average pressure of the corresponding period for 24 years, Surveyor-General's Office		29·847
The total number of hours of bright sunshine		Hours. 62·2
The maximum possible number of hours of sunshine		82·3
The mean temperature of the seven days		79·0
The average temperature of the corresponding period for 24 years, Surveyor-General's Office		78·0
The extreme variation of temperature		32·0
The maximum temperature		93·7
The highest velocity of the wind in one hour		Miles. 15
The mean relative humidity		% 57
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		69
The total fall of rain from 3rd to 9th March 1907		Inches. Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·46
The total fall from 1st January to 9th March 1907		0·09
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·18

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

☁, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 11th March 1907.

C. W. PEAKE,
for *Director-General of Observatories.*

EASTERN BENGAL STATE RAILWAY.

Abstract of Principal Commodities carried over the Eastern Bengal State Railway during the month of December 1906 as compared with the same month of the previous year.

REPORT ON THE ADMINISTRATION OF THE OPIUM DEPARTMENT DURING THE SEASON 1905-06.

NOTIFICATION.

No. 321—O.—The 13th March 1907.—The following extracts from the Report of the Board of Revenue on the Administration of the Opium Department during the year 1905-06, are published for general information.

H. J. McINTOSH,
Secy. to the Govt. of Bengal.

No. 1029B., dated Calcutta, the 16th February 1907.

From—PANDIT RAMA BALLABHA MISRA, M.A., Offg. Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

I AM directed by the Board of Revenue to submit the annual report on the operations of the Opium Agencies of Bihar and Benares during the season 1905-06, that is to say, from the 1st November 1905 to 31st October 1906.

THE HON'BLE MR. W. C. MACPHERSON, C.S.I.

* * * * *

5. *Check-measurement by Gazetted officers.*—In the Bihar Agency there has been a marked increase in the area test-measured as compared with the previous season, which is satisfactory. The total area test-measured was 21,189 bighas, or 6·5 per cent. of the cultivated area, as compared with 20,544 bighas, or 6·2 per cent. in the preceding year. The number of raiyats whose lands were test-measured also increased from 32,588 in the preceding year to 37,177. The results obtained have also been satisfactory, for, except in the case of one muharrir in Tirhut who was punished with suspension, no false measurements were detected. In that Sub-Agency there were also a few cases in which the cultivators had made only a pretence of sowing poppy.

The return of test-measurements in the Benares Agency exhibits 48,389 bighas test-measured out of a total of 671,064 bighas, or 7·21 per cent. against 7·85 in the previous year. The work of the measuring muharrirs was found to have been generally well done in all divisions.

6. *Settlements.*—In the Bihar Agency 338,020 bighas were settled or 2,129 bighas less than in the previous year. In Tirhut, Motihari, Gaya, Tehta and Hazaribagh the area settled was greater than in the previous year, while in the remaining Sub-Agencies, viz., Chapra, Aliganj, Bettiah, Shahabad, Patna and Monghyr, there was a decrease. In Aliganj the decrease is attributed partly to the giving up by the Department of unprofitable lands, and partly to the relinquishment of some lands by cultivators who find other crops more profitable. In Dehri (Shahabad) the decrease is attributed to the fact that owing to deaths from plague and the absconding of raiyats, land has fallen into the hands of maliks who are unwilling to re-engage for poppy. The reason stated for the decrease in other Sub-Agencies, where any is given, is the giving up of unprofitable lands, and this is especially true in Monghyr, where over 1,000 bighas were struck off in one *kothi*. Mr. Bright will continue to impress upon all his officers that they should follow the policy of relinquishment of unprofitable lands when conducting their settlements.

* * * * *

7. *Measurements and actual cultivation.*—In the Bihar Agency the area cultivated during the year under review was less by 5,428 bighas than in the preceding year, while the decrease in the area engaged for was no less than 10,380 bighas. The cultivation over an area of 6,914 bighas, as against 8,040 in the preceding year, is reported to have failed owing to climatic causes, while non-fulfilment of engagements accounts for the decrease of 3,775 against 4,149 bighas. The decrease was shared by all the Sub-Agencies except Tirhut, Aliganj, Motihari and Bettiah. The Sub-Agencies in which the greatest decreases occurred were Chapra (4,143 bighas), Patna (1,119 bighas), and Hazaribagh (525 bighas). Relinquishments of bad lands have been the general cause of the decrease.

In the Benares Agency, on the other hand, the measurements showed that 671,064 bighas of poppy had been sown, or 27,338 bighas in excess of the area engaged for. Mr. House reports that this rise of 4¼ per cent. at measurements is unusual, and no doubt is to be explained to a great extent by the difficulty which was experienced in many divisions in obtaining the seed for cereals. In the whole Agency the area on which the crop failed owing to climatic causes was 16,311 bighas as against 16,794 in the preceding year, and the area wilfully left unsown was only 383 bighas. Opium cultivation in this Agency is decreasing in the east and extending to the west and north-west.

8. *Weather and general results.*—The season in Bihar is described by the Agent as having been disastrous. Generally speaking, what promised early in the season to be a bumper crop turned out a very poor one. Moisture for sowings was generally sufficient. Then followed abnormally hot weather and some damage was done to the seedlings which here and there had to be resown. But prospects on the whole continued to be good until the end of December. January brought a few showers only. In the middle of February a spell of bad weather set in which lasted well into March. This extraordinarily inclement weather, which was worst in the large Sub-Agencies of Gaya and Tehta, washed the drug off the capsules continuously and did great damage to leaf. In Hazaribagh and Monghyr excessive rain in February, boisterous winds and some hail had also a most disastrous effect on both the leaf and opium,

and the result in both Sub-Agencies was most disappointing. Tirhut was similarly affected by unsettled weather, which greatly damaged the leaf-supply and diminished seriously the outturn of opium. The other Sub-Agencies were less seriously affected, but the damage done throughout the Agency was so great that while the estimated outturn was 29,356 maunds, the actual outturn was less than 25,000. For the same reason the leaf-supply was very small. The year was a most disappointing one for cultivators, who were much disheartened.

In the Benares Agency also the weather conditions were not very favourable. The monsoon rains of 1905 came to an end somewhat earlier than usual. The dryness of the season in the earlier part rendered second and third sowings necessary in most divisions, and complaints of damage by various insect-pests were not uncommon. Throughout the Agency practically no rain fell until the third week of February, when heavy falls occurred, accompanied in some divisions by hail-storms of varying severity. There was also some rain in March. Certain tracts benefited greatly by the rain in the later part of the season, but in others the continuous cloudy weather and the heavy falls of rain injuriously affected the outturn, both of opium and of leaf.

* * * * *

10. *Outturn of opium.*— * * *

* * . In the two Agencies taken together the *damdeta* produce at 70° consistence, which showed a decrease of 7,585 maunds in 1904-05 as compared with that of the season 1903-04, has increased by 3,260 maunds in the year under review in comparison with the produce of the preceding season. This result is due to an increase of 12,636 maunds in the production of the Benares Agency in which fourteen out of nineteen Sub-Agencies show an increase, whereas all the divisions of the Bihar Agency show a decrease amounting in all to 9,376 maunds, or about 26 per cent. less than the produce of 1904-05. In Bihar the general average gross produce per bigha (excluding failures) fell from 4 seers 2 chitaks 2 kachas to 3 seers 3 kachas, while in the Benares Agency the average produce per bigha was 5 seers 1 chitak, or 7 chitaks over that of the preceding year. The best divisional average was that of Rae Bareli, viz., 6 seers 2 chitaks.

* * * * *

11. *Average area per license and per cultivator.*—In the Bihar Agency the average area cultivated with poppy by a raiyat is highest in Shahabad and lowest in Tirhut. In the Benares Agency Etawah shows the highest, and Basti the smallest, area. Mr. House observes that the largest licenses as a rule give not merely the largest gross outturn but the largest average per cultivator. He attaches considerable importance to the maintenance of large licenses and observes that men of position will not take up petty licenses.

12. *Average produce per license and per cultivator.*—In Bihar the average produce per cultivator has decreased from 2 seers 7 chitaks and 3 kachas to 1 seer 12 chitaks and 2 kachas, whereas in the Benares Agency it has increased from 3 seers 1 chitak and 2 kachas to 3 seers and 6 chitaks during the year under review. Five Sub-Agencies, viz., Etawah, Budaon, Lucknow, Bara Banki and Rae Bareli, show an average produce of more than 4 seers per cultivator. On the contrary there is only one Sub-Agency in Bihar, viz., Shahabad, which shows more than 3 seers as the average produce per cultivator. Unless a cultivator can get not less than 4 seers of opium to the bigha his profit from the cultivation is only of moderate amount.

* * * * *

15. *Consistence of the season's opium.*—The consistence of the drug of the Bihar Agency was high this year, the general average having been 74·68° which is very nearly equal to the average of the last ten years and nearly two degrees better than in 1904-05. Out of the eleven Sub-Agencies, four—Aliganj, Motihari, Gaya and Hazaribagh—supplied opium of a consistence between 76° and 77°. The improvement is generally attributed to the greater heat in April which dried the drug more quickly than in the previous year. For the Benares Agency, however, the average consistence was again low this year, being 68·69° as compared with 70·18°, the average of the previous ten years.

The lowest consistence (63·73°) was again that of the Etawah Division. The low consistence of the Benares drug may be attributed to the continuous cloudy weather and the heavy falls of rain during the exudation of the juice as stated in paragraph 8 of this report.

* * * * *

21. *Advances and outstanding balances.*—The total advances in the Bihar Agency on account of opium, leaf and trash for season 1905-06 amounted to Rs. 65,80,962, and the final payments amounted to Rs. 65,63,600. The balance of advances outstanding in the Bihar Agency at the end of the year amounted to Rs. 17,970* on account of opium (or 0·2 per cent. on the total advances), as compared with Rs. 12,396 in the preceding year; and Rs. 16 on account of leaf. Considering the disastrous character of the season the amount of outstanding for the year is small. The largest part is due in Gaya, where the raiyats suffered extremely from inclement weather and where, in the previous year, there had been severe damage from hail. During the year outstandings of previous years to the amount of Rs. 11,880 were adjusted.

	Rs.
* On account of the year 1905-06 ...	17,445
On account of preceding year ...	525
Total ...	17,970

In Benares the total advances amounted to Rs. 1,76,92,928 and the total payments to Rs. 1,97,40,746; the final payments after adjustment amounted to Rs. 1,97,31,899. The balances unrealized at the conclusion of the year amounted to Rs. 9,972† (or 0·05 per cent. on the total advances) as compared with Rs. 10,698 in the preceding year. Of the balances of previous years, a sum of Rs. 9,573 has been adjusted during the year. The outstanding balances are due in most cases to damage caused by hail, notably in the Etawah Division. It is reported that the amount of Rs. 1,125 outstanding on account of previous years is irrecoverable.

	Rs.
† On account of the year 1905-06 ...	8,847
On account of previous year ...	1,125
Total ...	9,973

22. *Advances for wells.*— * * The Bihar Agent remarks that the conditions upon which these advances are made are too often forgotten by the raiyats, and with a cultivation which is yearly falling off, it becomes more and more necessary to be cautious about the giving out of such advances, as new cultivation of poppy, which is usually promised, generally disappears when the well has been in use for a short time. There is no doubt, however, that the wells are very useful to the raiyats.

* * * * *

In the Benares Agency applications for well advances were far more numerous than in the preceding year, and were specially popular in the Budaon and Mainpuri Divisions. The number of masonry wells constructed and under construction are also the largest in these two divisions. The Agent observes that such extensive well-making in the two canal-irrigated districts is remarkable. During the last thirteen years advances aggregating nearly 5½ lakhs of rupees have been made in this Agency for the construction and repair of wells; between 6,000 and 7,000 masonry wells have been built or are being built and 3,000 or 4,000 have been repaired; and about 32,000 *non*-masonry wells have been sunk. This is a satisfactory record.

* * * * *

29. *Expenditure.*—The total expenditure in the Bihar Agency amounted to Rs. 73,75,481, as compared with Rs. 96,07,215 in the previous year. * * * * * * * The average cost per maund and per chest of opium rose from Rs. 267 to Rs. 277 and from Rs. 477 to Rs. 497, respectively. This increase of cost was due to the poor outturn and to the high price of timber.

In the Benares Agency the total expenditure of the season amounted to Rs. 2,14,44,733 against Rs. 1,84,46,044 in the preceding year. The average cost per maund of opium has been Rs. 266 as compared with Rs. 271 in the previous year; and per chest was Rs. 467 against Rs. 473. The decrease of cost is due to the increase in outturn during the year under review.

30. *Cost of a chest of Provision Opium and net revenue.*—During the calendar year 1906, 52,800 chests of provision opium were sold in equal proportions from Bihar and Benares, the average prices realised for a chest from each Agency were Rs. 1,416 and Rs. 1,325, or Rs. 1,370 for both combined, against an average of Rs. 1,498 in 1905. The total sale-proceeds in 1906 amounted to Rs. 7,23,65,450. The total cost of manufacture of the produce sold (including Presidency charges, &c.) amounted to Rs. 1,32,64,980 in Bihar and to Rs. 1,36,98,376 in Benares, or a total of Rs. 2,69,63,356, giving an average cost per chest of Rs. 511. The net revenue derived from opium during the two calendar years 1905 and 1906 amounted to Rs. 4,81,84,115 and Rs. 4,54,02,094, respectively.

31. *Sales.*—The opium sales during the twelve months from November 1905 to October 1906, comprised 41,762 chests manufactured in 1903-1904 and 10,238 chests manufactured in 1904-1905, in all 52,000 chests, of which half was taken from each Agency in monthly lots of 4,000 chests during November and December 1905, and of 4,400 chests during January to October 1906. The number of chests sold during the twelve months was 52,000 chests, or 4,000 chests more than were sold during the previous corresponding period.

* * * \

IMPORTATION INTO INDIA OF RIFLES OF ·450 BORE.

No. 2014P.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT—POLICE BRANCH.

Dated Calcutta, the 16th March 1907.

RESOLUTION.

READ—

A letter, No. 2166—74, dated the 11th September 1906, from the Government of India, Home Department, forwarding a copy of a notification of that date making certain amendments in the rules issued under the Indian Arms Act, XI of 1878.

Read—

Also a Resolution, No. 454—66, dated the 14th February 1907, by the Government of India, Home Department, containing instructions regarding the importation into India, for a reasonable period, of all rifles of ·450 bore which were *bonâ fide* ordered and were actually in course of manufacture on or before the 11th September 1906.

In accordance with the instructions contained in paragraph 5 of the Resolution cited in the preamble, the Lieutenant-Governor is pleased to direct that applications for special permits for the importation of all rifles of ·450 bore which were *bonâ fide* ordered and were actually in process of manufacture prior to the 11th September 1906 by persons of the exempted classes resident in India must be submitted to this Government, through the Commissioner of Police, Calcutta, before the 1st May 1907, supported by the necessary documentary evidence. The Commissioner of Police will be instructed to forward the applications to this Government without any avoidable delay.

No such applications will be received or attended to after the 1st May 1907, on which date the prohibition will become absolute.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and guidance, and for communication to the dealers in arms and ammunition in Calcutta.

Ordered also that this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,

Chief Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, IRRIGATION DEPARTMENT.

Approximate Return of Traffic on the Circular and Eastern Canals for the week ending Saturday, the 16th March 1907, as compared with the corresponding week of the previous year.

WEATHER AND CROP REPORT.

For the week ending the 18th March 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	Burdwan ...	Inches. 0·29	9	8½	Rainfall general. *Rabi* crops and sugarcane being cut. No cattle-disease. Fodder and water sufficient.
2	Birbhum ...	0·49	8	8	Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
3	Bankura ...	2·75	9½	9½	Weather cloudy. Sugarcane-pressing progressing. Some damage done to mangoe by hail in the Vishnupur subdivision. No cattle-disease.
4	Midnapore ...	...	...	9	Light general rain. Sugarcane being planted. Prospects of *boro* paddy and cotton good. Fodder and water sufficient.
5	Hooghly ...	2·46	7½	7½	Weather cloudy. Rainfall general. Crops slightly damaged by hail-storms. Pressing of sugarcane continuing. Harvesting of potato going on. Lands being prepared for *bhadoi* crops. No cattle-disease. Fodder and water sufficient.
6	Howrah ...	0·42	9	9	Sugarcane being pressed. *Boro* rice being irrigated in the Uluberia subdivision. In spite of cloudy weather and untimely rainfall standing crops growing well. No cattle-disease.
7	24-Parganas	0·74	9	9½	Weather seasonable; cool and cloudy in the Basirhat and Diamond Harbour subdivisions. Rainfall general in the Barrackpore and Basirhat subdivisions. Lands being prepared for the next season's crops. Standing crops good. Prospects good. Cattle in good condition. Fodder and water sufficient.
8	Nadia ...	1·31	8½	8	Prospects of standing crops fair. Lands being ploughed for *aus* and jute. Harvesting of *gram* going on. Cattle-pox reported from Gagni. Fodder and water sufficient.
9	Murshidabad	0·10	8	8	Weather seasonable except during the latter part of the week when it was cloudy. Harvesting of *rabi* crops continuing. No cattle-disease.
10	Jessore ...	2·48	8 1/16	8½	Weather cloudy. Rainfall general and beneficial to the standing crops and cultivation. Prospects of standing crops fair. High prices continue. No cattle-disease. Fodder and water sufficient except in Magura.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	1·22	10	10	Weather stormy and rainy. Rainfall general. Outturn of winter rice and rape and mustard estimated at 74 and 89 per cent., respectively. Lands being prepared for jute. No cattle-disease.
12	PATNA ...	0·78	9½ 14½*	9½ 14½	Weather seasonable, but cloudy and rainy at times. Harvesting of the *rabi* crops and lancing of poppy continuing. Rainfall of the week likely to injure both poppy and such *rabi* crops as are ripe. No cattle-disease. Fodder and water for cattle ample.
13	GAYA ...	0·71	9 3/16 14 3/16*	9½ 13*	Weather cloudy with occasional rain on the last three days. Harvesting of *rabi*, pressing of sugarcane and lancing of poppy continuing. Fodder and water sufficient.
14	SHAHABAD ...	0·88	9½ 15*	9½ 16⅔*	Light rain general. *Rabi* crops damaged by hail-storms and rain in Notha thana. Harvesting of *rabi* crops continuing. Sugarcane planting commenced. Cattle-disease reported from Akbarpore and Nasriganj thanas. Fodder and water sufficient.
15	SARAN ...	0·48	9 14*	9 13¾*	Weather seasonable. Harvesting of *rabi* crops, pressing of sugarcane, lancing of poppy and sowing of indigo continuing. *Arhar* ripening. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	0·10	9½ 14*	9½ 14*	Rainfall at Bettiah 0·46 inches. Some damage done by rain and hail to *rabi* and poppy crops. Harvesting of *rabi*, and of opium, and preparation of lands for next season's crops going on. Test-works closed from the 14th instant. Average attendance for four days last week 105, against 109 in the previous week. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	1·21	9 14*	9 13*	Weather cold and occasionally cloudy. Rain and hail reported during the week. Slight damage done to tobacco, poppy, and some other *rabi* crops. Common rice and *makai* selling at 10 and 12 seers a rupee, respectively, at Sitamarhi and at 9½ and 13⅔ seers a rupee, respectively, at Hajipur. Attendance at Nawada tank-work on the 14th instant—17 only; at kitchen nil. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	1·29	8¾ 14*	8¾ 14*	Weather cloudy. Rain off and on 4 for days in the week. Rainfall more or less general. Harvesting of *rabi* crops commenced. Some damage to *rabi* crops by the recent rain and hail reported in Darbhanga and Bahera thanas. Number of persons on test-works in the Madhubani subdivision—1,530. Number of persons on relief-works on the 14th instant—19,309, showing a large and satisfactory decrease partly due to the *rabi* harvesting and partly to the reduction of wages. Total number of persons gratuitously relieved, including village doles, for the same day—11,410. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc
			This week.	Previous week.

		Inches.			
19	Monghyr ...	0·33	9 13*	9 13*	Weather unseasonable. Cloudy with occasional rain. Harvesting of *rabi* crops going on. Damage likely to have been caused by the rain of the last few days. Cattle-disease reported from the Jamui subdivision and from thana Berbhigha in the Sadar subdivision. Fodder and water sufficient.
20	Bhagalpur ...	0·78	9½ 13½*	9½ 13½*	Weather cloudy and drizzly. *Rabi* prospects fair. *Rabi* crops being harvested. Rains injurious to the *rabi* crops to a certain extent, but advantageous for ploughing of fields for *aghani*, sugarcane and *mung*. Mangoes slightly damaged. No cattle-disease. Fodder and water sufficient.
21	Purnea ...	1·68	7½ 12*	7½ 12*	Weather cold and cloudy. Rainfall at Kishanganj 0·90 inches. *Rabi* and mangoes injured by rain and hail. Harvesting of *rabi* crops going on. Lands being ploughed for *bhadoi* crops. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	1·63	7 11*	7 11*	Weather seasonable. Hills—Wheat, barley and mustard in fair state. Maize being sown. Terai—Sugarcane-cutting finished. Tobacco-cutting going on.
23	Sonthal Parganas.	0·38	9½ 15*	9½ 15*	Reports from Jamtara and Pakour not received. Weather cloudy. Prospects of standing crops fair. Cattle-disease reported from Sadar subdivision. Fodder and water sufficient.
24	Cuttack ...	Nil	10½	10½	Sugarcane being harvested. Tobacco and cotton growing well. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	0·38	9½	9½	Weather cloudy. Threshing of paddy and pressing of sugarcane continuing. Other crops and vegetables doing well. Prospects fair. Sporadic cases of rinderpest reported from Balasore Chakla. Fodder and water sufficient.
26	Angul ...	2·53	10½	10½	Weather cloudy. Lands being ploughed. Harvesting of castor and planting of sugarcane in progress. Cattle-disease reported from the interior. Fodder and water sufficient.
27	Puri ...	0·36	10½	10½	Weather seasonable. Harvesting of *sarad* finished. Cotton growing well. Sugarcane being pressed. *Dalua* getting on well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	0·56	11½	11½	Weather cool. Rainfall general. Rice and sugarcane fields being ploughed for the next season's crops. Standing crops in good condition. Cattle-disease prevalent in one village in Bargarh Tahsil. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at 8 a.m.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	2·25	9½	9½	Weather cloudy. General rain throughout the district accompanied with hail in certain places. Some damage reported to have been done to the standing crops by hail. Lands being ploughed for the next season's crops. Cattle-disease reported from one thana. Fodder and water sufficient.
30	Ranchi ...	4·28	10	10½	Weather cloudy. Prospects of *tewa* good. *Rabi* crops damaged in places to some extent by the recent heavy rain. Cattle disease reported from two thanas. Fodder and water sufficient.
31	Palamau ...	0·37	9 1/17	9	Weather cloudy. *Rabi* crops reported to have been damaged slightly by hail and rain in several places. *Mahua* prospect not very favourable. Cattle disease continuing. Fodder and water sufficient.
32	Manbhum ...	2·24	9½	10	Weather cloudy. Prospects of crops good. Wheat and *mahua* ripening. Cattle disease reported from thanas Purulia and Gourangdi. Fodder and water sufficient.
33	Singhbhum ...	2·10	9	9	Weather cloudy. Harvesting of *rabi* crops in progress. Common rice selling at 10 and 10½ seers per rupee at Kharsawan and Seraikella, respectively. Fodder and water sufficient.
34	Cooch Behar	0·63	7 4/17	7 4/17	Weather seasonable but cloudy. Sowing of *bitri* and cutting of tobacco continuing. Fodder and water sufficient.

General Summary.—Rain fell generally throughout the Province during the week. In Bankura, Hooghly, Jessore, Angul, Hazaribagh, Ranchi, Manbhum and Singhbhum it was fairly heavy. In the rest of the Province it was light. The recent rain, which was accompanied with hail in places, has done some damage to those *rabi* crops that were ready to be harvested. Such damage is reported from Hooghly, Patna, Shahabad, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Hazaribagh, Ranchi and Palamau. The number of persons on test-works is—Champaran 105, Muzaffarpur 17 and Darbhanga 1,330. In Darbhanga the number on gratuitous relief is 11,416, and on relief works 19,309. Cattle-disease is reported from ten districts. Fodder and water are reported sufficient, except in parts of Jessore. The price of common rice has risen in four and fallen in five districts and has remained stationary in the rest of the Province.

C. A. Oldham,
Director of Agriculture, Bengal.

Dept. of Agriculture, Bengal,

	Inches.
The total fall of rain from 10th to 16th March 1907	0·51
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·19
The total fall from 1st January to 16th March 1907	0·60
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·37

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 96, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; d, drizzling rain; ≏, dew; p, passing temporary showers; R, thunderstorm; t, thunder, <, lightning.

C. W. PEAKE,
for Director-General of Observatories.

RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR THE YEAR ENDING THE 30TH SEPTEMBER, 1906.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 25rd March 1907.

RESOLUTION—No. 1699.

READ—

The Survey and Settlement Reports for the year ending the 30th September 1906 with the remarks of the Board of Revenue thereon.

The Survey and Settlement Reports for the year ending the 30th September 1906 are well within the prescribed maximum limit and have been prepared generally in accordance with the orders of Government.

2. Owing to the transfer of the eastern districts of the Province to Eastern Bengal and Assam, the present Reports deal with a reduced area, but the total outturn of work was not by any means reduced in proportion to the reduction in the size of the Province. Exclusive of the Calcutta survey and certain minor operations, the Survey and Settlement Departments dealt with work carried on in fourteen districts and in all the six Divisions of the Province. In both Departments the year's programme was all but completed, the few minor deficiencies being unavoidable. The traverse survey extended

over 5,591 square miles as against 6,326 square miles in the previous year, while the cadastral and topographical surveys covered 3,676 square miles and 1,095 square miles, respectively, as against 4,667 and 572 square miles, the corresponding figures for the previous year. Including an area of 4,210 square miles completed during the year, the total area for which a record-of-rights has now been completed under the control of the Director of Land Records is 34,704 square miles in the Province as now constituted.

3. In certain cases the work done during the year has proved more expensive than in the previous year, but the Lieutenant-Governor is satisfied that every endeavour has been made to secure economy without impairing the efficiency of the work. The cost-rates of traverse survey are noted in the margin. In the district of Bhagalpur the rate is high because the features of the country were particularly difficult, and the number of traverse stations worked out to 31 per square mile, whereas in Purnea it is moderate, regard being had to the fact that the area to which it refers was only 37 square miles, while in Monghyr it is decidedly low. As to the high cost-rate in Ranchi, the Lieutenant-Governor observes that the country traversed was broken and more hilly than in the previous year, and that the transport of the party from Singhbhum added very considerably to the expenditure incurred during the year, while in Singhbhum also the country was difficult, and the area dealt with being only 573 square miles, the working party was necessarily somewhat expensive.

District.	Per square mile.	
	1904-05.	1905-06.
	Rs.	Rs.
Bhagalpur ...	31·7	44·7
Purnea	47·8	33·8
Monghyr	...	31·2
Ranchi	29·6	37·6
Singhbhum		36·9

The cost-rate of cadastral survey and initial record-writing in the district of Bhagalpur amounted to Rs. 134·7 as against Rs. 113·9 in the previous year, but the average size of the field was one-third of that of 1904-05, and the programme of record-writing was curtailed by 162 square miles, owing to pressure of work elsewhere. The rate in Purnea, viz., Rs. 119·2 per square mile, though higher than in 1904-05 by Rs. 10 on account of the smaller size of fields, is still moderate. The control of cadastral survey and record-writing in Chota Nagpur was taken over by the Settlement Department on the 15th October 1905, the cost-rate arrived at being Rs. 89·5 per square mile as against Rs. 82·1 and Rs. 93·2 in the two previous years when the Survey Department was in charge of cadastral survey and initial record-writing, the latter being supervised by members of the Settlement staff. The cost of supervision by Assistant Settlement Officers, which was not included in the cost-rates of the Survey Department, being deducted for purposes of comparison, the rate falls to Rs. 79 per square mile, and may be regarded as satisfactory.

4. The experiment of placing the Settlement staff in charge of cadastral survey and record-writing in large district operations has thus proved financially successful, and there are reasons to hope that as further experience is gained greater economy will be secured. The main object of the measure was, however, to do away with the dual control of the Survey and Settlement Departments, and although it is yet too early to come to a definite conclusion as to the results of the change in system, the Lieutenant-Governor is gratified to learn that there have been fewer complaints in regard to the conduct of Inspectors and Amins, and that the survey of a large and difficult area was brought to a conclusion punctually and successfully. The Department, as now reorganized, will have an officer of the Survey Department as professional adviser in case of technical difficulties, and a stronger staff of Assistant Settlement Officers held personally responsible for the quality and progress of the survey in their respective charges, and thus there is every reason to hope that a high standard of accuracy and efficiency will be attained.

5. With the approval of the High Court a few Munsifs are now deputed annually to settlement work in order that they may acquire a practical knowledge of the settlement procedure. The period of deputation was at first limited to six months, but has been extended to eighteen months. During the year under report six Munsifs were employed as Assistant Settlement Officers, four being posted to Bihar and two to the district of Ranchi, and the Lieutenant-Governor observes that their work has given great satisfaction.

6. The proportion of non-occupancy holdings in the district of Ranchi, as disclosed by the records attested during the years 1903-04 and 1904-05, was as high as 16 per cent. and 14·6 per cent., respectively, while during the year under report the percentage is nearly 13. The chief cause of this large number is, as the Director observes, the fact that the provision of law relating to the "settled raiyat" does not apply to Chota Nagpur. Other causes are forcible dispossession and the unsettled character of the aboriginal raiyats. There is some reason to believe that formerly zamindars did not make any distinction between the non-occupancy and occupancy raiyats, as regards fixity of tenure. There is, however, no provision in the local Act analogous to section 183 of the Bengal Tenancy Act safeguarding such customary rights. The local Civil Courts have consequently interpreted the provisions of the law, with regard to non-occupancy holdings, as if they superseded all existing customs, and abolished such rights as were not expressly mentioned in the law. The position of the non-occupancy raiyats is therefore very precarious. He is a mere tenant-at-will. He can only hope to acquire occupancy rights after 12 years' possession, and in the meantime may be ejected, at any moment, whether he pays his rent or not and however much he may have improved his holding. The Settlement Officer would extend the law of the settled raiyat to the whole of Chota Nagpur, and there would appear to be much force in his contention.

7. The settlement of fair rents on a large scale was confined, during the year, to the districts of Purnea and Bhagalpur. In the former district the enhancement is trifling, being only 1·09 per cent. This is the first district in Bihar where the Settlement Department has had to settle the rents of tenure-holders on a large scale under section 7 of the Bengal Tenancy Act. The Lieutenant-Governor is glad that the general results in their case are reported to be satisfactory, the enhancements being, as a rule, small, and the rents settled in all cases, moderate. In the district of Bhagalpur, the enhancement is large, being 16·79 per cent., but it is due to the fact that in one *patti* of the Panchgachia estate, the rents had been cut down at attestation as having been illegally enhanced, but were subsequently raised up to the prevailing rates of rent paid in the other *pattis*. It is however reported that there was no hardship, as the rents settled had been paid for about 15 years, and there has been a large extension of cultivation.

8. The recovery of costs of the survey and record-of-rights was postponed altogether in the district of Purnea till October 1907, owing to the failure of crops due to floods, but in the districts of Bhagalpur and Ranchi practically the whole demand of the year was collected. The Lieutenant-Governor agrees with the Board that the results of the collections in these two districts is creditable to the officers concerned.

9. In paragraph 9 of the Resolution on the Survey and Settlement Reports for the year ending the 30th September 1905, the Lieutenant-Governor had occasion to notice with satisfaction the extended use of settlement records in various branches of the administration. His Honour is much gratified to find that the present Report of the Director of Land Records bears testimony to the records having been still more freely referred to than in previous years. The presumption of correctness attaching to the records appears to have been generally understood by the Magistrates and the Police, and it is reported that in land disputes they were found very useful and that copies were in many cases produced by the parties of their own motion. It is reported also from the Begusarai subdivision of the Monghyr district that the number of land and rent disputes has greatly diminished in consequence of the survey and record-of-rights, and that serious riots are now rare. In this connection the Board have drawn the attention of Government to a suggestion of the Director of Land Records that the Police, who in some districts utilise the cadastral maps in preparing sketches of the scenes of crimes, might make a more extended use of them especially in criminal cases arising out of land disputes. As observed by the Board, any difficulty due to the village maps being on the scale of 16″=1 mile may be easily got over by the use of the pentagraph. A pentagraph, if there was sufficient use for it might be supplied to the District Police office, and if not, some arrangement might be made with the District Board for such enlargements as might

from time to time be required. The attention of the Inspector-General of Police will be drawn to this suggestion, and he will be asked to take such steps as may be found feasible. The Lieutenant-Governor's attention has also been directed to another suggestion that, so far as possible, the Civil Courts should be induced to quote survey numbers in all suits relating to disputes in land. His Honour will await a further report on this point from the Board of Revenue.

10. The continuous maintenance of the settlement records in Orissa has now been finally decided upon, and a scheme, framed upon the results of the experimental revision operations carried out in an area of about 46 square miles in the district of Balasore, has been approved by the Government of India. The records will, in the first instance, be brought up to date, and then a system of continuous maintenance, by means of local agency as far as possible, will be started. The revision of the records has been commenced in the district of Balasore under the immediate supervision of a civilian Settlement Officer, and the framing of a suitable Bill for the continuous maintenance has been taken in hand.

In the matter of maintenance of land records and inspection of rent-rolls in Government and Wards' estates in the Province, the Report of the Director of Land Records does not show any appreciable improvement, and the Lieutenant-Governor trusts that the Board will take steps to secure better results and a closer observance of the rules on the subject.

11. His Honour is pleased to observe that good progress has been made in the preparation of the special maps of each thana to show trijunction marks on a scale of 2"=1 mile. He notices that paragraphs 138 to 145 of the Report of the Director of Land Records bear ample testimony to a satisfactory improvement in the inspection and restoration of boundary marks, and trusts that the maps alluded to above will render the measures taken for their maintenance more effective, and will considerably cheapen future surveys.

12. Sir Andrew Fraser cannot conclude this review without expressing his appreciation of the valuable services rendered by Major Crichton and Messrs. Kerr and Lister during the year under report. He desires to take this opportunity of thanking Major Crichton, who is now taking long leave and may not return to his post, for the excellent work he has done in the Bengal Provincial Survey Department for the last sixteen years, and for the remarkable tact and courtesy he has displayed in all his relations with the Settlement Department. His Honour's thanks are also due to Messrs. Cumming, Byrne, Allanson, Murphy, Reid and Hubback and to the other officers named in the concluding chapters of the two Reports.

13. Extracts from the two Reports are published for general information.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy of it, with copies of the two Reports and the Board's note, be submitted to the Government of India.

By order of the Lieutenant-Governor of Bengal,

R. W. CARLYLE,

Chief Secy. to the Govt. of Bengal.

Extracts from the Report of the Superintendent of Provincial Surveys, on Survey operations during the year ending the 30th September 1906.

CHAPTER I.

General remarks.

3. The outturn of the year, namely, 5,591 square miles of traverse survey, 1,789 square miles of cadastral survey, 1,601 square miles of record-writing and 1,095 square miles of topographical survey is considerably less than that of last year. The full programme of the year has been worked up to in every respect, in most cases slightly exceeded, except the record-writing programme which was reduced during the field season at the request of the Settlement Officer of Bhagalpur.

Bhagalpur District.

Traverse Survey.

10. In this district only an area of 363 square miles of thana Katauria remained for traverse survey, and this has been completed during the year under report.

Cadastral Survey.

16. The areas accomplished are 1,270 square miles of cadastral survey and 1,108 square miles of record-writing. The deficit of 162 square miles of record-writing lies in one compact block in thana Katauria. The record-writing of this block was postponed to season 1906-07 at the request of the Settlement Department.

Purnea District.

Traverse Survey.

20. Except for 7 square miles of up-lands, the only portion of this district remaining for traverse was the Ganges *diara*.

21. The area of 70 square miles traversed during the season consists of 7 square miles of up-lands for cadastral survey, 30 square miles of *diara* for cadastral survey and 33 square miles of *diara* for topographical survey.

Cadastral Survey.

23. The area dealt with cadastrally during the season under report consisted of the portions of thana Kadwa and Saifganj, which had been traversed in advance during the foregoing season and the Ganges *diara* which was traversed during the same season. The total outturn was 485 square miles of cadastral survey and record-writing.

Topographical Survey.

27. During the season 23 square miles of the Ganges *diara* have been topographically surveyed on the 16-inch scale.

Monghyr District.

Traverse Survey.

31. Traverse operations were extended to South Monghyr during the year under report. The area accomplished was 1,217 square miles, exclusive of 275 square miles of hilly and jungly country, which are to be excluded from the cadastral operations, *vide* paragraph 36 of the report.

Traverse and Triangulation.

36 Within the periphery of the thanas for traverse survey during the season, lies a block of 275 square miles of absolutely hilly and jungly country containing practically no cultivation; such little as there is being of a shifting

character. This tract is unsuitable for a large scale cadastral survey, but as the District Officers complain of the insufficiency and inaccuracy of the existing one-each to the mile maps, it was decided to deal with this tract topographically on the two-inch=one mile scale.

37. During the year this tract has been triangulated and a certain amount of necessary traversing carried out, and the detail survey will be attended to next season.

DISTRICT SONTHAL PARGANAS.

Traverse Survey.

38. In order to complete the Ganges *diara* and join on to the former survey of the Damin-i-koh an area of 22 square miles was traversed of the Sonthal Parganas.

Topographical Survey.

41. The area of 22 square miles traversed during the season was also topographically surveyed on the 16-inch scale.

In addition to constant inspection in the field 37 linear miles of test survey were run.

DISTRICT RANCHI.

Traverse Survey.

43. During the year an area of 878 square miles has been traversed in thanas Chainpur, Bishunpur and Ghagra.

47. As usual in this district, the demarcation was found to be absolutely wanting and the surveyors, guided to a certain extent by the list of villages supplied by the Deputy Commissioner, had to traverse village boundaries as pointed out.

DISTRICT MIDNAPORE.

Traverse Survey.

49. Parganas Nayabasan and Rohini, amounting to an area of 187 square miles, were traversed during the season.

52. The demarcation was very bad and the inhabitants obstructive. Several reports had to be made to the Collector and Settlement Officer.

DISTRICT SONTHAL PARGANAS.

Traverse Survey.

53. In 1901-02-03 the area surveyed by Mr. Craven was traversed in skeleton with a view to correcting trijunctions only. Since then, a resettlement was decided on, and consequently a traverse survey in full detail was required. The area of 797 square miles traversed during the season is comprised in nine scattered blocks and is known as Mr. Craven's first area.

DISTRICT SINGHBHUM.

Traverse Survey.

57. During the year the traverse survey of Dalbhum was commenced, and an area of 573 square miles, being approximately half the area of the estate, has been traversed.

DISTRICT KHULNA.

Traverse Survey.

62. The operations in this district was confined to the Dehi Bhadra Estate, the plots of which were required during the same season for cadastral survey by the Settlement Department. The area surveyed is 106 square miles.

DISTRICT 24-PARGANAS—SUNDARBANS.

Traverse Survey.

66. The survey of the southern and uncleared portions of the Sundarbans was commenced during the year under report. The area traversed was 1,050 square miles and consisted of 456 square miles, which had been marked off into 20 lots by the Settlement Officer for future colonization purposes, and 594 square miles of forests, which have been traversed in 34 blocks.

69. The whole area traversed is an intricate net-work of rivers and tidal creeks, covered with forest and dense impenetrable jungle. The zig-zag system of traversing with the subtense bar, described in paragraph 62 of last year's report, was continued, and proved very satisfactory.

71. The establishment was ordered to assemble at Canning Town on the 26th October 1905. Out of 398 *khalasis* recruited from Hazaribagh, 366 absconded in a body on the 25th October. Arrangements had then to be made for recruiting more men, and eventually sufficient men were obtained from Gonda and Arrah, and field-work was in full swing by 1st January.

72. All through the season great difficulty was experienced in inducing the menial establishment to remain. Eighty country boats were hired to accommodate the traverse and topographical surveyors and their squads, and throughout the season a steam-launch and barge were employed in taking out fresh water and supplies from Canning Town, as absolutely nothing was obtainable in the tract under survey. A Hospital Assistant with medical stores accompanied the steamer.

73. The difficulties and discomforts experienced in surveying this sort of country were noted in paragraph 63 of last year's report.

74. The health of the establishment was bad, principally cases of malarial fever and dysentery. There were eleven deaths during the season of which six were due to cholera, four to dysentery and one man was carried off by a tiger.

Topographical Survey.

75. The whole of the 1,050 square miles traversed was also topographically surveyed. The 20 lots marked off by the Settlement Officer, covering 456 square miles (of this 194 is water area), were surveyed in the scale of 4 inches to the mile, and the balance of 594 square miles on the 2-inch scale. There are 43 sheets in the former area and 17 in the latter.

76. Owing to the rapidity with which the jungle grows in these parts and the consequent danger of losing the traverse stations, it was necessary to have the topographical work in progress practically with the traverse. In many cases the detail surveyor had to survey streams and creeks on the plane-table section by means of the sight vane or make field-books by the prismatic compass and chain. In all such cases the work was carefully fitted on in office and theodolite traverses were run for the purpose.

CALCUTTA SUBURBS SURVEY.

78. The field-work in connection with the 8,513 acres, known as the added area of Calcutta, was completed during last season.

83. The demarcation of municipal holdings has now been practically completed, but the demarcation of revenue holdings is still far from complete.

84. The difficulties experienced in ascertaining the names of present landlords have frequently been pointed out. An attempt to utilize old maps in locating holdings has not proved successful, as the maps, prepared by a Deputy Collector of several subdivisions outside the municipality, show boundaries which do not agree at all with the boundaries as pointed out by the present holders and as mapped in the present survey. In fact, the two surveys bear no resemblance to one another in this respect.

85. In another subdivision there are maps available of no less than four surveys, including the present survey. None of these agree in the delineation of holdings. This points to the advisability of permanently marking the boundaries of holdings.

86. Out of the 393 fair maps, 253 have now been drawn in skeleton, of which 90 have been completed in boundaries and can be published as soon as

the final examination by a European officer can be undertaken. The completion of the remaining maps depends on the progress made with the settlement of disputes and attestation.

87. A start has been made in the preparation of the maps required for revenue purposes.

88. It has been proposed to bring the survey of Calcutta proper up to date and to maintain an establishment to deal with all changes as they occur, thereby ensuring correct and up-to-date maps of the whole of Calcutta. A scheme is under preparation and will be submitted as soon as possible.

Patna Division Diara Survey.

89. In paragraph 111 of last year's report, it was stated that permanent marks would be embedded at selected points in the *diara* with a view to providing stations on which a yearly revision survey by a non professional agency might be based, and the work has been undertaken during the year under report. An area of 54 square miles was selected, and in this tract 288 marks were laid down. Of these 288 marks, 99, which were actually on islands and high sand banks, consisted of heavy 10-foot scantlings with cross feet, arranged, so as to give the mark when buried about 5 feet deep, sufficient purchase to withstand considerable water pressure.

90. Very few of the old stations along the edges of the *diara* tract could be found, which proves that the existing permanently marked *diara* lines cannot be drawn closer together with safety, but the examination of the marks actually inside the *diara* tract which will be undertaken during the coming field season will show whether or not anything can be done towards providing sufficient permanent marks in the middle of the *diara*. The work of the season was mapped on one sheet on the 2-inch to the mile scale.

PART IV—REPORT ON THE BENGAL DRAWING OFFICE.

97. Mr. G. W. Archer was in charge from 1st to 15th October 1905 when Mr. L. F. Berkeley took over charge on transfer from the United Provinces, and has retained charge throughout the year.

98. It was indicated in last year's report that the rapid increase of work, especially in the reproduction of village maps section, pointed to the necessity of increasing the accommodation. Owing to this increase, during the year, a new grainer's shed has been erected, the accommodation for photo work has been doubled by building another vandyke room and ten new hand-presses, with all the necessary additional plant have been purchased. Two portable iron sheds transferred from No. 6 Party from Dacca have also been erected at a small cost to supply the accommodation for extra establishment engaged in dealing with the correction, after comparison with the settlement traces, of two vandyked copies of the map of each village in the Orissa Division.

99. The work of the office has been divided, during the year, into seven main sections :—

(*a*) General or Controlling Section.
(*b*) Standard Mapping Section, including the preparation of district maps.
(*c*) Traverse Chart Section.
(*d*) Thana and Trijunction Marks Map section.
(*e*) Reproduction of village maps section.
(*f*) Badar section.
(*g*) Record section.

Standard Mapping Section.

100. It was stated in last year's report that the districts of Darbhanga, Monghyr and Bhagalpur, north of the Ganges river, are comprised in 18 standard sheets. This needs correction, as they are comprised in 24 standard sheets of four sections each. Taking into account the rejections mentioned in paragraph 121 of last year's report, this section has dealt with 18½ of such standard sheets. Seven of these have been completed in the old style of four sections each and sent for publication during the year, and two, containing the

published portions of North Monghyr, after having the Bhagalpur district added on to them, will also shortly be sent for publication in the old style. The remainder are being completed in the new style, and comprise 19 standard sheets of two sections each. Six of these are completed, and will be sent for publication as soon as the orders for foot-notes for these sheets are received. The remaining 13 were started during the year to enable the section, not only to commence the district map of Bhagalpur as soon as possible, but also to facilitate the preparation of thana and trijunction mark maps. For a similar reason ten sheets of district Purnea have also been commenced during the year.

101. The district map of Puri, which was practically completed last year, has been completed and published during the year. The district map of Champaran, after the incorporation of Colonel Tanner's work, and completion in all other respects, has been sent for publication during the year. The district map of Darbhanga is nearing completion, and, it is hoped, will be submitted for publication by the end of October.

102. This section has also prepared during the year the Index maps of districts Dacca, 24-Parganas and Khulna, and revised the Index maps of districts Sonthal Parganas and Monghyr.

103. It has also done the complete colouring, for the head-quarters office, of two copies of two standard sheets and two copies of the district maps of Puri and Cuttack, and the colouring of fiscal limits only, on 12 unpublished proofs of standard sheets and two unpublished proofs of the district maps of Puri and Champaran. In addition the final examination and correction of ten unpublished proofs of ten standard sheets and one unpublished proof of a district map have been carried out. Small corrections and additions have also been inserted on 12 published proofs of 12 standard sheets.

104. It has also prepared, out of office hours, traces for reproduction, from originals supplied by the Special Officer for revision of Boundary Commissioner's lists in Bengal, of 112 thana maps of 11 districts.

Trijunction Mark and Thana Mapping Section.

108. The section has been strengthened by the entertainment of one new draftsman and consists now of eight draftsmen.

109. During the year this section has dealt with the preparation and completion of the trijunction mark maps of 77 thanas of districts Cuttack, Puri, Balasore, Champaran, Saran, Muzaffarpur, Shahaband, Gaya and Patna. Sixty-eight of these have been reproduced and 922 copies supplied to Collectors in accordance with the number of copies required of each. Before reproduction it was found necessary to trace 62 of these, and six thanas were reproduced direct. Of the remaining trijunction mark maps of nine thanas, two have been traced for reproduction and six will be reproduced direct in October and one later. Districts Puri, Balasore, Champaran, Saran, Muzaffarpur and Shahabad are now complete in this respect.

The trijunction mark maps of three thanas of districts Bhagalpur and Monghyr have also been commenced and the trijunction mark maps of four thanas of Saraikela and Kharsawan, of district Singhbhum, prepared by the Settlement Officer are also in process of examination, correction and completion prior to reproduction.

During the year the section has also dealt with and completed fair thana maps of one thana of district Cuttack, four thanas of district Darbhanga, which complete the district, and three thanas of district Monghyr. All of these have been reproduced and 200 copies of each supplied.

110. Good progress had been made in the tracing from standard sheets of the portions of thanas Islampur, Kishanganj, Bahadurganj and Kasba Amur which come into the Surjapur pargana of district Purnea to enable No. 4 Party to complete the thana maps of these thanas in connection with the later survey of 1904-05.

111. The office has also prepared fair thana maps of the four thanas of Saraikela and Kharsawan, district Singhbhum, and of six thanas of district Bhagalpur from originals supplied by the Settlement Officer and Director of Land Records, respectively. Those of Bhagalpur have been reproduced and 200 copies of each supplied.

Reproduction of Village Maps Section.

113. The anticipations of a very large increase of work in this section, referred to in paragraph 135 of last year's report, have been justified. During the year under report 462,961 copies of maps have been produced and despatched.

114. In addition to its ordinary work of making traces for reproduction and of direct reproduction of maps, this section has undertaken the following items of work during the current season: (*a*) The touching up of 953 sheets of district Purnea of the survey of season 1903-04, prior to reproduction. (*b*) The comparison of settlement traces of districts Champaran, Darbhanga and Muzaffarpur against original maps. After the comparison of the traces of 840 villages of districts Champaran and Derbhanga this work was put a stop to by order of the Director of Land Records, as the original maps were found to be more up to date and complete than the settlement traces, and the settlement traces were all returned. (*c*) The correction of two vandyked copies of the original maps of villages of district Balasore according to settlement traces, 6,520 vandyked copies of 2,904 villages or 3,060 settlement traces have been received during the year, out of which 3,086 copies of 1,354 villages have been corrected, examined and despatched. The remainder are in hand, and will shortly be despatched. Of a few villages the vandyked copies were received incomplete. The Collector has been addressed with regard to these. This work, which was commenced only during September, has to be continued for the whole of the Orissa Division during the next year. (*d*) The correction of old original paper traces, before reproduction, according to the revised settlement trace maps of 144 villages on 157 sheets of the Banki Government Estate, district Cuttack, which were supplied for reproduction by the Collector, but which could not be reproduced direct owing to the colours on them. These were originally traced on 211 paper traces, of which 174 have been corrected and examined and 3 retraced, 22 have been reproduced and 660 copies of them supplied to the Collector. Discrepancies have been found at the time of correction in 71 villages which have been referred to the Collector and only 13 have as yet been received back. The traces of 22 villages on 24 sheets had to be returned for rectification as on comparison with originals they were found to be out of proportion. These also have not yet been received back. As soon as all these are received the reproductions will be pushed on with. The additions and corrections made at the time of revision survey on the settlement traces are so very numerous that it is not advisable to correct the original maps according to them, instead of this a copy of the reproduction of each corrected paper trace will be filed with its original. (*e*) The production either within or out of office hours on contract, of 200 copies of each of the thana jurisdiction maps for Special officer for revision of Boundary Commissioner's lists, of 396 thanas of 30 districts, also of 1,476 copies of 105 sheets of the Calcutta Suburbs Survey.

115. With reference to the ordinary programme and work of the section the remaining four paper traces of district Saran have been vandyked and the remaining 5,010 copies despatched to Collector.

116. Of district Muzaffarpur the remaining 11 sheets have been traced on 11 paper traces, all of which have been examined. The remaining 1,232 traces have been vandyked, after receipt back recently of the budars of 853 villages and after the re-examination, which was found necessary of the traces that remained to be vandyked last year. It was found necessary also to make a cursory re-examination and correct, where necessary, the copies that were printed, but remained for despatch last year. Hence 3,976 copies have only been despatched during the season. The despatch of the remaining 27,434 is now in progress.

117. In district Champaran the remaining five sheets have been traced on five paper traces and examined. The remaining 3,319 paper traces have been vandyked and 12,910 copies despatched. In this district also it was found necessary to do the re-examination and correction, where necessary, of such paper traces that were not vandyked last year, and of the reproduced copies that were not despatched, hence the delay in despatches. However, the despatch of the remaining 39,910 copies will be made early next year. The

discrepancies found in 310 villages were sent to Settlement Officer for reconciliation, and these have all been received back.

118. In Darbhanga 2,010 sheets have been traced on 538 paper traces, making a total to date of 9,071 sheets traced on 7,371 paper traces and leaving a balance of only 21 sheets to be traced. Six thousand one hundred and fifty-five paper traces have been examined, making a total to date of 7,311 examined. Six thousand six hundred and fifty-three of these have been vandyked and printed during the year, and 37,130 copies have been despatched. Despatches are being made weekly, as the Collector has asked for them to be supplied as quickly as possible. In this district also it was found necessary to make a cursory re-examination of the paper traces prepared last year. Discrepancies found in 683 villages have been sent during the year to Settlement Officer for reconciliation and those of 397 villages have been received back reconciled.

119. North Monghyr has been started within the year. There are 3,895 sheets for tracing, out of which 3,350 have been traced on 2,960 paper traces. Two thousand seven hundred and forty-three have been examined and 2,370 vandyked. Owing to the despatches of other districts being more urgent, it has not been possible so far to despatch any of the reproductions of this district. Discrepancies found in 32 villages have so far been sent for reconciliation and 21 have been received back.

120. Of the Purnea work of 1903-04; of 2,264 sheets, 293 thick sheets have been traced on 297 paper traces all of which have been examined. One thousand nine hundred and eighty-nine paper traces and sheets have been vandyked and 223,240 copies sent to the Settlement Officer in accordance with the statements supplied by him of the number of copies of each sheet needed. Discrepancies found in 10 villages have been sent for reconciliation and three have been received back.

121. Of the work of North Bhagalpur, 1,660 sheets have so far been traced on 1,625 paper traces and 634 examined. None have been vandyked as yet. The discrepancies found in three villages have only so far been sent for reconciliation and one has been received back.

122. Of Ranchi there were 644 sheets for tracing. These have been traced on 589 paper traces and all have been examined; 578 were vandyked and 6,412 copies supplied during the year. As there were discrepancies found in 58 villages, all of which, with the exception of two, have been received back, the remaining paper traces, with the exception of these two villages, will be vandyked early in October and copies supplied. In the Sonthal Parganas there will be about 15,200 paper traces in all for reproduction; of these 4,779 have so far been received and reproduced and 92,570 copies supplied to the Settlement Officer.

123. Every endeavour is being made to finish all the tracing that remains of Bihar and its examination as soon as possible, so as to get rid of the staff of tracers and examiners and thus reduce the overcrowding in the office.

124. In connection with the Programme of Reproduction to be done for attestation purposes, 774 sheets of Purnea and 643 sheets of Midnapore of the survey of 1904-05 have been reproduced and 3,130 copies supplied. There were 943 sheets of Purnea, 2,269 of Bhagalpur and 1,880 of Ranchi of the survey of 1905-06 for reproduction altogether, all of these have been reproduced and 13,021 copies altogether supplied.

125. This section has also reproduced one copy each of 155 sheets of 78 villages for the Executive Engineer, Champaran Division (Irrigation Branch). These have been mounted on cloth according to requirements and supplied.

Extracts from the Report of the Director of Land Records on settlement operations during the year ending the 30th September 1906.

GENERAL SUMMARY AND GENERAL REMARKS.

Extent of the year's operations.

2. Survey and settlement operations were in progress during the year in 12 districts belonging to the six Divisions which were included in the Province of Bengal after its recent partition. The total area included in these operations was 23,980 square miles contained in 19,727 villages. The area cadastrally surveyed during the year was 3,646 square miles, while preliminary records were written in 3,877 square miles. Records were attested in 4,549 square miles and finally published in 4,210 square miles. The rents of 38,698 tenants were settled. The expenditure of the year amounted to Rs. 8,54,567.

Total area settled in the Province up to 30th September 1906.

3. The total area for which a record of rights has now been completed under the control of this Department (in this province as now constituted) is 34,704 square miles. Of this, 4,210 square miles were completed during the year under report. Progress during the last twenty years has averaged 1,735 square miles a year.

* * * * * * *

GENERAL SETTLEMENT MATTERS DEALT WITH DURING THE YEAR.

Revision of the Boundary Commissioner's lists of villages.

6. The work continued during the whole year and has now been completed with the exception of the printing of the village lists. As was anticipated last year, it was found possible to discontinue the employment of the Special Officer from the end of February last, and the work remaining to be done was carried on by Mr. R. N. L. Chandra, in addition to his duties as my Personal Assistant. Under the Board's orders 200 copies of each map and of each village list are being printed. The reproduction of the maps by the Vandyke process has been practically completed by the Bengal Drawing Office, but the printing of the lists is progressing slowly, and will not be completed for some months. Private presses are being utilized by the Superintendent of Government Printing, Bengal, but their outturn is very small.

The table below shows the main heads of work done, and in addition there was some revisional work. Owing to changes in the thana boundaries sanctioned by Government after completion of our work in them, the maps and lists already printed, of 9 thanas in Murshidabad, 1 in Burdwan and 2 in Jessore had to be revised, and new maps and new lists printed. The year's work required the boundaries of about 16,000 villages to be marked in the map, 1,200 omitted Revenue Survey villages to be inserted therein and 200 Revenue Survey villages not shown in the Boundary Commissioner's lists to be incorporated in the new village lists. Complete maps and lists of 8 districts, viz., Muzaffarpur, Champaran, Saran, Howrah, Hughli, Nadia, Tippera, and Noakhali were issued during the year.

* Printed thanas mujmilis have been used.
† Thana mujmilis on tracing cloth supplied by Settlement Officer, Bihar, have been used.

Thana index maps and lists of villages.

7. Up to the end of the preceding year thana index maps were prepared for the cadastrally-surveyed districts of Saran, Champaran, Muzaffarpur, Cuttack, Balasore, Puri, and five thanas in the district of Darbhanga. Similar maps were prepared during the year for the remaining thanas in the district of Darbhanga, three thanas in North Monghyr, and six thanas in North Bhagalpur. Maps of all the thanas in the districts of Saran, Champaran, and Muzaffarpur, together with jurisdiction lists of villages, have been distributed to the Heads of Departments and local officers. Thana lists of villages for all the thanas in Darbhanga have been finally printed and will shortly be distributed.

Village maps.

8. During the year the work of reproduction of village maps in Saran has been completed, and that of the maps of the districts of Muzaffarpur, Champaran and Darbhanga is nearing completion. Reproduced copies have been supplied to the District Officers. Village maps for portions of Purnea and Ranchi were also reproduced for purposes of distribution during recovery of the costs of the survey and settlement operations. In the Sonthal Parganas the reproduction of the village maps of the Damin-i-Koh has been completed, and fair progress has been made in respect of those of the zamindari estates. The village maps of Banki Government estate in the district of Cuttack are being reproduced after embodying the corrections necessitated by the Revisional Settlement proceedings.

Scale and number of copies of the trijunction mark maps.

9. In the Board's order No. 7526A., dated the 6th December 1905, it was directed that special thanawar maps on the scale of 2″=1 mile showing the trijunction marks should be prepared separate from the thana mujmili maps on the scale of 1″=1 mile prepared for general administrative purposes. It has also been decided that about 30 copies of each boundary-mark map should be reproduced at present, the exact number of copies of the maps in the case of each district being determined by reference to the local officers.

Agencies for Settlement work.

10. It is hoped that with the increase in the cadre of the Provincial and Subordinate Executive Services, it will be possible to avoid employing non-gazetted officers as Assistant Settlement Officers in future. In accordance with the recommendations

contained in a joint note submitted by the Settlement Officer, Bihar, and the Director of Land Records, it has been decided in future to limit the attestation season to five months in Bihar, by opening a larger number of camps for a shorter period. It is hoped that in this way it will always be possible to complete Section 103A. work before the rains break.

* * * * * * *

Transfer of control of cadastral survey and record-writing from Survey to Settlement Department.

12. Perhaps the most important event of the year was the transfer of the control of cadastral survey to the Settlement Department in accordance with the orders of the Government of India contained in their letter, No. 1438 – 98-2, dated the 22nd September 1905. The new system was applied in all settlements, except Bihar. The most important settlement affected was Ranchi, where the Settlement Department carried out the cadastral survey of an area of 1,618 square miles. The area was divided into two camps, each in charge of a Covenanted Assistant Settlement Officer, with six circles in each camp. Each circle was in charge of an Assistant Settlement Officer who was directly responsible for its working. The work was inspected by the Superintendent of Provincial Surveys, Bengal. The standard of check and accuracy reached was fully equal to that of previous years, while on account of the closer supervision and control which it was possible to exercise, a marked improvement in the conduct of the amins and inspectors was noticed, serious punishment being rarely necessary. The amins as a body appreciated the advantages of the system of direct control by Assistant Settlement Officers. An important change was effected in Ranchi in regard to the distribution of *parchas* to the landlords and tenants. Instead of the distribution being left with amins as in previous years, the Assistant Settlement Officers themselves distributed the *parchas* to the parties. Over one lakh and-a-half of *parchas* were thus distributed by the Assistant Settlement Officers in Ranchi. The system was a success there, because the raiyats, being mostly illiterate, do not require their *parchas* during khanapuri. The question of introducing it in other settlements is under consideration. The cadastral and khanapuri recess-work was also successfully carried out by the Settlement Department, and the work of all the various sections was completed in good time. Rules for the working of the Area, Drawing and Khasra Sections have been drawn up and will be available in future for other settlements. It is hoped that from October 1907 the transfer of cadastral survey to the Settlement Department will be effected in Bihar also.

Admissibility in evidence of copies of village maps reproduced by mechanical process.

13. After consultation with the Advocate-General the Board have directed, in their No. 1372A., dated the 7th March 1906, that all photo-zincographed reproductions of the village maps should be marked with the words "made and published with the authority of Government." Such reproduction will then be admissible in evidence under sections 36 and 83 of the Evidence Act.

* * * * * * *

Training of Munsifs in Survey and Settlement work.

15. During the year 6 Munsifs were deputed for a period of 6 months to settlement work, 4 being posted to Bihar and 2 to the Ranchi settlement. A full report regarding the working of the experiment was submitted to the Board with this office letter No. 112T.S., dated the 30th May 1906. As the period has been found to be insufficient to train the officers fully in all the branches of settlement work, it has now been arranged, with the concurrence of the High Court, that the period of training should be extended to 18 months. Accordingly the 6 Munsifs who have already undergone a 6 months' training have again been posted, in the present year, to the Bihar and Ranchi settlements for a further period of 12 months, and 6 new Munsifs have been deputed to the above settlements for training for a period of 18 months. So far the experiment of employing Munsifs as Assistant Settlement Officers promises to be a success.

* * * * * * *

Guide and glossary to the Survey and Settlement operations in Bihar.

19. A Guide and Glossary to the Survey and Settlement operations in Bihar has been compiled and is now being printed. It gives a general and narrative account of the various stages of the Survey and Settlement operations that are now in progress in the province, and furnishes an authoritative explanation of the vernacular terms used in the records and proceedings. It is hoped that a reference to the book will prevent parties and tribunals from misinterpretating the true significance of the vernacular terms used in the record-of-rights and will give to all interested in land a fairly accurate idea of the procedure followed and of their rights and responsibilities in the various stages of the work.

* * * * * * *

GOVERNMENT ESTATES AND ZAMINDARI ESTATES IN MIDNAPORE.

	Area in sq. mile.	Number of villages.
Government and temporarily-settled estates ...	594·90	1,599
Zamindari estates	257·62	830
Total ...	852·52	2,429

* * * * * * *

Programme.

24. The programme consisted of (1) attestation of the records of 267 square miles, (2) publication in draft of these, (3) disposal of objections under section 103A., of the Tenancy Act, (4) settlement of fair rents under section 104 in an area of 404 square miles, (5) disposal of case work under section 106 in an area of 159 square miles, besides office and recess work on the records and maps. To this were added the cadastral survey and initial record-writing of the Nayabasan estate and of certain other estates aggregating an area of 193 square miles.

* * * * * * *

ANGUL ESTATE IN ANGUL.

Area—630 square miles.

Number of villages	630
Number of holdings	40,000
Number of plots	4,10,000

Programme.

40. The original programme for the year included the completion of khanapuri and attestation for the entire estate. But owing mainly to ill health among the staff during the rains, it was only possible to complete the attestation of about one-third of the area.

* * * * * * *

SAMBALPUR DISTRICT.

Area—2,986 square miles.

Number of villages	1,945

44. THE two tahsils of Sambalpur and Bargarh were transferred to Bengal from the Central Provinces during the year. The resettlement operations had been practically concluded before the district was transferred to Bengal, and the main work of the year was the "announcement" or final publication of the rents calculated on the basis of assessment proposals which, with a few exceptions, had been sanctioned by the Central Provinces Administration. Announcement of rents was completed during the year and the only work pending was the announcement of the *takolu* or reduced revenue payable by certain zamindaris of the Sambalpur tahsil, sanction to which had not been received up to the close of the year.

* * * * * * *

PERMANENTLY SETTLED ESTATES.

PRESIDENCY DIVISION.

FATEHSINGH ESTATE IN MURSHIDABAD.

Area—80·53 square miles.

Number of villages	151
Number of tenants	46,260
Number of plots	133,141

Notifications and number of villages dealt with.

46. On the application of the Nawab Bahadur of Murshidabad four villages, believed to appertain to tauzi No. 253, were brought under survey and settlement operations by Notifications Nos. 335L.R. and 336L R., dated 17th January 1906. One of these villages was, however, subsequently found to belong jointly to estates Nos. 253 and 254. Estate No. 254 is held by Babu Dobendra Narayan Roy of Jemua and his brothers, and the villages held jointly by this estate and estate No. 253, which is held entirely by the Nawab Bahadur, were brought under survey and settlement in connection with the proceedings in the latter estate. Certain lands of village Roserah, appertaining to estates Nos. 1038 and 1337, were added by Notifications Nos. 203T.—R. and 204T.—R., dated 24th April 1906, as they were intermingled with those of estates Nos. 253 and 254.

* * * * * * *

Cost.

52. The cost of the settlement has already exceeded a rupee an acre, but the difficulties are unusual, and it should be remembered that the settlement was undertaken because the proprietor, a recent purchaser, was quite unable to manage the estate. Little assistance is to be obtained from him, and the leading tenants are by no means anxious to help forward a settlement which will put an end to a state of things under which they have profited considerably.

* * * * * * *

BELDANGA ESTATE IN MURSHIDABAD.

Area—11·62 square miles.

Number of villages	1
Number of tenants	5,888
Number of plots	22,382

Short history.

53. The estate belongs to Maharaja Manindra Chandra Nandi of Kasimbazar. Difficulties between the landlord and the tenants had been of long standing in this estate. For a period of over 12 years unsuccessful endeavours were made with the assistance of three Collectors to bring about a better understanding and to effect an amicable settlement. The tenants ultimately applied for an authoritative record-of-rights. The operations were notified under section 101 (2) (*a*) of the Bengal Tenancy Act in Notification No. 4067, dated 12th November 1904. In September 1905 the supervision of the work was transferred to this Department.

* * * * * * *

Programme and work done.

56. The programme for the year was to do a plane-table traverse and cadastral survey and khanapuri, to decide boundary disputes, and during the recess to extract areas and to prepare the records for attestation.

The programme was carried out practically in full, only a small amount of recess-work remaining to be completed in October. Field-mapping was done in 25 sheets with separate serial numbers in each, the arrangement of the blocks being preserved. The main difficulty encountered at the khanapuri stage was in regard to the classification of soil.

The landlord had divided the lands of the villages into 27 classes, most of which had separate sub-classes, the object being undoubtedly to enhance rents. The classification was arbitrary, artificial and unintelligible, and it was found necessary to abandon it entirely. Eventually, with the consent of all parties, a simple classification was arrived at and the work proceeded smoothly. Attestation will be carried out during the current season.

* * * * * * *

North Bhagalpur.

Area—1,977 37 square miles.

Number	of villages	1,145
,,	of tenants	270,844
,,	of plots	2,089,893

Programme.

66. The programme for the year was (1) the disposal of the remaining case work under section 105 and section 106 of the area attested in 1903-04; (2) Recovery and case-work in the 27 villages of the Pachgachhia estate in which re-attestation was carried out last year, and in the 175 villages attested in 1904-05; (3) Attestation, draft publication and office work of the 30 villages in the North Kosi diara surveyed in the previous season and said to contain Government estates.

* * * * * *

Recovery.

69. Of the total cost of Rs. 91,926 recoverable in respect of the area dealt with, Rs. 91,420 was realized without certificates, and Rs. 389, on the issue of certificate notices. The balance, Rs. 117, is regarded as practically unrealizable, and proposals for its remission are being submitted.

Case-work.

70. In the Pachgachhia estate the result of the re-attestation done in the previous year was that the rents in one of the three *pattis* of the estate were cut down as having been illegally enhanced, and in the other two *pattis* (in which the rates were the same as in the third *patti*) the old rents were attested. The tenants of the two *pattis* in which the rents were not reduced, instituted suits under section 106 to have it declared that in these *pattis* also the rents were illegally enhanced, and that the rents legally payable were those calculated at the old rates. In the *patti* in which rents had been reduced the proprietor instituted suits under section 30, praying for enhancement on the ground that the raiyats held at rates lower than the prevailing rate of the village. The tenants did not succeed in their suits under section 106. It was proved that the enhancement had taken place previously to the passing of the Bengal Tenancy Act and was therefore not illegal, and the attested rents were declared to be the rents payable. In the suit under section 105, instituted by the proprietors in the "*kharidgi*" *patti*, the tenants also lost. The prevailing rates in each village are undoubtedly those prevailing in the two *pattis*, the rents of which have not been reduced, and as they are not inequitable and have in fact been paid by the tenants for the last fifteen years, the landlords' applications were allowed. A number of the tenants have compromised, but many are likely to appeal.

* * * * * * *

South Bhagalpur.

Area—1,745 square miles.

Extension of operations and notifications.

72. The survey and settlement operations which had been in progress in North Bhagalpur were extended to the southern portion of the district under the orders of the Government of India, conveyed in letter No. 1300—308-2, dated the 14th September 1904. The six thanas of

Sultanganj, Bhagalpur, Colgong, Amarpur, Katauria and Banka were accordingly notified under section 3 of the Bengal Survey Act, V (B C.) of 1875, and under section 101 (1) of the Bengal Tenancy Act, in Notification No. 2643T.—R., dated the 10th October 1904, and Notification No. 3080T.R., dated the 13th September 1905, respectivly.

Programme.

73. The programme for the year was the supervision of record-writing in the area south of the southern high bank of the Ganges, included in thanas Colgong, Bhagalpur, Sultanganj, Amarpur, Banka and about 158 miles in thana Katauria, making in all an area of 1,246 square miles containing 2,291 villages.

* * * * * * *

Work done.

75. The whole of the programme was carried out, with the exception of the portion relating to thana Katauria, consisting of 158 square miles. The cadastral survey of this portion was completed, but owing to the pressure of work elsewhere, it was found impossible to depute any officer to supervise the khanapuri, which was therefore postponed until next season. Thanas Colgong and Bhagalpur were surveyed by the cadastral camp of which Mr. N. Bedford of the Survey Department was in charge; the remaining thanas were dealt with by Mr. C. S. Kraal of that Department. In addition to thanas Colgong and Bhagalpur, Mr. Bedford was also in charge of the Purnea area. The work in Bhagalpur presented no complications, and disputes were few. The total number of plots in the area of which khanapuri was completed was 880,000 and the number of khatians, 153,000. The average plot is therefore ·79 of an acre and the average holding 4·77 acres, 19,793 plots or an average of 8 per village were tested by the Settlement Department. The average size of a village, however, is exceptionally small, being only ·47 of a square mile as against ·9 of a square mile in the area surveyed in the Purnea district. As in Purnea, the khewats were prepared by the Settlement Department. The small size of the villages, coupled with the fact that a large number of resumed *jagirs*, each owned by 40 or 50 proprietors, were found in many of them, and that it was exceedingly difficult to procure the attendance of the numerous absentee small proprietors, mainly pleaders and other residents in the town of Bhagalpur, hampered the work in thanas Colgong and Bhagalpur. The difficulty was increased by the fact that the Collector had not adopted as his unit of registration the extremely small villages formed in the revenue survey, and neither those villages nor the estates lying in them were found in Register C.

Disputes (internal and boundary) were not numerous and, with the exception of disputes as to the right to the timber of trees, were easily disposed of. The difficulty in deciding the latter arose from the fact that although the right of the landlord to a share of the timber of trees standing in raiyati fields is generally claimed throughout the district, it was found that, with one or two exceptions, most of the proprietors were unable to prove that they had ever exercised their rights.

Purnea District (excluding Parganas Surjapur and Harwat).

Area—3,705 square miles.

Number of villages	...	...	...	4,213
Number of tenants	...	...	...	4,30,689
Number of plots	...	...	...	2,308,432

Area of operations.

76. By the close of 1904-05 cadastral survey and record-writing had been completed for 3,220 square miles, in which area the records of 3,503 villages had been prepared for attestation, and of these the records of 1,190 villages had been attested and draft published.

* * * * * * *

78. The programme for the year consisted of the supervision of preliminary record-writing for an area of 485 square miles in thanas Saifganj and Kadwa, the attestation, draft publication, disposal of objections, office check, fair-copying and final publication for an area of 1,723 square miles, of which the preliminary record had been prepared in 1904-05 and the disposal of case-work under sections 105 and 106 for an area of 1,483 square miles, of which the preliminary record had been prepared in 1903-04.

Programme.

* * * * * * *

80. Khewat writing was undertaken by the settlement staff for the first time, and the results on the whole were satisfactory though the system naturally did not work perfectly smoothly, cases of delay in starting khanapuri, owing to the incomplete state of the khewats, occuring from time to time. It is notorious, however, on the other hand, that khanapuri was frequently begun in previous years before the khewats were by any means complete.

Khewat-writing.

* * * * * * *

82. In accordance with the procedure for dealing with illegally enhanced rents, which was adopted in the previous year and confirmed by order of the Board in their letter No. 3762A., dated 13th June 1905, the Attestation officers were not required, in the absence of disputes as regards the existing rents and of grounds for suspecting illegal enhancements, to make, of their own motion, detailed enquiries about the legality of the rents contained in the landlords' rent-rolls. This procedure has been found to work fairly well in practice, but for the reasons already explained, illegal enhancement of rent is not a burning question in Purnea.

Treatment of illegally enhanced rents at attestation.

* * * * * * *

85. Rent settlement work in this district is chiefly remarkable owing to the fact that this is the first time that the Bihar Settlement Department have been called upon to settle the rents of tenure-holders on a large scale under section 7 of the Bengal Tenancy Act. The general results are satisfactory; the enhancements are small as a rule, and the rents settled are in all cases moderate. Many of them were arrived at by compromise.

Tenure-holder's rents.

* * * * * * *

87. Difficulty has arisen in dealing with applications for the settlement of fair-rents under section 105 in respect of lands recorded as *de facto* held rent-free, but liable to payment of rent, as the defendant-tenants have in many cases not only set up in their defence that the lands were rent-free, but have also instituted suits in the Civil Courts for a declaration of their title to hold the land free of rent. It has been held that a decision in the course of proceedings under section 105 that land is liable to the payment of rent does not operate as *res judicata*, and does not debar the parties from subsequently raising the same question in the Civil Court. There is thus grave risk of conflicting decisions being given by the Revenue and the Civil Courts regarding the same subject. The matter has been represented to the Board and Government, and is now under consideration.

Conflict of jurisdiction between Revenue and Civil Court.

88. Arrangements were made to begin computation during recess with a view to recovery in this field season, but owing to the failure of crops due to floods, recovery operations have been postponed till October 1907 on the recommendation of the Collector and Commissioner. It is expected, however, that some large land-holders will be ready to pay up in advance in order to get their copies of the record. A cost rate of six annas per acre has been proposed.

Computation and Recovery of costs.

* * * * * * *

THE ZAMINDARI ESTATES IN THE SONTHAL PARGANAS.

	Area in square miles.	Number of villages.	Number of tenants.	Number of plots.
Work included in Mr. McPherson's second programme (first half)	1,591	2,192	43,144	544,149
Work included in Mr. McPherson's second programme (second half)		1,939	88,413	760,042
Work included in the third programme (first half)	724·11	1,432	46,000	482,000
Total ...	2,315·15	5,563	177,557	1,786,191

Programme.

90. The programme for the year included the following items:—

A. *First half of Second Programme*—

(1) Disposal of remaining objections to the published record;
(2) Final check and arrangement of the records;
(3) Delivery of records to the Deputy Commissioner.

B. *Second half of that Programme.*—Disposal of objections to the published record.

C. Tracing of maps of the first and second programmes for reproduction.

* * * * * * *

Work done—second half of the programme.

94. The disposal of objections to the published record in this area formed the main part of the work done during the year. This work could not be completed owing to the fact that the objections continued to pour in up to the end of the year when the year of grace expired. The right of transfer having been recognized, a very large number of cases for the mutation of names as the result of transfers were filed. There is no doubt also that the small fee realisable for objection suits, viz., one rupee, led to the filing of a number of speculative and frivolous cases. Two hundred and eighty-six civil suits were also disposed of.

* * * * * * *

Reproduction of village maps.

96. The reproduction of the cadastral maps of the zamindari estates was ordered in Government order No. 1479, dated 15th March 1905, which dealt also with the maps of the Damin-i-koh Government Estate as already stated. Simultaneously with the submission of the proposals on the subject, instructions had been issued to attestation officers to explain to the raiyats how a copy of the map read with their copies of the khatians would show exactly what were the plots held by each tenant. Arrangements were as usual made for reproduction of the maps by the Vandyke process at the Bengal Drawing Office. As in the case of the maps of the Damin-i-koh the original sheets not having been prepared on "sensitive" paper, it was found necessary to prepare traces for the purpose locally. The work which begun in October 1905 continued throughout the rest of the year. Out of a total of 6,181 sheets comprising the areas included in Mr. McPherson's first and second programmes, traces were prepared of 4,411 sheets at a cost of Rs 4,025. The Bengal Drawing Office supplied reproduced copies of 1,719 sheets to the Settlement Officer during the year.

* * * * * * *

RANCHI DISTRICT.

Area—7,126 square miles.

Programme.

108. The programme consisted of—

(1) the cadastral survey and preliminary record-writing of 1,618 square miles;
(2) cadastral recess work of the above including finishing of the maps, extraction of areas and completion of the preliminary records in office;

(3) the attestation of 1,048 square miles and case work under section 103A;

(4) office work in connection with the records of 1,048 square miles and final publication of the records of 805 square miles;

(5) suits under section 160 of the Local Act;

(6) *Bhuinhari* identification in office of 1,618 square miles.

The whole programme was completed with the exception of the trial of suits under section 160, and *bhuinhari* identification. The number of section 160 suits filed was unexpectedly large, and no officers were available to try them. These suits are of considerable importance, as the decisions in many cases involve questions of title and are final, subject to an appeal to the Commissioner. *Bhuinhari* identification was commenced in August as soon as the first Vandyke copies of the season's maps were received and has since been completed.

* * * * * * *

Cadastral survey: field work.

110. The control of cadastral survey in Ranchi was taken over by the Settlement Officer on the 15th October 1905.

The whole area of 1,618 square miles was divided into two camps, with six circles, in each. Each camp was in charge of a Covenanted Assistant Settlement Officer. The circles were in charge of Assistant Settlement Officers, all of whom, except three, were gazetted officers.

Assistant Settlement Officers in charge of circles were assisted by a Head Inspector, and had from five to seven Inspectors under them. The Inspectors supervised the work of the *halkas* or subdivisions of the circles. Each Inspector had about ten amins under him. The Assistant Settlement Officers were made responsible for the progress and the quality of the survey in their respective areas. In addition there was one central camp in charge of the Professional Adviser to the Settlement Officer. This officer advised on matters of survey, which were freely referred whenever difficulties arose.

During the first three months Assistant Settlement Officers were engaged chiefly on the supervision of survey. Their duties were (1) to distribute the staff of amins; (2) to distribute the sheets to be surveyed; (3) to supervise the Inspectors; (4) to run at least one *partal* line in every survey sheet or to repartal an Inspector's line in every sheet; (5) to pass the maps after final *partal*; (6) to decide boundary dispute cases; (7) to distribute personally the pay and earnings of amins and Inspectors. In case a map was found to be defective after final *partal*, the map and *partal* records were sent to the Professional Advisor who had powers to pass the map, or reject it and order a second survey.

It will be noted that whenever possible the Assistant Settlement Officer was made responsible. The amin had direct access to him in all matters. The effect of the distribution of sheets by Assistant Settlement Officers to amins direct was particularly remarkable early during the field season. When the amin found that, as soon as he had finished the survey of one sheet, he obtained another immediately, he gained an incentive to work, which had hitherto been lacking whenever the Inspector was entrusted with this duty. To this fact is to be attributed largely the comparative ease with which the survey of a large and difficult area was rapidly brought to a conclusion.

Partals.

111. The survey was tested by 4,635 linear miles of *partal*, which gives an incidence of 2·8 linear miles per square mile. Of the total *partal* 255 linear miles were done by Assistant Settlement Officers.

Average outturn of amins.

112. The average daily outturn of amins was 22 acres of survey, or 40 khanapuri numbers. The daily outturn is somewhat small, though considerably better than in previous years. It is due to the fact that most of the amins were new and inexperienced.

Survey work was also retarded by the defective traversing in the jungly and difficult areas situated in Kochdega, Kurdeg, Palkot and Raidih.

Preliminary record writing.

113. Disputes were fairly numerous as in previous years. They related chiefly to possession, claims to *korkar*, and rights in trees. It was noticeable particularly in thanas Gumla and Basia, that the raiyats had combined and claimed to be in possession of lands of which they had been dispossessed many years previously by force or fraud. There was in consequence considerable difficulty in arriving at correct conclusions in several cases. In the more remote parts of the area, raiyats though they put in claims, frequently admitted that they had been dispossessed for periods varying in many cases from 10 to 20 years.

Assistant Settlement Officers tested the khanapuri of 4,699 fields and Head Inspectors and Inspectors tested 86,404 fields. The total number of entries tested was 91,103, which gives an incidence of 13·6 per cent. of the total number of plots. The percentage of check was sufficient.

The arrangement, distribution and management of the staff were the same as during the cadastral survey. Several of the Assistant Settlement Officers were quite new to the work, and their inspections were not very good at the commencement of the season, but improved as the work proceeded.

Internal disputes.

114. All the 17,852 internal disputes were decided during the field season.

Boundary disputes.

115. The number of boundary disputes instituted during the year amounted to 456. They were all decided with the exception of eight, which relate to disputes between the Jashpur State and adjoining villages of Ranchi. These disputes could not be taken up, as the necessary preliminary arrangements were not concluded with the Raja of Jashpur before the end of the field season.

Many of the disputes instituted were of a frivolous nature. One or other of the parties generally admitted dispossession for considerable periods, but when it was discovered that the Settlement Courts made possession the criterion, parties changed their statements when the cases came up for confirmation or in appeal. A number of the disputes had been the subject of title suits in former years; but, in some of these cases the Civil Court decisions were not vere helpful, as the boundaries given in the plaints were generally of an undefined nature, though, no doubt, they were perfectly understood at the time by the parties. In a jungly and hilly area both parties had no difficulty in pointing out two totally different sets of boundaries which each averred to be the one described in the decree. Even after a local enquiry, it was impossible sometimes to determine conclusively which was the boundary decreed. It is to be hoped that the Courts will in future consult the cadastral maps and insist that the parties define their claims, in terms of fields, whenever land is the subject of dispute.

* * * * * * *

Attestation.

117. Five officers were employed on attestation. The programme was completed towards the end of April with the exception of one camp, in which the work went on for two months longer. In almost every village, except those held direct by the Maharaja of Chota Nagpur, the rate of *rakumats* and the amount of *begari* renderable were subjects of dispute. In many cases it was found that rents had been privately enhanced contrary to the provisions of the local Tenancy Act. As to status, the most noteworthy feature in the return is again, as in previous years, the large number of non occupancy raiyats, which amounts to almost one-fourth of the number of occupancy raiyats, and to nearly 13 per cent. of the whole number of tenants. The chief cause of this large number is, undoubtedly, the fact that the law of the "settled raiyat" does not apply to Chota Nagpur. Other causes are forcible dispossession, and the unsettled character of the aboriginal raiyats. There is some reason to believe that formerly zamindars did not make any distinction between the non-occupancy and occupancy raiyats, as regards fixity of tenure. There is, however, no provision in the local Act analogous to section 183 of the Bengal Tenancy Act, safeguarding such customary rights. The local Civil Courts have consequently interpreted the provisions of the law with regard to non-occupancy holdings, as if they superseded all existing customs, and abolished such rights as were

not expressly mentioned in the law. The position of the non-occupancy raiyats is, therefore, very precarious. He is a mere tenant-at-will. He can only hope to acquire occupancy rights after twelve years' possession, and in the meantime may be ejected, at any moment, whether he pays his rent or not and however much he may have improved his holding. The Settlement Officer would extend the law of the settled raiyat to the whole of Chota Nagpur, and there would appear to be much force in his contention.

The average rate of rent per acre prevailing in the area attested is as follows:—

	Occupancy.	Non-occupancy.
	Rs. A. P.	Rs. A. P.
Thana Karra (portion) ...	1 9 3	2 9 3
Thana Basia (do.) ...	0 12 4	1 8 6
Thana Tarpa (do.) ...	0 15 3	1 14 1
Thana Bano	0 11 1	1 3 7
Thana Kolebira	0 10 11	1 2 1

The rate of rent payable by non-occupancy raiyats is very high in Karra, and comparatively high in the other thanas.

* * * * * * *

Computation and recovery of costs.

119. Computation was completed by the end of September. The total demand amounts to Rs. 1,61,000. The full demand for the first season's area was recovered. The total costs of survey and settlement operations for the whole area surveyed, which amounts to about 3,900 square miles, have now been calculated, as well as the total demand at present recovery rates. The total expenditure works out to 6 annas per acre. It has been found however that the total costs less the contributions by Government will not be recovered at the present acreage rates which are based on classification. It will be necessary therefore either to increase the acreage rates or to ask Government to contribute a larger percentage of the cost. A separate report will be submitted on this subject.

* * * * * * *

Cadastral survey and khanapuri.

123. The cost rate for all operations, including survey, khanapuri and recess work, was Rs. 89·5 per square mile. The cost rates for the two previous years, when the work was controlled by the professional Survey Department amounted to Rs. 83·1 and Rs. 93·2, respectively. In comparing the rates it is, however, necessary to consider that the cost rates for the year under report include expenditure on supervision of khanapuri by Assistant Settlement Officers. This item was of course not included in the Survey Department rates, as the supervision was always done by the agency of the Settlement Department, and the expenditure was consequently debited to it. The cost of this supervision during the year amounted to Rs. 17,082, or Rs. 10·5 per square mile. Deducting this, the cost rate works out at Rs. 79 per square mile.

According to the orders contained in the Board's letters Nos. 7881A., dated the 22nd December 1905, and No. 4143A., dated the 15th August 1906, the cost rates of the cadastral-khanapuri operations are shown in the subjoined table:—

Description of work.	Direct charges.	Cost rate per square mile.	Share of auxiliary charges.	Cost rate per square mile.	Total expenditure.	Total cost rate per square mile, cols. 3+5.	Remarks.

As the contract rates of pay for both survey and khanapuri work and the pay of both Inspectors and Head Inspectors were considerably increased during the year under report, the result is satisfactory. The comparatively low rate is due—(1) to the fact that a large compact block of 1,618 square miles was surveyed, and the charges were consequently distributed over a larger area than in previous years; and (2) to the rapid completion of the programme, and the consequent decrease in the cost of the charges under the heads of Supervision and Control.

The average size of a field was 1·5 acres. Free labour was supplied by the villagers as heretofore.

PORAHAT ESTATE IN SINGHBHUM.

Area—622·69 square miles.

Number of villages 678

Reasons for the present operation and notifications.

124. The survey and settlement operations in the Porahat Estate were completed in July 1903. The settlement was carried out under Act I (B.C.) of 1879, which contained no provision for the preparation of a legal record-of-rights. The Raja took strong objection to several entries in the records as prepared, and his action appeared to threaten the rights of the *pradhans* and headmen of the villages of the estate. The question of the rights of the villagers in the forests of the estate was also raised. The Commissioner of the Chota Nagpur Division accordingly recommended the preparation of a valid record of the rights of the different classes of tenants under Chapter X of the Bengal Tenancy Act which had meanwhile been extended to the district. The present operations were accordingly ordered under section 101 (1) of that Act in respect of the estate and its allied tenures of Anandpur, Kera, Bandgaon and Chainpur, and in certain villages belonging to the Chief of the Kharsawan State, in Notifications No. 3282L.R., dated the 30th November 1905, and No. 265T.—R., dated the 30th April 1906.

* * * * * * *

SERAIKELA AND KHARSAWAN STATES IN SINGHBHUM.

Area—594 square miles.

Number of villages 917

Programme.

128. The programme for the year consisted of the attestation and draft publication of 917 villages covering an area of 594 square miles and the disposal of objections under section 103A. It was completed by the end of the field season.

* * * * * * *

Work done.

130. Attestation presented little or no difficulty. Rent disputes were few. A small number only of the internal disputes decided at the khanapuri time was revived, and the number of new disputes was not large. Two important matters decided during attestation were the disputes relating to produce rents and to the right of the raiyats to trees in the Dugni and Bangsai *pirs* and the claims of the inhabitants of the Kolhanpir of Kharsawan to be recorded as Mundari *khuntkattidars* under the terms of Act I of 1879. With the approval of the Commissioner, it was decided to record the latter as *khuntkattidars* (clearers of the soil) with special privileges as regards jungle rights. It was held that they were not Mundari *khuntkattidars* within the meaning of the Act. The Settlement Officer corrected his own maps at attestation. Special attention was given to the draft publication of the records, and the work was carefully and intelligently carried out. The check of the records was completed during recess, and copying and comparison were begun. Proposals for the settlement of fair rents were submitted and approved by the Commissioner during the year.

The two important boundary dispute cases, which were pending from the previous year and for the decision of which the Settlement Officer was appointed Special Commissioner, were decided, and the Settlement Officer's decision confirmed by Government.

MAINTENANCE OF LAND RECORDS

Experimental Revisional Settlement in Balasore.

131. For the purpose of arriving at a suitable and practical scheme for the maintenance of settlement records, an experimental revision settlement was undertaken, on the lines suggested by Mr. H. Savage, C.S.I., in respect of 122 villages situated in the Sadar thana of the district of Balasore.

The experimental operations were started in the cold weather of 1904-05 and completed in June 1906. The area taken up comprised 45·61 square miles distributed over 14 chaukidari unions.

Field work was done in the cold weather of 1904-05 by the presidents of the chaukidari unions under the supervision of a kanungo. The president of each union was furnished at first with abbreviated and subsequently with full copies of the khatians of the last settlement, together with copies of the khasra. He was required to travel map in hand, from plot to plot in each village, and to record in a rough register all changes in possession of plots and of tenancies, as well as the numbers of the plots which required remeasurement. The kanungo checked over 10 per cent. of the mutations recorded by the president, and remeasured all plots in respect of which alteration of the maps was required. During the recess the khatians of the last settlement were corrected in red ink, dispute lists written up, and the records prepared for attestation in the following cold weather. In view of the proposals for a general revision of the record-of-rights in Orissa, it was decided to confine the attestation work to an area containing 65,854 plots and 23,833 khatians. The work was carried out by Babu Hari Misra, kanungo, under the supervision of the Collector.

The number of disputes raised amounted to 3,342, including 921 rent disputes, of which 628 were decided according to the agreement of the parties.

Though it was at first intended to attest only the khatians in which alterations had occurred, it was subsequently found necessary in practice to attest all the khatians, the result being that a large number of mistakes not noticed by the presidents or the kanungo during the initial revision was detected, and all changes that had taken place since the preceding field season were brought to light.

Rents were altered on account of alterations in area, in 24 villages according to the agreement of the landlords and tenants. The result in these cases was an increase of area amounting to 5 per cent. on the average, and an increase of rent amounting to 11 per cent. This clearly indicates the necessity of giving the mutation officer power to scrutinise compromises regarding increase of rent. As these proceedings were purely experimental, they had no legal validity, but where the Attestation Officer began under my instructions to enquire into the fairness of compromises, they at once ceased to be put forward, and the existing rents were consequently retained. They will be revised where necessary in the course of the general revision operations.

As a result of these experimental proceedings, it was found that the number of plots and khatians in the villages attested had increased from 59,335 and 20,063 to 65,854 and 23,833, *i.e.*, by 11 and 19 per cent., respectively. Since the last settlement, which took place 10 years previously, no less than 40,794 plots and 15,214 khatians, or 69 and 76 per cent., respectively, had undergone some change.

Changes in 31·83 per cent. of the plots and 29·27 per cent. of the khatians were due to succession, 7·71 and 8·17 per cent., respectively, to sales, and 3·19 and 2·10 per cent., respectively, to partition. 16 per cent. of the changes were due to modifications in the maps of the last settlement. Generally speaking the work done by the presidents in preparing the record of initial mutations was good so far as it went, but sufficient allowance had not been made for the difficulty and trouble of incorporating the changes in the khatians for attestation. It has therefore been decided to have the general revision of the records

in Orissa done by a [illegible]id staff under the control of the Settlement Officer For subsequent annual maintenance, when the changes will be less numerous there is ground for hope that a local agency under capable supervision will be found sufficient. It has been arranged to train such a staff in the course of the initial revision.

A scheme for the revision of the records in Orissa preparatory to annual maintenance was submitted to the Government of India with the Bengal Government's letter No. 258T.—R., dated 28th April 1906, and was sanctioned in the Government of India's No. 1487—112-6, dated the 30th August 1906.

It is proposed to deal with the Sadar sub-division of the Balasore district during the present field season.

* * * * * * *

The results of the working of the Mutation Offices.

133. The returns of the mutation offices established at Bettia, Hajipur and Mahnar under the Land Records Maintenance Act, VII of 1895, show a slight decline in the number of mutations recorded in these offices, only 2,950 mutations having been registered as compared with 3,015 in the previous year. The amount realised in fees was Rs. 319 as against Rs. 385 in the previous year. The opinion expressed in previous years that the Act is a failure, so far as maintenance of the record is concerned, is thus again confirmed. It will no doubt be repealed when a proper system of maintenance is evolved as a result of the Orissa experiment.

Maintenance of land records and inspection of rent-rolls in Government and Wards' estates.

134. The figures given in Appendices VII to X indicate the results attained with regard to the record of mutations and inspection of rent-rolls in Government and Wards' estates for which a survey and record-of-rights have been completed. According to the standard laid down in the Board's Circular No. 11 of April 1903, the number of mutations recorded annually should not fall below [illegible] per cent. of the total number of tenancies in an estate. So far as Government estates are concerned, the standard was attained in four districts only. It was approached in two more, and in the remainder the number of mutations recorded was only 4 per cent., or less of the total number of tenancies. Taking the Government estates as a whole, the percentage attained is only 4·07 per cent. as compared with 4·35 per cent. in the previous year and 7·11 per cent. in 1903-04.

* * * * * * *

UTILIZATION OF LAND RECORDS.

135. The extracts from the Land Revenue Administration Reports for the year 1905-06, which have been received from the District Officers, show that in all the districts, of which the whole or considerable portions have been surveyed and settled, the records-of-rights were freely referred to in criminal and revenue work. The Subdivisional Officer of Begusarai says that the number of land and rent disputes has greatly diminished in consequence of the settlement, and that the serious riots which formerly occurred are now rare. The Deputy Commissioner of Ranchi reports that probably not a single criminal case relating to land in the Sadar and Khunti subdivisions was determined without a reference to the settlement papers. The Joint-Magistrate of Ranchi invariably, on receipt of a complaint, calls for the settlement-papers, and it is said that the information obtained from them is always sufficient to show whether the case is true or groundless. The result is that practically all the persons on whom processes were issued were ultimately convicted. There were very few cases in Ranchi in which Criminal or Revenue Courts disagreed with the finding of the Settlement Department. The presumption of correctness attaching to the records appears to have been generally understood by the Magistrates and the Police. In land disputes the records were found very useful, and copies of them were often produced by the parties of their own motion. In all districts the records appear to have been utilized wherever possible in the various branches of the Collectorate work, *e.g.*, in Partition, Land Acquisition, Cess Revaluation, Land Registration, and Certificate cases and in granting loans and advances, and in

the management of Government and Wards' estates. In some districts they were found useful in commutation cases under section 40, and in granting certificates under section 84 of the Bengal Tenancy Act as well as in ascertaining chaukidari-chakran lands, and in tracing out encroachments on public and Government lands.

136. The areas shown in the records or in the statistics based on the records were utilized in estimating the normal standard areas under the various kinds of crops and in making forecasts of outturns of crops. In some districts the cadastral maps are used by the Police in preparing sketches of the scenes of crime, but there appears to be room for a more extended use of the maps in this direction, more especially in criminal cases arising out of land disputes.

137. The reports show that in respect of all settled areas the description of lands by their survey plot numbers was generally insisted upon in the registration offices. The Collector of Bhagalpur observes that it would be an improvement if rules were prescribed making it compulsory to describe lands in settled areas by their survey plot numbers in all civil suits. He mentions a case in which a Criminal Court was called upon to decide from the judgment and decree of a Civil Court delivering possession of certain land, what land was referred to. The difficulty of identifying land from the decisions of the Courts is a common experience. The suggestion that wherever possible the Courts and parties should be required to describe the lands with which they are dealing by their survey plot numbers is therefore worthy of consideration.

MAINTENANCE OF BOUNDARY MARKS.

138. Under Government order No. 518T.—R., dated the 5th May 1904, the application of the rules for the maintenance of boundary marks to districts which have been surveyed and settled, and in respect of which schemes for the maintenance of settlement records have been submitted to the Government of India, have been kept in abeyance, pending receipt of orders on those schemes. Sanction having been received to the scheme for the revision of the records in Orissa, arrangements have been made to carry out the verification of the position of the boundary marks and the compilation of the necessary registers during the revision operations.

139. Instructions for the preparation of boundary mark maps were finally approved in the Board's letter No. 731A., dated the 2nd February 1906. These maps have been supplied by the Survey Department for the areas under attestation this season, and the procedure prescribed by Part I of Appendix T of the Survey and Settlement Manual is being carried out. Similar maps have also been prepared for all the thanas in the districts of Balasore, Puri, Cuttack, Muzaffarpur, Champaran and Saran, and those for the three thanas in North Monghyr and six thanas in North Bhagalpur are under preparation in the Bengal Drawing Office. Arrangements are also being made for the preparation of maps for all the thanas in Darbhanga and for the areas in Purnea attested during 1904—1906. Trijunction-mark maps of all the thanas in the Political States of Seraikella and Kharsawan have been prepared and supplied to the Settlement Officer, and those for nine thanas in Ranchi are under preparation. A simple procedure for the verification of the trijunction cairns in Ranchi and the two States of Seraikella and Kharsawan has been sanctioned by the Board and will shortly be carried out. As regards the Damin-i-Koh estate in the Sonthal Parganas, Government has sanctioned Rs. 400 for preliminary enquiries in connection with the verification of boundary marks and the preparation of maps and registers.

140. In the Burdwan Division 324 permanent boundary marks are reported to exist in the Government estates; 20 of them are damaged. An inspection was made of 1,167 pillars in the zamindari estates surveyed in the Division; 267 of them are reported to be damaged or missing and 46 have been restored. The boundary pillars in the Burdwan Raj estate in the districts of Birbhum, Midnapore and Burdwan are looked after by the officers of the Raj and are reported to be in a fair state of repair. In Midnapore the Government estates and Nayagram Wards' estate are under settlement, and arrangements for the maintenance of the boundary marks in those estates are being made.

141. In the Presidency Division there exist 2,705 permanent marks in 172 Government estates surveyed under the Survey Act, or the Bengal Tenancy Act; 2,287 of them were inspected during the year under review; 1,900 were found to be in fair order; 387 were damaged or missing and 29 were restored at a cost of Rs. 90. The number of boundary marks in the zamindari estates surveyed in this division is 93; 13 of them were found to be damaged or missing and 12 of the damaged stones were restored. In the 24-Parganas the maintenance of boundary marks in the Government estates is satisfactory. The marks, which are in the custody of the chaukidars, are regularly inspected by the Subdivisional Officers, the Sub-Deputy Collectors, the kanungos and tahsildars, and steps are taken to re-erect the marks found to be displaced or missing.

142. There are 2,548 boundary marks in 117 Government estates in the Patna Division; 1,798 of them were found in good order and 45 were damaged or missing; 12 of the damaged or missing stones were restored. In the zamindari estates 1,804 boundary marks were found to be in good order and 248 damaged or missing. In Saran the marks in 35 Government estates were inspected by the tashildars and kanungos, and most of them were found to be in fair order. A sum of Rs. 1,005 was spent during the year for the purchase and erection of 1,261 stones for Government estates in the district of Gaya. In Patna there was one prosecution for removing one pillar. The accused was, on conviction, sentenced to 2 months' imprisonment.

143. In the Kalimpong Government estates in Darjeeling there are 100 boundary pillars in 49 estates; out of these, 20 were inspected during the year, 18 of which were found to be in fair order and 2 damaged by landslips. The damaged pillars were restored by free labour. Although there was no regular inspection in the Sonthal Parganas, the boundary marks are generally properly maintained. In Government and Court of Wards' estates the kanungos and managers look after them when on tour and the Sub-divisional Officers also inspect them. Some boundary pillars in Government estates requiring repairs were repaired during the year under report.

144. In the Orissa Division there are 2,340 boundary marks in the Angul Government estates, of which 989 were inspected during the year, 548 marks were found in fair order and 441 damaged or missing; 293 marks were restored at a cost of Rs. 500 met out of the allotment of Rs. 1,500 sanctioned by Government in letter No. 17P., dated 8th January 1906. In the Banki Government estate in Cuttack there are 1,872 boundary marks. All of them were found on inspection to be in fair order. In Sambalpur the boundary marks are in fairly good condition, except some on river banks that are liable to be washed away. They are repaired annually by the village tenants under the supervision of mukaddams under section 141 (*d*), Central Provinces Land Revenue Act.

145. There exist 21,488 boundary pillars in the Government estates of the Chota Nagpur Division; of these, 6,882 are reported to be in fair order, 6,244 in a damaged condition and 381 are missing. There is no dafadari system in Palamau. Boundary marks in the two Government estates in it are regularly inspected by the maintenance peshkars, and damaged and missing marks are restored.

WEATHER AND CROP REPORT.

For the week ending the 25th March 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	1·05	9	9	Rainfall general. Sugarcane-pressing and threshing of *rabi* going on. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	2·29	8	8	Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	0·29	9½	9½	Weather cloudy. Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	0·35	9	9	Weather overcast. Rainfall at Tamluk 3·99 and Contai 3·06. Rain beneficial. Ploughing for *aus* begun. Outturn of winter rice 80 per cent., that of rape and mustard 70 per cent. Fodder and water sufficient.
5	HOOGHLY ...	1·36	7½	7½	Weather cloudy. Rainfall general. *Rabi* crops nearly harvested. Pressing of sugarcane continuing. Lands being ploughed for *aus* and jute. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	2·79	9	9	Pressing of sugarcane continuing. Ploughing of lands for paddy sowings already begun. Much rain during the week and the standing crops flourishing. Some damage done to tobacco by the recent hail. No cattle-disease.
7	24-PARGANAS	2·99	9	9	Weather cloudy with occasional showers of rain and hail-storm. Good rain in Diamond Harbour. Rainfall general. Lands being prepared for the next season's crops except in Basirhat, where ploughing has been retarded. Much damage done to the standing *rabi* crops by recent hail-storm in Barrackpore. Standing crops good. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	2·68	8½	8½	Prospects of standing crops fair. Lands being prepared for jute and *aus*. No cattle-disease. Fodder and water sufficient.
9	MURSHIDABAD	0·84	8	8	Weather seasonable. *Rabi* crops still being harvested. Recent rain expected to do good to the crops. No cattle-disease. Fodder and water sufficient.
10	JESSORE ...	2·83	7 11/11	8 1/10	Weather cloudy. Rainfall general and beneficial to the standing crops and to the cultivation of *aus* paddy. Prospects of standing crops fair. Harvesting of sugarcane nearly finished. High prices continuing. No cattle-disease. Fodder and water sufficient.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	2·94	9½	10	Weather cloudy, stormy and rainy. Rainfall general. Outturn of winter rice and rape and mustard estimated at 74 and 89 per cent., respectively. Lands being prepared for jute. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	0·24	9½ 14½*	9½ 14½*	Weather seasonable, but cloudy and cold at times. Rainfall general. Harvesting of *rabi* crops continuing; its progress hampered by bad weather. *Rabi* crops stocked in the farm yard or ready for harvesting injured to some extent by the recent rain. Fodder and water for cattle sufficient.
13	GAYA ...	0·11	9 1/16 13 1/16*	9 1/16 14 7/16*	Weather clear and warm with one cloudy day. Harvesting of *rabi* and pressing of sugarcane continuing. Some damage caused by rain. Fodder and water for cattle sufficient.
14	SHAHABAD ...	0·25	9½ 15*	9½ 15*	General light rain. *Rabi* crops being harvested. Sugarcane planting continuing. Cattle-disease reported from Akbarpore. Fodder and water sufficient.
15	SARAN ...	0·21	9 14*	9 14*	Weather unsettled. Harvesting of *rabi* stopped for some time in some parts of the district owing to rainy weather, but resumed since. Pressing of sugarcane continuing. Fresh sowings of indigo necessitated by rainfall. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	2·06	9½ 13½*	9½ 14*	Weather cold and cloudy. Rainfall at Bettiah 1·10 inches. Rainfall general; some damage done to *rabi* crops. Harvesting of *rabi*, collection of opium, and preparation of lands for *bhadoi* crops going on. No cattle-disease. Fodder and water sufficient. Exports more than imports.
17	MUZAFFARPUR	0·38	9 14*	9 14*	Weather cold and occasionally cloudy. Rainfall general. Hail in some places in Hajipur. Common rice and maize selling at 9½ and 13 seers a rupee, respectively, at Sitamarhi and at 9½ and 13 seers a rupee, respectively, at Hajipur. No persons on relief in the district. No cattle-disease. Fodder water sufficient.
18	DARBHANGA ...	0·29	8¾ 14*	8¾ 14*	Weather cloudy. There was rainfall on the 22nd and 23rd instant. *Rabi* crops being harvested. Rain on the whole beneficial though some damage to *rabi* crops is reported. Number of persons on test-works in the Madhubani subdivision—1,437. Number of persons on relief-works on 21st March—15,24[illegible], showing a further considerable decrease. People now getting employed in the *rabi* harvest, and the scale of wages on famine relief-works being reduced. Total number of persons gratuitously relieved for the same day—11,277. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
19	Monghyr ...	0·54	9 13*	9 13*	Weather cool since last rain. Harvesting of *rabi* crops continuing. Rain of the last few days probably caused damage. Cattle-disease reported from Jamui subdivision and thana Bariarpur. Fodder and water sufficient.
20	Bhagalpur ...	0·78	9½ 13⅞*	9½ 13⅞*	Weather cloudy at times. Rained three days; temperature mild. Rains helped ploughing for *makai* and *aghani* crops. *Mung* being sowed. *Rabi* being harvested. Rain damaged *rabi* crops considerably. Mangoes much damaged. Cattle-pox reported from Belhar in Banka. Fodder and water sufficient.
21	Purnea ...	...	7½ 12*	7½ 12*	Weather cold and stormy. Rainfall heavy at Sadr, Kishanganj 1·35, Araria 0·91 and Barsoi 0·70. Further damage done to mango and *rabi* crops. Harvesting of *rabi* crops going. Lands being ploughed for *bhadoi* crops and jute. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	1·45	7 10*	7 11*	Weather seasonable. Hills—Wheat, barley and mustard in fair state. Maize being sown. Terai—Sugarcane-pressing going on. Land being ploughed for *bhadoi* and jute.
23	Sonthal Parganas.	2·37	9½ 15*	9½ 15*	Weather cloudy. Rainfall general throughout. *Mahua* crop damaged by rain. *Rabi* crops promising fair. No cattle-disease. Fodder and water sufficient.
24	Cuttack ...	...	10½	10½	Slight rainfall. Tobacco and cotton growing. Sugarcane being harvested. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	Nil	9	9½	Weather unseasonable. Threshing of paddy and pressing of sugarcane continuing. Other crops and vegetables doing well. Prospects fair. Sporadic cases of rinderpest reported from Balasore Chakla. Fodder and water sufficient.
26	Angul ...	Nil	10½	10½	Weather seasonable. Planting of sugarcane in progress. Lands being ploughed. Cattle-disease reported from the interior. Fodder and water sufficient.
27	Puri ...	0·97	10½	10½	Weather seasonable. Lands being ploughed for the ensuing *sarad* paddy. Cotton growing well. Sugarcane being pressed. *Dalua* getting on well. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	1·62	11½	11½	Nights cool. Rainfall general. Sugarcane plantation commenced in Bargarh tahsil. Sugarcane fields being ploughed in sadr tahsil. Rice fields being ploughed for next harvest in both Tahsils. Standing crops in good condition. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at 8-a.m. station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	0·22	9	9½	Weather cloudy. Standing crops somewhat damaged by the recent rain and hail-storm. Fields being ploughed. Sugarcane being transplanted in some places. Fodder and water sufficient.
30	Ranchi ...	0·04	10	10	Weather seasonable. Ploughing continuing. Harvesting of *rabi* crops in progress. Cattle-disease reported from four thanas. Fodder and water sufficient.
31	Palamau ...	0·69	9	9 1/16	Weather cloudy. Harvesting of *rabi* commenced. Cattle-disease existing. Fodder and water sufficient.
32	Manbhum ...	0·73	9½	9½	Weather seasonable. Prospects of crops good. *Arhar* ripening. Outturn of *til* and winter rice estimated at 75 and 83 per cent. respectively. Cattle-disease not reported. Fodder and water sufficient.
33	Singhbhum ...	0·01	9	9	Weather hot. Harvesting of *rabi* crops nearly finished. Common rice selling at 10 seers a rupee at Seraikella and Kharsawan. Fodder and water sufficient.
34	Cooch Behar	1·64	7 5/11	7 5/11	Weather abnormally cool. Fodder and water sufficient.

General Summary.—Rain was more or less general throughout the Province. The fall was moderately heavy in Lower Bengal and in Champaran, Darjeeling, the Santhal Parganas, Sambalpur and Cooch Behar. In parts of Lower Bengal it is reported that the rain which has fallen has been beneficial for the preparation of the land for the next season's crops; but in most of the Bihar districts the *rabi* crops, which have been or are being harvested, have suffered to some extent from this rain. In Darbhanga the number of persons on gratuitous relief is 11,277, on test-works 1,437 and on famine-relief works 15,247. Cattle-disease is reported only from seven districts. There are no complaints of insufficiency of fodder or water. The price of common rice has risen in six districts and has remained stationary in the rest of the Province. No fall in prices has been reported.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF FEBRUARY 1907.

THE meteorological history of the month is practically a history of a series of depressions or cold-weather storms that after forming usually in Persia or passing through that area disturbed the weather and caused a general excess in rainfall over the greater part of the reporting area. The first of them, which formed in the United Provinces on January 30, passed through North-East India and disappeared on the 3rd, after giving rise to precipitation over the greater part of the two Provinces. On the 1st and 2nd another depression formed in Arabia, and establishing low-pressure conditions in North-East India about the 5th gave moderate rain in Bihar, Chota Nagpur and Orissa. It disappeared on the 7th. This was followed almost immediately by another which entered North-East India about the 12th, and gave scattered rainfall during the next few days, the most important fall being 1 inch at False Point, which occurred during a thunderstorm. It disappeared in Assam on the 14th. The next depression was of a very diffused character by the time it reached North-East India, being hardly discernible as a depression. In spite of its diffused character, however, it was even more active than its predecessors, and gave fairly general rain in Chota Nagpur, South Bihar and North Bengal on the 20th.

During the remainder of the month one more depression occurred of a character similar to the first two, which gave some precipitation as soon as it reached North-East India in parts of Bengal and of Eastern Bengal and Assam. Cherapoonjee reported a fall of nearly four inches on the 27th and Narayanganj a fall of one and-a-half inches on the same date.

Summary of Temperature.—The average mean temperature of the month was below the normal mean of the month in Bihar, Orissa, Chota Nagpur and Assam, and above the normal mean in Eastern Bengal and Bengal. Excess in temperature was as usual associated with defect in rainfall. The highest temperature recorded during the month was 93·4° at Cuttack and the lowest 41·9° at Dinajpur.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of February 1907 :—

Meteorological Division.	Temperature.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal *	92·8	48·7	81·5	60·8	70·9	+ 0·4
Eastern Bengal, North	86·8	41·9	78·0	54·5	66 3	+ 0·9
Eastern Bengal, South	87·6	49·0	80·6	58·5	69·7	+ 1·1
Bihar	85·9	42·7	75·5	55 1	65·3	— 0·3
Orissa	93·4	54·7	84·4	66·0	75·2	— 0·1
Chota Nagpur*	89·4	47·0	76·9	55 8	66·0	— 1·6
Assam	84·4	47·2	75·1	55·3	65·2	— 0·5

* Purulia not included.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province. February may be regarded as rather a wet month in the Province of Bengal, the percentage departure from normal being + 37. In Eastern Bengal and Assam it reached + 4 only.

Actual and average rainfall and departure from normal for February 1907.

		Inches.
The total fall of rain from 17th to 23rd March 1907		3·22
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·20
The total fall from 1st January to 23rd March 1907		8·82
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·57

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the new Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The month of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew; o, overcast; g, dark, gloomy; t, thunder; <, lightning; K, thunderstorm; d, drizzling rain; p, passing temporary showers; ▲, hail.

C. W. PEAKE,
for Director-General of Observatories.

LIBERALITY OF RAI JOGESWAR CHANDRA CHANDRA BAHADUR.

No. 609L.S-G., dated Calcutta, the 28th March 1907.

From—H. J. McINTOSH, Esq., I.C.S., Secy. to the Govt. of Bengal, Municipal Dept.,

To—The Commissioner of the Orissa Division.

I AM directed to acknowledge the receipt of your memorandum No. 73L.F., dated the 5th March 1907, reporting that Government Promissory notes to the value of Rs. 2,000 given by Rai Jogeswar Chandra Chandra Bahadur for investment for the purpose of creating a fund for the improvement of the water-supply in the district of Cuttack to be called the "Rani water-supply fund" have been forwarded to the Accountant-General, Bengal.

2. In reply, I am to request that you will be so good as to convey to the donor an expression of the Lieutenant-Governor's appreciation of his liberality and public spirit.

WEATHER AND CROP REPORT.

For the week ending the 1st April 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.

10	JESSORE ...	1·22	7 1/16	7 1/16	Weather seasonable. Rainfall general and beneficial to the standing crops and for cultivation for *aus* and jute. Prospects of standing crops fair. Harvesting of sugarcane finished. High prices continuing. No cattle-disease. Fodder and water sufficient.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	2·15	9¾	9¾	Rainfall general. Weather unsettled. Outturn of winter rice and rape and mustard estimated at 74 and 89 per cent., respectively. Lands being prepared for jute. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	0·32	9⅝ 14¾*	9½ 14¾*	Rainfall general. Weather seasonable, but cloudy and cold at night. Slight rain with hail-stones of small size. Harvesting of *rabi* crops continuing. Standing *rabi* crops damaged to some extent by the recent rainfall. Fodder and water for cattle sufficient.
13	GAYA ...	Nil	9 1/16 14 1/16*	9 1/16 13 15/16*	Weather getting warmer. Harvesting of *rabi* and pressing of sugarcane continuing. Fodder and water for cattle sufficient.
14	SHAHABAD ...	Nil	9½ 15*	9½ 15*	*Rabi* crops being harvested. Planting and pressing of sugarcane continuing. Cattle-disease reported from Akbarpore. Fodder and water sufficient.
15	SARAN ...	0·06	9 14*	9 14*	Weather seasonable. Harvesting of wheat and barley, sowing of winter rice and indigo and pressing of sugarcane still continuing. Lancing of poppy nearly completed. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	Nil	9 14*	9½ 13¾*	Weather bright. Harvesting and threshing of *rabi* and collection of opium in progress. *Bhadoi* paddy, *china* and *kodo* being sown. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	9 14*	9 14*	Rainfall at Hajipur 0·10 inches, with hail in places. Common rice and maize selling at 9¼ and 13¾ seers a rupee, respectively, at Hajipur, 9 and 13¾ seers a rupee, respectively, at Sitamarhi. No persons on relief in the district. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	Nil	8¾ 14*	8¾ 14*	Weather cloudy at times. Harvesting of *rabi* crops continuing and nearing completion. Number on test-works in the Madhubani subdivision on 30th March—2,117. Number of persons on relief-work on 28th March—15,506. Total number of persons gratuitously relieved including village doles for the same day—10,534. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
19	Monghyr	0·09	9 13*	9 13*	Weather seasonable. Harvesting of *rabi* crops going on. Cattle-disease still reported from the Jamui sub-division. Fodder and water sufficient.
20	Bhagalpur ...	0·21	9½ 13½*	9½ 13½*	Weather seasonable. Harvesting of *rabi* crops going on *Mukai* being sown. Transplatation of sugarcane going on. Sowing of *mung* and low land paddy commenced. Prospects of *mahua* poor. Cattle-disease reported from thanas Kishanganj and Bihpur. Fodder and water sufficient.
21	Purnea ...	Nil	7½ 12*	7½ 12*	Weather seasonable with strong westerly winds. *Rabi* crops still being harvested. Outturn fair. Mung much damaged by recent rain and hail. Lands being ploughed for *bhadoi* crops and jute. Cholera raging in the interior. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	Nil	...	7 10*	Weather seasonable. Hills—Wheat, barley and mustard in fair state. Maize being sown. Terai—Sugarcane-pressing going on.
23	Sonthal Parganas.	0·50	9	9½ 15*	Weather abnormal. Grazing good. Reaping of *rabi* crops in progress. Cattle-disease very prevalent.
24	Cuttack ...	...	10½	10½	Slight rainfall. Cotton growing well. *Dalua* and tobacco being harvested. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	3·99	9½	9	Weather seasonable. Partly cloudy. Threshing of paddy and pressing of sugarcane continuing. Other crops and vegetables doing well. Prospects fair. No cattle-disease. Fodder and water sufficient.
26	Angul ...	Nil	10½	10½	Weather hot. Lands being ploughed. Cattle-disease reported from the interior. Fodder and water sufficient.
27	Puri ...	0·02	10½	10½	Weather seasonable. Lands being ploughed for the ensuing *sarad* paddy. Cotton thriving well. Sugarcane being cut. *Dalua* doing well. *Rabi* crops doing well. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	0·31	11½	11½	Mornings cool. Rainfall general. Sugarcane plantation commenced in Sadr tahsil and in progress in Bargarh tahsil. Rice fields being ploughed for next harvest in both the tahsils. Standing crops in good condition. No cattle-disease. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	..	9½	9	Standing crops somewhat damaged by rain and hail-storms. Fodder and water sufficient.
30	Ranchi ...	0·17	10	10	Weather seasonable. Harvesting of *rabi* crops continuing. Dropping of *mohua* in progress. Cattle-disease reported from four thanas. Fodder and water sufficient.
31	Palamau ...	0·19	9 1/16	9	Weather seasonable. *Rabi* harvesting well advanced. Cattle-disease continuing. Fodder and water sufficient.
32	Manbhum ...	0·63	9½	9½	Weather seasonable. Prospects of crops good. Cattle-disease reported from Purulia thana. Fodder and water sufficient.
33	Singhbhum ...	0·09	9	9	Weather seasonable. Lands being prepared for cultivation. Fodder and water sufficient. Common rice selling at 10½ and 10 seers a rupee at Seraikella and Kharsawan, respectively.
34	Cooch Behar	Nil	7 7/16	7 7/16	Days hot. Night abnormally cool. Sowing of jute continuing. Fodder and water sufficient.

General Summary.—Rain was fairly general in Bengal Proper and Chota Nagpur; in Bihar and ...ssa scattered showers fell. The fall was heavy in Nadia, Jessore, Khulna and Balasore. Slight ...mage by rain and hail to the standing *rabi* crops is reported from Patna, Purnea and Hazaribagh. The ...ssing of sugarcane is nearly over. The harvesting of the *rabi* crops is well advanced. Lands are being ...pared for the next season's crops. In Darbhanga the number of persons on gratuitous relief is 10,534, ...test works 2,117 and on relief works 15,506. Cattle-disease is reported from eight districts; in the ...ttal Parganas, it is stated to be very prevalent. Fodder and water are sufficient. The price of common ... has risen in seven and fallen in five districts.

	Inches.
The mean pressure of the seven days	29·892
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·774
	Hours.
The total number of hours of bright sunshine	46·9
The maximum possible number of hours of sunshine	85·5
	°
The mean temperature of the seven days	78·4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·5
The extreme variation of temperature	28·7
The maximum temperature	92·6
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	78
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 24th to 30th March 1907	0·29
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·20
The total fall from 1st January to 30th March 1907	4·11
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·77

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew; o, overcast; g, dark, gloomy; t, thunder; <, lightning; R, thunderstorm; d, drizzling rain; p, passing temporary showers; ▲, hail. ☰, fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 1st April 1907.

C. W. PEAKE,
for Director-General of Observatories.

FORECAST OF THE RABI CROPS OF BENGAL, 1906-07.

THE following note is published for general information.

E. A. GAIT,
Offg. Chief Secy. to the Govt. of Bengal.

The 4th April 1907.

DEPARTMENT OF AGRICULTURE, BENGAL.

FORECAST OF THE RABI CROPS OF BENGAL, 1906-07.

[On an average of the five years ending 1904-05, the area under summer rice, which is included in this forecast, in the territory to which it relates, has represented some 0·3 per cent. of the total area under rice in British India.]

Explanatory.—The crops dealt with in this forecast are the spring crops, such as rice, barley, gram, tobacco, poppy and other food and non-food crops, which are harvested between February and April. In these food and non-food crops are included *rahar*, *kalai*, *mung*, peas, lentils, *khesari*, *kulthi*, buck-wheat, *china*, potatoes, yams, melons, chillies and other spices as well as oats and *rabi* vegetables.

Bihar is the chief *rabi*-growing tract, but *rabi* crops are important also in Burdwan, Midnapore, Cuttack, Palamau, Singhbhum and in all the districts of the Presidency Division, excepting the 24-Parganas.

2. *Character of the season.*—In October the rainfall was above the normal in the Sonthal Parganas, Sambalpur, Cuttack, Puri, Ranchi, Manbhum and in all the districts of Lower Bengal, excepting Khulna. In the rest of the Province it was deficient. In November, there was no rain in the districts of the Patna Division and in Purnea, while some light showers fall in the rest of the Province. The sowings, which generally take place in October and November, were retarded in Bengal Proper, but were normal in Bihar. Want of rain was felt till the first week of February, when there was general rain all over the Province, the fall being much heavier than usual everywhere, except in South-west Bengal where it was slightly below the normal. About the middle of this month when the harvesting of the crops was somewhat advanced, there was general rain, and in places hail, which damaged the crops to some extent in most of the Bihar districts and in Hooghly, Hazaribagh, Ranchi and Palamau. Injury was done by insect pests in Saran and Monghyr. The season was not favourable on the whole for the crops.

3. *Area sown.*—The normal area sown with the various *rabi* crops in the Province as now reported, amounts to7,718, 400 acres against 7,745,100 acres shown last year. The difference is due to the revision of estimates of normal areas by the District Officers of Burdwan, Midnapore, Hooghly, Howrah, 24-Parganas, Murshidabad, Khulna, Gaya, Champaran, Bhagalpur, Angul, Puri and Sambalpur. The actual area sown this year is estimated at 7,341,500 acres, against the corresponding area of 7,349,000 acres of last year, which has been subsequently revised to 7,322, 600 acres.

4. *Outturn.*—From Appendix I it will be seen that only two districts, viz., Birbhum and Balasore, expect a normal crop. In six districts, viz., Howrah, Gaya, Champaran, Sonthal Parganas, Angul and Sambalpur, the estimates vary from 90 to 99 per cent., in five they vary from 80 to 89 per cent., and in twelve others, from 70 to 79 per cent. Six districts anticipate a crop between 60 to 69 per cent., while Darbhanga and Palamau show outturns of 51 and 57 per cent., respectively.

From the estimates submitted by the District Officers, the outturn of the different *rabi* crops for the Province as a whole, amounts to 72 per cent. of the normal. The outturn for last year was estimated as 75 per cent. of the normal. In many cases the estimates of the District Officers appear to be too low, and at least a 76 per cent. outturn may be expected.

The probable outturn of summer rice is now shown as 76 per cent. Accepting this figure, the gross outturn for the Province of this crop, amounts to 1,014,600 cwts. against 1,093,800 cwts. estimated last year.

C. A. OLDHAM,
Director of Agriculture, Bengal.

CALCUTTA;
The 27th March 1907.

APPENDIX I.

Forecast of the Rabi *crops of 1906-1907.*

District.	Total area of district in acres.	Total area of district estimated to be under cultivation in acres.	Names of *rabi* crops.	Approximate normal area under each specified *rabi* crop in acres.	Approximate area last year under each specified *rabi* crop in acres (1905-1906).	Estimated area this year under each specified *rabi* crop in acres (1906-1907).	Taking 100 to represent the normal outturn, how much represented the outturn last year (1905-1906)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1906-1907)?	Figures from the Cadastral Survey.			Date at which the sowing of the crops was begun this year.	A brief statement as to the weather and general condition of the crops, and whether the date of sowing was this year early, normal or late.
									Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area under each crop during the cadastral survey.

Saran ...	2,711,360	1,367,300	Barley	300,300	268,600	240,300	85	65	Acres.		Acres. 260,650	October.	Owing to failure of the kartiga rains as well as the fall of rain in early September, rabi crops did not germinate well. The date of sowing of the crops was normal, but in places insects were reported to have destroyed the seedlings. A second sowing was necessary in many places. The total failure of the cold-weather rain damaged the prospects of the crops to a considerable extent.

WEATHER AND CROP REPORT.

For the week ending the 8th April 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	9	[illegible]	Ploughing begun. Sugarcane being pressed. Cholera and small-pox prevailing generally. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	Nil	8	8	Sugarcane-pressing over. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	9	9	Weather seasonable. Sugarcane planting continuing. Fields being prepared for *aus* and *aman* paddy. No cattle-disease. Fodder and water sufficient.
4	MIDNAPORE ...	Nil	9	9	Weather seasonable. Sugarcane being planted. Late cotton, tobacco and *boro* paddy thriving. Cattle-disease reported from thana Sabong. Fodder and water sufficient.
5	HOOGHLY ...	Nil	7½	7½	Weather seasonable. Rain wanted in Serampore. Lands being prepared for *aus* and jute. Pressing of sugarcane almost over. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	...	9	9	Weather seasonable. Standing crops doing well. No cattle-disease reported in the subdivision. Fodder and water sufficient for cattle.
7	24-PARGANAS	Nil	8½	8½	Weather hot and cloudy with occasional dust-storm. Lands being prepared for the next season's crops. No standing crops in the field at present except sugarcane, which is doing well. Prospects of sugarcane good. Common rice selling at 8 seers a rupee at Barrackpore, at Barasat 7½ seers, at Basirhat 8 seers and at Diamond Harbour 8¾ seers. Cattle in good condition. Fodder and water sufficient.
8	NADIA ...	0·43	8¼	8½	No standing crops. Lands being prepared for *bhadoi* and jute. No cattle-disease. Fodder and water sufficient.
9	MURSHIDABAD	0·05	8	...	Weather seasonably hot. Lands being cultivated for *bhadoi* paddy. No cattle-disease. Fodder and water sufficient.
10	JESSORE ...	1·04	7 1/12	7 1/12	Weather seasonable but cyclonic. Rainfall not general. Prospects of standing crops (*boro*) fair, but cyclonic wind damaging it. Cultivation of land for jute and paddy still going on. High prices continuing. No cattle-disease. Fodder and water sufficient.

No.	Name of district.	Rainfall at 8-30 A.M. station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
11	KHULNA ...	0·22.	9¼	9¼	Weather windy and cloudy. Rainfall general. Summer rice at Sadar somewhat damaged by hail-storm. Sowing of jute at Bagerhat estimated at 5 per cent. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	Nil	9½ 14½*	9½ 14½*	Weather getting hot. Harvesting of the *rabi* crop approaching completion. Sugarcane being planted and irrigated. *China* doing well. No cattle-disease. Fodder and water for cattle sufficient.
13	GAYA ...	Nil	8 11/16 14 1/16*	9 1/16 14 1/16*	Weather hot. Pressing of sugarcane almost finished. Transplantation of sugarcane begun. Harvesting of *rabi* crops going on. Prices generally stationary. Fodder and water for cattle sufficient.
14	SHAHABAD ...	Nil	9½ 17½*	9½ 15*	Threshing and harvesting of *rabi* crops continuing. Pressing of sugarcane going on. No cattle-disease. Fodder and water sufficient.
15	SARAN ...	Nil	9 13½*	9 14*	Weather seasonable. Harvesting of wheat and barley, pressing of sugarcane and sowing of China still continuing. Lancing of poppy closed. Sowing of indigo about to be finished. No cattle-disease. Fodder and water sufficient.
16	CHAMPARAN ...	Nil	9 14*	9 14*	Sowing of *bhadai* paddy, *china* and *kodo* and harvesting of *rabi* and collection of opium going on. Prospect fair. No cattle-disease. Fodder and water sufficient.
17	MUZAFFARPUR	Nil	9 14*	9 14*	Weather seasonable. Harvesting of *rabi* in progress. Paddy and *mung* being sown in Hajipur. Hail-storms reported from Sitamarhi. Common rice and maize selling at 9 and 13½ seers a rupee, respectively, at Sitamarhi; and at 9¼ and 13¼ seers a rupee, respectively, at Hajipur. No cattle-disease. Fodder and water sufficient.
18	DARBHANGA ...	0·05	8¾ 14*	8¾ 14*	Weather seasonable. Hail accompanied by a few showers of rain on the 6th instant. *Rabi* harvesting almost over. *Mung* being sown. Land being prepared for sowing paddy. No cattle-disease. Fodder and water sufficient. Number of persons on test-work in the Madhubani subdivision on the 4th instant—2,968, showing considerable increase. Number of persons on relief-works 21,607. Total number of persons gratuitously relieved including village doles 10,580.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, and state and prospects of the crops, etc.

		Inches.			
9	MONGHYR ...	Nil	8½ 12½*	9 13*	Weather occasionally cloudy with easterly wind. *Rabi* harvesting continuing. Cattle-disease reported from Jamui and Goari thanas. Fodder and water sufficient.
10	BHAGALPUR ...	0·02	9½ 14*	9½ 13½*	Weather cool and cloudy in the southern portion of the district and seasonable in the northern. Harvesting of *rabi* still going on. Sugarcane planting finished. Sowing of *mung* and paddy going on and that of *makai* commenced. Cattle-disease reported from four villages of thana Bihpur. Fodder and water sufficient.
	PURNEA ...	...	7½ 12*	7½ 12*	Rainfall at Kishanganj 0·07. Weather cloudy with strong easterly wind and cool nights. Harvesting of *rabi* crops approaching completion. Lands being ploughed for *bhadoi* and jute. Sowing commenced in places. Cholera raging in the interior. No cattle-disease. Fodder and water sufficient.
	DARJEELING ...	...	7 11*	...	Hills—Wheat, barley and mustard being harvested. Maize and potatoes being sown. Terai—Ploughing for jute and *bhadoi* going on. Sowing of jute commenced in places.
	SONTHAL PARGANAS.	Nil	10½ 13½*	9	Weather hot. Prospects of *rabi* crops fair. Cattle-disease reported from the Sadr subdivision. Fodder and water sufficient.
	CUTTACK ...	Nil	10½	10½	Cotton and sugarcane growing well. Tobacco and *dalua* being harvested. No cattle-disease. Fodder and water sufficient.
	BALASORE ...	Nil	9½	9½	Weather seasonable. Threshing of paddy and pressing of sugarcane continuing. Other crops and vegetables doing well. Prospects fair. No cattle-disease. Fodder and water sufficient.
	ANGUL ...	Nil	10½	10½	Weather hot. Lands being ploughed. Cattle-disease reported from Angul. Fodder and water sufficient.
	PURI ...	Nil	10½	10½	Wheather seasonable. Fields being ploughed for the ensuing *sarad* paddy crop. *Dalua* thriving well. Cotton also growing well. Pressing of sugarcane over. *Rabi* crops being harvested. No cattle-disease. Fodder and water sufficient.
	SAMBALPUR ...	Nil	11½	11½	Weather clear and warm. Sugarcane planting in progress. Rice-fields being ploughed and manured for the next season's crops. No cattle-disease. Fodder and water-supply sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at sub-station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	Nil	9	9½	Weather seasonable. Lands being prepared for next season's crops. Fodder and water sufficient.
30	Ranchi ...	Nil	10	10	Weather seasonable. Ploughing continuing. State of *tewa* paddy good. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	Palamau ...	Nil	9 7/8	9 7/8	Weather seasonable. Harvesting of *rabi* continuing. Falling of *mahua* flowers commenced. Cattle-disease continuing. Fodder and water sufficient.
32	Manbhum ...	Nil	9½	9½	Weather seasonable. Prospects of crops good. Outturn of *mahua* estimated at 75 per cent. Cattle-disease reported from thanas Purulia and Para. Fodder and water sufficient.
33	Singhbhum ...	Nil	8½	9	Lands being prepared for cultivation of next season's crops. Prospects of crops fair. Common rice selling 10½ and 9 seers a rupee at Seraikella and Kharsawan, respectively. Fodder and water sufficient.
34	Cooch Behar	2·28	7 7/8	7 7/8	Weather cool. Fodder and water sufficient. Cattle-disease reported from Mekliganj.

General Summary.—The weather was generally seasonable. Rain fell in Nadia, Murshidabad, Jessore, Khulna, Darbhanga, Bhagalpur and Cooch Behar, the fall being light except in Jessore and Cooch Bihar, where it was moderately heavy. Hail-storms are reported from Khulna, Muzaffarpur and Darbhanga. Lands are being prepared for the cultivation of *bhadoi* crops and of winter rice. The *rabi* harvest is practically completed. The chief standing crop on the ground is sugarcane, which is doing well. In Darbhanga the number of persons on gratuitous relief is 10,580, on test-works 2,958 and on relief-works 21,807. Cattle-disease is reported from eight districts. There are no complaints of insufficiency of fodder and water. The price of common rice has risen in five and fallen in three districts.

The total fall from 1st January to 6th April 1907		4·11
The average fall of the corresponding period for 24 years, Surveyor-General's Office		3·11

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from the eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew.

C. W. PEAKE,
for *Director-General of Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 8th April 1907.

REPORT OF THE BRUCE INSTITUTION FOR THE YEAR 1906.

NOTIFICATION.

No. 48T.—G.—The 15th April 1907.—The following is published for general information:—

W. S. MILNE,
Offg. Secy. to the Govt. of Bengal.

REPORT OF THE BRUCE INSTITUTION
FOR THE YEAR 1906.

1. *Control.*—(1) During the year under review Sir Alexander Pedler, F.R.S., C.I.E., Director of Public Instruction, and *ex-officio* Governor and Honorary Secretary, Bruce Institution, retired from Government service and was succeeded by Mr. A. Earle, I.C.S.

(2) The following gentlemen were appointed to be Governors during the year:—

(1) Mr. A. M. Monteath, *vice* Mr. D. M. Hamilton, resigned.
(2) Mr. E. Upton (Barrister-at-Law), *vice* Mr. L. P. Pugh (Barrister-at-Law), resigned.
(3) The Ven'ble Archdeacon Luckman, *vice* the Ven'ble Archdeacon Saunders Dyer, deceased.
(4) The Revd. Father A. Van de Mergel, S.J. (re-appointed).

(3) The following is a list of Governors holding office at the close of the year:—

The Hon'ble the Chief Justice of Bengal ... ...
The Most Revd. the Lord Bishop of Calcutta ... ...
The Inspector-General of Civil Hospitals ... ...
The Chairman of the Calcutta Municipality ... ...
The Director of Public Instruction, Bengal (Honorary Secy.)
} *Ex-officio.*

Mr. A. M. Monteath.
Mr. E. Upton.
The Ven'ble Archdeacon Luckman.
The Revd. Father A. Van de Mergel, S.J.
The Revd. Titus Lowe.

II. *Capital and Income.*—The capital of the Institution stood, as in the previous year, at Rs. 10,51,200, of which Rs. 10,46,200 are in the form of 3½ per cent. stock certificate of the year 1865. The balance, viz., Rs. 5,000, is invested in 3½ per cent. Government securities. The annual interest on the capital amounts to Rs. 36,792. The year opened with a balance of Rs. 1,661-3-5, and closed with one of Rs. 20,388-5-5. The reason why the opening balance was unusually small is that the second half-yearly interest of Rs. 18,396 for the year 1905, which is generally received in December, was not received till January 1906.

III. *Election to vacancies, etc.*—(1) The annual election of foundationers was held in the month of January as usual. For the 21 vacancies advertised, 56 applications were received. Three more vacancies having subsequently occurred, 24 girls were elected on the recommendation of a sub-committee consisting of the Ven'ble the Archdeacon Saunders Dyer, the Revd. Father A. Van de Mergel, S.J., the Revd. Titus Lowe, and Mr. W. W. Hornell. Of the girls elected, 12 were placed at the Loreto Convent, Entally (10 at the Orphanage and 2 at the Boarding school), 7 at the Calcutta Girls' School, 1 at the Pratt Memorial School, 1 at St. Paul's Mission Home, 2 at La Martinière, Calcutta, and 1 at the Old Church Parochial Home.

(2) Of the 25 girls who were withdrawn during the year, 16 had attained the age of 17 years—the limit of age ordinarily allowed under the rules; while 4 were withdrawn for various reasons before they had attained that age. The names of the 5 remaining girls were removed on account of continued absence.

(3) Of the eleven girls who were withdrawn during the course of the year and in respect of whom reports have been received, three are learning shorthand and type-writing, while a fourth is seeking employment in that line; two are employed as assistant teachers; two are studying for the High School examination, of whom one intends later on to apply for admission into the Government Training College at Kurseong; one has been married and another is about to be married; while the eleventh is studying at school in the Middle standard. At the close of the year there were 131 girls on the foundation—the same number as in the preceding year. They were distributed as shown below:—

Loreto Convent, Entally—			
Boarding School	22	...	54
Orphanage	32		
Calcutta Girls' High School		...	34
Pratt Memorial School		...	16
La Martinière		...	10
St. Paul's Mission Home		...	7
Calcutta Free School		...	5
Old Church Parochial Home		...	3
Protestant European Orphanage, Cuttack		...	1
Girls' High School, Allahabad		...	1
Total		...	131

(4) The following table affords particulars as to the class and religion of the foundationers at the close of the year :—

Class.	Roman Catholics.	Church of England.	Non-conformists.	Total.
1. Orphans, or deserted by parents ...	19	10	8	37
2. Fatherless or deserted by their fathers, or whose fathers were incapable	35	29	19	83
3. Cases in which the father was alive, or both parents were alive ...	1	5	5	11
Total ...	55	44	32	131

IV. *Education and Maintenance.*—(1) The nature of the education imparted to the girls on the foundation is generally that prescribed for primary and middle schools for Europeans. In exceptional cases a higher education is given. Parents and guardians are allowed to choose any school for the education of their children or wards, provided that such a school is approved by Government as suitable. A sum of Rs. 21-8 or of Rs. 16 a month is paid for the education and maintenance of each foundationer in a boarding school or an orphanage, as the case may be. A sum of Rs. 40 or of Rs. 25 is also allowed for each foundationer for outfit on joining a boarding school or orphanage, as the case may be. Under the rules a girl is not ordinarily allowed to remain at school after she has attained the age of 17 years, when an outfit grant of Rs. 50 is given to enable her to make a start in life. If, however, a girl elects to take up teaching as a profession, some extension of time is generally allowed. One such extension was granted during the year. Short extensions, not exceeding a few months, are also generally allowed to enable foundationers to appear at the examinations prescribed under the Code of Regulations for European Schools. Five such extensions were granted during the year.

(2) The average monthly cost of the education and maintenance of each girl on the Fund amounted to Rs. 18-12-1, as against Rs. 18 12 in the preceding year.

(3) The total amount paid under the different heads of expenditure was as shown below :—

1905.	Rs.	A.	P.
Education and maintenance ...	32,369	1	8
Office establishment	834	0	0
Contingencies	34	4	0
Advertisements and printing ...	234	7	10
Outfits	1,845	0	0
Funeral expenses	40	0	0
Other charges	21	12	0
Total ...	35,372	9	8

1906.	Rs.	A.	P.
Education and maintenance ...	33,783	0	0
Office establishment	850	8	0
Contingencies	37	1	11
Advertisements and printing ...	184	15	1
Outfits	1,330	0	0
Other charges	60	8	0
Total ...	36,236	1	0

V. *Inspection.*—The Revd. Father A. Van de Mergel was appointed Visiting-Governor for the first half-year, and re-appointed to the same office for the second half-year. He stated in his first report that he had visited all the schools in Calcutta where Bruce foundationers were being educated, and that he was very favourably impressed by the good work done in the different institutions. His second report was to a similar effect.

VI. *Meetings of the Governors.*—Four meetings were held during the year.

CALCUTTA,
The 12th March 1907.

A. EARLE,
Honorary Secretary to the Governors.

WEATHER AND CROP REPORT.

For the week ending the 15th April 1907.

29	Hazaribagh	0·46	9	9	Weather cloudy and sunshiny alternately. Prospects of *mahua* and mangoe fair. Lands being cultivated for the next season's crops. Plague reported from one thana.
30	Ranchi ...	0·90	10	10	Weather cloudy. Ploughing facilitated by the recent rain. Harvesting of *rabi* continuing. Cattle-disease reported from five thanas. Fodder and water sufficient.
31	Palamau ...	0·06	$9\frac{8}{17}$	$9\frac{8}{17}$	Weather cloudy. *Rabi* harvesting still going on. Sugarcane being watered. Cattle-disease continuing. Fodder and water sufficient.
32	Manbhum ...	0·48	$9\frac{1}{2}$	$9\frac{1}{2}$	Rainfall general. Weather seasonable. Prospects of crops good. Common rice selling at 9 seers a rupee at Gobindpur. Cattle-disease reported from thanas Purulia and Gourangdi. Fodder and water sufficient.
33	Singhbhum ...	0·32	9	$8\frac{1}{2}$	Lands being prepared for cultivation of next season's crops. Common rice selling at $10\frac{1}{2}$ and 8 seers a rupee at Seraikella and Kharsawan, respectively. Fodder and water sufficient.
34	Cooch Behar	5·26	$7\frac{1}{11}$	$7\frac{1}{11}$	Weather cloudy. Cattle-disease reported from Mecklignnj.

General Summary.—Rain was fairly general throughout the Province. The fall was heavy in Hooghly, Nadia, Darjeeling, Cooch Behar and in parts of Jessore. Damage was done to the standing crops by hail in some places in Murshidabad, and by rain in Bhagalpur. The preparation of lands for the next season's crops continues. The planting of sugarcane is nearly over. In Darbhanga the number of persons on gratuitous relief is 10,316, on test-works 2,210 and on relief-works 23,875. Cattle-disease prevails in nine districts. Fodder and water-supply are sufficient everywhere. The price of common rice has risen in eight and fallen in two districts, and has remained stationary in the remaining districts.

SUMMARY OF THE RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE MONTH OF MARCH 1907.

The month was marked by general rain over the Province. The fall was heavy for the season in South-West Bengal during the week ending the 23rd.

The rainfall in all districts of the Province was well above the average, the excess varying from 0·59 inch to 4·50 inches.

On an average South-West Bengal received 3·51 inches, Bihar 1·78 inches, Orissa 2·01 inches, and Chota Nagpur 2·77 inches.

Expressed in percentage figures, South-West Bengal received 303 per cent. of the normal, Bihar 468 per cent., Orissa, 170 per cent., and Chota Nagpur 390 per cent.

The following table gives a summary of the rainfall data of each of the four Meteorological Divisions of the Province of Bengal for the month of March 1907:—

Meteorological Divisions.	Rainfall of month. Average for the Division.	Normal average.	Variation.	Rainy days. Average number in month.	Normal average number in month.	Variation.	Rainfall since 1st October 1906. Average for the Division.	Normal average.
South-West Bengal ...	3·51	1·16	+2·35	4·93	1·89	+3·04	8·87	4·62
Bihar ...	1·78	0·38	+1·40	4·12	0·80	+3·32	4·14	2·89
Orissa ...	2·01	1·18	+0·83	3·78	1 87	+0·91	8·13	6·73
Chota Nagpur ...	2·77	0·71	+2·06	3·35	1·45	+1·90	7·98	3·78

The 15th April 1907.

C. A. OLDHAM,
Director of Agriculture, Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of March 1907.

	Inches.	Date.	Hour.
The mean pressure of the month	29·905		
The average pressure of March from 44 years' registers ...	29·853		
The highest pressure in the month	30·084	16th	10
The lowest pressure in the month	29·683	12th	16
The range of pressure	0·401		
	Hours		
The total number of hours of bright sunshine during the month	216·9		
The maximum possible number of hours of sunshine ...	371·3		
	⊖		
The mean temperature of the month	76·7		
The average temperature of March from 19 years' registers ...	79·2		
The highest temperature in the month	93·7	9th	
The lowest temperature in the month	58·0	1st	
The range of temperature during the month	35·7		
The mean daily range of temperature	20·3		
The greatest range of temperature in one day	29·5	1st	
	Per cent.		
The mean humidity of the month	68		
The average humidity of March from 19 years' registers ...	66		
	Inches.		
The mean vapour tension of the month ...	0·611		
The average vapour tension of March from 19 years' registers ...	0·634		
The mean cloud proportion of the month	3·82		
The average cloud proportion of March from 30 years' registers	2·51		
	Inches.		
The total rainfall of the month	4·02		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 8 feet above the ground)	4·31		
The average fall of March from 23 years' registers ...	1·14		
The greatest fall in 24 hours	2·75	23rd	
	Days.		
The number of rainy days in the month	5		
The average number of rainy days in March from 23 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	139·3		
The mean difference of sun and air temperatures	51·5		
The greatest sun temperature	150·1	4th	
The greatest excess of sun over air temperature	57·4	4th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	62·9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4·5		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	7·1	15th	
	Miles.		
The mean movement of the wind per day	107·8		
The greatest movement of the wind in one day	185·0	8th	
The greatest movement of the wind in one hour	15·0	8th 9 to 10 A.M. and 10 to 11 A.M.; 22nd 9 to 10 A.M. and 3 to 4 P.M.	

The number of hours with winds from each of the eight points—

	Hours.
The total number of hours of bright sunshine	47·4
The maximum possible number of hours of sunshine	87·7
	°
The mean temperature of the seven days	82·2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	84·6
The extreme variation of temperature	23·6
The maximum temperature	93·6
	Miles.
The highest velocity of the wind in one hour	20
	%
The mean relative humidity	78
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	69
	Inches.
The total fall of rain from 7th to 13th April 1907	0·57
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·39
The total fall from 1st January to 13th April 1907	4·68
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·40

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

t, thunder; ≤, lightning; R, thunderstorm; o, overcast; d, drizzling rain; p, passing temporary showers; /, strong wind.

C. W. PEAKE,

19	Monghyr ...	0·04	8½ 12½*	8½	Days hot and nights cool. *Rabi* harvesting still going on. Sugarcane planting nearly finished. Cattle-disease reported from thanas Jamui, Gogri, Surajgarh and Barbigha. Fodder and water sufficient.
20	Bhagalpur ...	0·08	8⅞ 13⅞*	9⅛ 13⅞*	Weather hot in the day and cool at night. Harvesting of *rabi* continuing. Prospects of *mung* and paddy favourable. Cattle-disease reported from five villages in thana Bihpur and from two villages in outpost Shahkund. Fodder and water sufficient.
21	Purnea ...	0·69	7½ 12*	7½ 12*	Weather seasonable—days hot and nights cool. Rainfall at Kishanganj 2·34 and at Araria 1·3[illegible]. Harvesting of *rabi* crops almost finished. Cultivation of *bhadoi* and jute going on. No cattle-disease. Fodder and water sufficient.
22	Darjeeling ...	0·11	7 10*	7 11*	Weather seasonable. Hills—Wheat, barley and mustard being harvested. Potatoes and maize in fair state. Terai—Ploughing for jute and [illegible] going on. State of crops hopeful.
23	Santhal Parganas.	0·24	9½ 16*	9½ 12*	Weather hot. Sugarcane doing well. Cattle-disease reported from Deoghar, Godda and Rajmahal sub-divisions. Fodder and water sufficient.
24	Cuttack ...	Nil	10⅜	10½	*Dalua* paddy and cotton being harvested. Sugarcane being transplanted. No cattle-disease. Fodder and water sufficient.
25	Balasore ...	0·40	9½	9½	Weather seasonable. Ploughing continuing. Vegetables doing well. Prospects fair. No cattle-disease. Fodder and water sufficient.
26	Angul ...	1·00	10½	10½	Weather warm. Ploughing in progress. Sugarcane doing well. Cattle-disease reported from Angul. Fodder and water available.
27	Puri ...	1·84	10½	10½	Weather seasonable. Fields being ploughed for winter rice. *Dalua* paddy reaping commenced. Cotton doing well. Sugarcane planting continuing. *Rabi* crops being harvested. No cattle-disease. Fodder and water sufficient.
28	Sambalpur ...	2·11	10½	10½	Weather warm and cloudy. Rainfall good. Sugarcane planting completed in Sadr Tahsil. Ploughing stopped in Bargarh Tahsil owing to rainfall. A few fields being ploughed for the next season's crop. Cattle-disease prevalent in one village in the Sadr Tahsil. Fodder and water-supply sufficient.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
29	Hazaribagh	0·05	9	9	Weather sunshiny and cloudy alternately. A few showers throughout the district. *Marua* and mangoe somewhat damaged by rain. No standing crops at present. Plague reported from two thanas. Fodder and water sufficient.
30	Ranchi ..	0·32	10	10	Weather rather cloudy. Ploughing and manuring in progress. Sowing of paddy commenced in places. Standing crops doing well. Cattle-disease reported from seven thanas. Fodder and water sufficient.
31	Palamau ...	1·15	9	9½	Weather cloudy. Temperature much below the normal. *Rabi* harvesting approaching completion. Sugarcane doing well. Cattle-disease continuing. Fodder and water sufficient.
32	Manbhum ...	0·38	9	9½	Weather seasonable. Prospects of crops good. Outturn of tobacco and sugarcane estimated at 75 per cent. Cattle-disease reported from thanas Purulia and Gourangdi.
33	Singhbhum ...	0·57	9	9	Lands being prepared for the next season's crops. Common rice selling at 9½ and 10 seers a rupee at Kharsawan, and Seraikella respectively. Fodder and water sufficient.
34	Cooch Behar	3·31	7	7	Weather generally cloudy, latterly clear. Fodder and water sufficient.

General Summary.—Rain, as in the previous week, was fairly general throughout the Province. The fall was light, except in Puri, Sambalpur, Palamau, Cooch Behar and in parts of Purnea, where it was somewhat heavy. The sowing of jute has commenced. The planting of sugarcane has almost been finished and germination has been satisfactory. In Darbhanga the number of persons on gratuitous relief is 10,369, on test-works 2,760 and on relief-works 25,631. The corresponding figures reported last week were 10,316, 2,210 and 23,875 respectively. Cattle-disease exists in ten districts. The supply of fodder and water is reported sufficient in all districts. The price of common rice has risen in nine and fallen in two districts.

C. A. OLDHAM,

Director of Agriculture, Bengal.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF MARCH 1907.

THE weather in the Provinces of Bengal and Eastern Bengal and Assam was during the month of March 1907 dominated, as in the preceding month, by a series of depressions that entered India from Persia or Baluchistan, and moving in an easterly direction gave rise to disturbed conditions in the area under report. In the first week rain fell in the northern districts of the reporting area and skies were cloudy during the prevalence of unsettled weather, but were nearly clear during the remainder of the week. Temperature was normal or in defect except from the third to the fifth, when it was in slight excess. In the second week of the month some rain fell on the 8th and 9th and general rain over the greater part of the reporting area was recorded on the 12th and 13th. In each case the disturbed weather was caused by the approach of a depression from the west. Skies were cloudy, while the two depressions were affecting the weather, but were clear or only lightly clouded on the remaining days. Temperature was normal or in excess up to the 13th, when a fall took place, and it was in general defect on that day and on the 14th. In the third week weather was again affected by a depression, which gave rain from the 16th to the 21st. Rainfall commenced in the western districts and spread eastwards over the whole reporting area, being most general on the 18th, after which it decreased, and on the 20th and 21st was confined to a few falls in Assam. The skies were more or less heavily clouded from the 16th to the 19th. The most remarkable meteorological feature of this period was the abnormally low temperature that prevailed. In South-West Bengal day temperatures were 20° below normal at some stations. Weather of the last week of the month was again affected by depressions approaching from the west. Rain fell in the western districts on the 22nd and was general on the 23rd. On the next two days weather was dry, but on the 26th rain occurred in Orissa, Deltaic Bengal and Assam, and on the 27th on the Orissa and Bengal coasts. Some of the amounts recorded were fairly heavy, on the 23rd Saugor Island and Cherrapoonjee recording about 5 inches each and Calcutta 2¾ inches. Skies were cloudy on the days of rainfall. Temperature was in defect during the whole period, more particularly on the 23rd, when very low temperatures were recorded.

A notable feature of the month was the development of a cyclonic storm in the extreme south of the Bay—a very rare occurrence at this time of the year. This disturbance probably commenced to develop to the south-west or south of the Andamans about the 6th or 7th of the month, and ultimately moving in a westerly direction crossed the coast of Ceylon on the 10th. It is reported to have caused considerable damage on land and to one or two ships that found themselves in its neighbourhood.

Summary of Temperature.—Mean temperature was in defect over the whole reporting area, as might have been anticipated from the usual association of defect in temperature with excess in rainfall. The highest temperature registered during the month was 100·9 at Cuttack and the lowest was 51·2 at Sibsagar.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of March 1907 :—

Meteorological Division.	Temperature.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal	99·3	58·2	87·3	66·2	76·8	— 3·6
Eastern Bengal, North	93·2	51·7	88·2	59·9	71·5	— 3·5
Eastern Bengal, South	98·9	66·0	85·5	64·8	75·2	— 2·3
Bihar	95·3	51·7	84·8	60·1	72·2	— 4·5
Orissa	100·9	57·6	89·1	70·3	79·7	— 1·8
Chota Nagpur*	98·4	52·5	86·8	61·6	73·7	— 3·7
Assam	90·2	51·2	78·6	59·6	69·2	— 3·3

* Purulia not included.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province.

Actual and average rainfall and departure from normal for March 1907.

		%
The mean relative humidity		69
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		69
		Inches.
The total fall of rain from 14th to 20th April 1907		0·43
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·29
The total fall from 1st January to 20th April 1907		5·11
The average fall of the corresponding period for 24 years, Surveyor-General's Office		3·69

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Alipore Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

Sn., due; o, overcast; p, passing temporary showers; d, drizzling rain.

C. W. PEAKE,
for Director-General of Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 22nd April 1907.

REVISION SETTLEMENT OF THE BANKI GOVERNMENT ESTATE IN THE DISTRICT OF CUTTACK.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 25th April 1907.

RESOLUTION No. 283T.—R.

READ—

The Final Report on the revision settlement of the Banki Government Estate in the district of Cuttack, and a note of the Commissioner of the Orissa Division, dated the 15th August 1906, submitted with letter No. 3088., dated the 24th January 1907, from the Director of Land Records.

THE Government estate of Banki was originally one of the Tributary Mahals of Orissa, but was forfeited to Government in the year 1839 owing to the misconduct of the Raja who was convicted of murder and imprisoned for life.

2. The estate was last settled in 1891 for a period of fifteen years which expired in September 1905. The operations which form the subject of the present Report were commenced in December 1904. The estate was surveyed by the professional Survey Department in 1891, and a staff has since been maintained continuously to keep the records up to date. It was, therefore, assumed

that all that would be necessary on the present occasion would be a formal revision to bring the records into harmony with the provisions of the Bengal Tenancy Act, certain portion of which have since been extended to the districts of Cuttack, Puri and Balasore. An inspection made by the Director of Land Records in January 1905, however, disclosed the fact that alterations had taken place in sixty per cent. of the plots since the previous settlement, and that in many cases the changes reported by the sarbarakars had not been incorporated in the record. A plot-to-plot enquiry and revision were therefore made, with the result that the number of plots was found to have increased from 115,775 to 140,978, and the number of tenancies from 30,479 to 34,820. The attestation of the revised record and the assessment of rents were then carried out simultaneously. The settlement was completed in December 1905, but the Settlement Officer was unable to submit the final Report till June 1906, owing to the pressure of other duties.

3. The estate comprises an area of 117 square miles, with a population of 58,314 persons according to the census of 1901, as against 57,451 a decade earlier. Since the previous settlement, the total cultivated area has risen from 37,211 to 42,594 acres, which is equivalent to 66·6 square miles. Out of the total uncultivated area of 50·6 square miles, only about one-sixth is reported to be culturable, the bed of the Mahanadi alone covering about half the remainder. The holdings in the possession of settled and occupancy raiyats number 20,313, or about three-fifths of the total number of holdings (34,820) in the estate; their average area is 1·63 acres. There are only 369 non-occupancy holdings, the average area in their case being 1·04 acres.

4. The assessment of rents has been made on a very simple system, the enhancement being based solely on the rise in the price of rice, the staple food-crop of the estate, which had taken place since 1891. This would have justified an enhancement of annas 2·7 in the rupee, but it was limited to two annas on the recommendation of the Director and Commissioner. The Lieutenant-Governor is pleased to learn that this leniency has been appreciated by the tenants. No appeals or objections of any kind were preferred during, or after, the confirmation of the settlement rent-roll; and the new rents were collected in full in the first year of the new settlement (1905-06).

5. The gross rental of the estate (exclusive of raiyati rents paid for revenue-free lands) has been raised from Rs. 32,658 to Rs. 38,218, or by 17 per cent., of which 12½ per cent. is due to the enhancement of rates and the balance to the extension of cultivation. The incidence of the settled rents per acre is Re. 1-0-4, as against annas 14-8 at the previous settlement. The low rates of rent do not mean that the lands are infertile; and as evidence of the prosperity of the tenants, the Lieutenant-Governor observes that, during the settlement which has just expired, the few holdings sold, have fetched an average price of Rs. 113-4 per acre, or more than a hundred times the yearly rental. In addition to the rent, there are various miscellaneous receipts from fisheries, trees, etc.; including these the gross assets secured by the present settlement is Rs. 39,404. The net Government revenue, after deduction of the commission payable to sarbarahkars and others, comes to Rs. 34,389, as compared with Rs. 28,820 at the last settlement, an increase of 19 per cent.

6. This substantial increase has been effected at a cost of less than three annas an acre, and without any friction. In the calculation of costs the share of pay and establishment of the Director of Land Records, the pay of the Settlement Officer, who was also manager of the estate, and certain minor items have not been included. Even so, the settlement operations must be regarded as having been carried out very economically; and the Lieutenant-Governor has much pleasure in confirming the settlement for a period of fifteen years from the *Amli* year 1313 (September 1905).

7. The Lieutenant-Governor is gratified to learn that the three Co-operative Credit Societies started in the estate are much appreciated by the tenants. The Board of Revenue are requested to draw the attention of the Registrar of Co-operative Credit Societies to the suggestion made in paragraph 33 of the Settlement Report that the capital of the Societies in the Banki Estate should be increased. The Settlement Officer has brought to notice the unsatisfactory

state of communications which has prevented the people of Banki from deriving any great benefit from the opening of the East Coast Railway. The attention of the Public Works Department will be drawn to the remarks contained in paragraph 12 and to the comments of the Collector recorded in the following paragraph of the Settlement Report. His Honour regrets to find that the assignments of lands made by the former Hindu proprietors of the estate for the maintenance and worship of idols are being grossly mismanaged by the *sebaits*. There are however legal difficulties in the way of the Settlement Officer's proposal that the power to sanction the institution of suits under section 539 of the Civil Procedure Code should be delegated to the Collector of Cuttack.

8. The Lieutenant-Governor acknowledges the excellent work done by the Settlement Officer, Babu Balmukunda Kanungo. The services of this officer have recently been rewarded by promotion to the rank of Deputy Collector. His Honour's thanks are also due to the Collector, Mr. A. Garrett, I.C.S., for the valuable assistance he rendered to the Settlement Department in the concluding stages of the operations.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

E. A. GAIT,

Offg. Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 29th April 1907.

No.	Name of district.	Rainfall at Sadr station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.

		Inches.			
29	HAZARIBAGH	0·46	9	9	Weather cloudy and sunshiny alternately. Drizzling rain during the week. Sugarcane doing well. Outturn of *mahua* fair. Fodder and water sufficient.
30	RANCHI ...	0·06	9½	10	Weather cool and cloudy. Lands being ploughed and manured. *Tesra* paddy doing well. Cattle-disease reported from three thanas. Fodder and water sufficient.
31	PALAMAU ...	...	8 7/16	9	Harvesting of *rabi* completed. Sugarcane doing well. Cattle-disease not reported. Fodder and water sufficient.
32	MANBHUM ...	0·01	9½	...	Weather seasonable. Prospects of crops good. Common rice selling at 9 seers per rupee at Gobindpur. Cattle-disease not reported. Fodder and water sufficient.
33	SINGHBHUM ...	Nil	9	9	Lands being prepared for cultivation of the next season's crops. Common rice selling at 9½ and 10 seers a rupee at Kharsawan and Seraikella respectively. Fodder and water sufficient.
34	COOCH BEHAR	0·14	7 1/16	7 1/16	Weather seasonable, latterly cloudy. *Aman* paddy being sown in nurseries. Fodder and water sufficient.

GENERAL SUMMARY.—Rainfall was general, though light in the Presidency, Orissa and Chota Nagpur Divisions. In Bihar scattered showers fell. The sowing of jute and other *bhadoi* crops is in progress. Sugarcane is doing well. Rain is wanted in parts of the 24-Parganas, Nadia and Bhagalpur. In Darbhanga the number of persons on gratuitous relief is 12,302, on test-works 2,282 and on relief-works 26,274. Cattle-disease is reported from seven districts. The supply of fodder and water is sufficient everywhere. The price of common rice has risen in ten and fallen in seven districts. The variations have been slight.
